

HYDRAULIC CONCEPT

Over ten centuries ago, encaustic cement tiles were developed by the Arab Civilization, reemerging in the south of France in the mid-19th century from where they extended towards many Mediterranean towns, reaching diverse countries worldwide.

In Aparici we have recovered this concept and updated it to fulfill current desires and needs; creating patchworks out of combinations within our collections which account for over forty different designs. Our proposals include combining our own encaustic tile-inspired collections among each other as well as blending them together with our porcelain collections in wood, concrete and/or monocolors look; establishing, this way, a trend which positions us at the forefront of interior design. This new concept can be pursued both for floor and wall coverings, offering a broad chromatic spectrum as well as the possibility of using matt or gloss finishes.

Despite the ancient origin, our designs are optimum for modern and up-to-date environments, creating a vintage or industrial ambient in city lofts, high-end restaurants and bars... and leaving behind the stereotypes regarding its former use. Moreover, the technical features of our porcelain enable the use of these collections in certain commercial areas as well as outdoor areas. Enjoy our **HYDRAULIC CONCEPT** collections...

Hace más de diez siglos que los hidráulicos fueron desarrollados por la civilización árabe, resurgiendo en el sur de Francia a mediados del siglo XIX desde donde se fueron trasladando por muchas poblaciones mediterráneas hasta llegar a extenderse por todo el mundo.

En Aparici hemos recuperado este concepto y lo hemos adaptado a nuestros tiempos, creando "patchworks" mediante combinaciones de nuestras series, las cuales cuentan con más de cuarenta diseños diferentes. Proponemos combinaciones tanto entre las propias series de hidráulicos como con nuestras colecciones de porcelánico en madera, cemento y/o monocolors; marcando de esta forma una tendencia que nos permite estar a la vanguardia de la moda en interiores. Este nuevo concepto podemos aplicarlo tanto en pavimento como en revestimiento, ofreciendo así un amplio abanico de posibilidades tanto a nivel cromático como en acabados mate o brillo.

A pesar de su origen tan antiguo, nuestros diseños resultan perfectos para ambientes modernos y actuales, creando un efecto vintage o industrial, en viviendas de ciudad, locales de moda... y olvidándonos del estereotipo sobre su uso en el pasado. Las características técnicas de nuestro porcelánico permiten su uso, asimismo, en ciertas zonas comerciales así como en ambientes exteriores. Disfrute de nuestras colecciones **HYDRAULIC CONCEPT**...

Cela fait plus de dix siècles que les carreaux ciment ont été développés par la civilisation arabe, ils sont arrivés dans le sud de la France au milieu du XIXe siècle et se sont déplacés partout dans le sud de l'Europe pour être de nos jours présent dans le monde entier.

Aparici s'est concentré sur cette gamme de produits pour l'adapter à notre époque. Nous avons créé des «patchworks» par de nombreuses combinaisons possible entre nos différentes séries, où nous avons plus d'une quarantaine de designs différents. Nous proposons des combinaisons possible entre les deux séries des carreaux ciment et avec nos collections de porcelaine en bois, béton et mono couleurs, créant ainsi une tendance qui nous permet d'être à l'avant-garde. Cet nouveau concept s'intègre parfaitement aux sols ainsi qu'aux murs, c'est pour cela que nous proposons une large gamme en finition mat ou brillant.

Malgré des origines très anciennes, notre gamme s'intègre parfaitement pour les ambiances modernes ou contemporains, créant ainsi un effet vintage ou industrielle revisiter. Les caractéristiques techniques de notre porcelaine, permettent également d'utiliser notre gamme pour certaines zones commerciales ainsi que des environnements extérieurs. Profitez de notre collections **CONCEPT HYDRAULIQUE**...
