

TILE WEEK 2025

**our emotions
in matter**

material poetry

Surfaces that tell stories of matter and memory. The new Ragno collections rediscover craftsmanship as a modern language: concrete effects and small glossy sizes restore the allure of handcrafted imperfections. Precious materials such as onyx embody an essential elegance, while stones and wood with tactile textures bring to life the experience of nature. An invitation to rediscover the continuity between interior and exterior, blending emotions and tactility that shape living spaces.

INCANTO COLLECTION

soft
glow

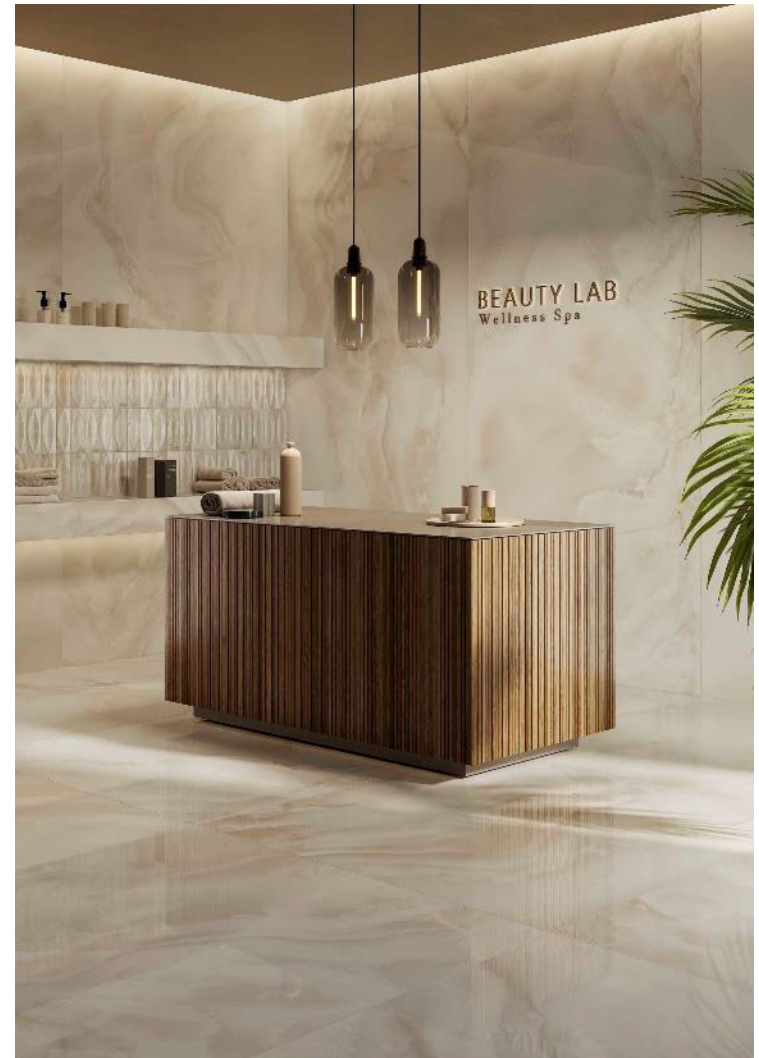

MARBLE EFFECT

Incanto

precious reflections

The Incanto collection is enriched with new colors inspired by five extraordinarily expressive Onyx varieties, ranging from Avorio – with Vein and Cross graphics – to three accent shades in Blu, Verde, and Perla. The combination of Onice Avorio and Onice Venato Avorio enables harmonious compositions, gracefully melding sobriety and elegance within a singular design concept. The graphics are available in the large slab format of 120x278 cm with a 6 mm thickness, ideal for seamless claddings with striking visual impact, as well as in flooring formats of 120x120 and 60x120 cm, with traditional thickness.

SOLIDA COLLECTION

soft
surfaces

Solida

artisan memories

The Solida collection arises from the reinterpretation of compact surfaces rich in detail that recount the memory of artisanal terracotta on a larger scale, recreating its atmosphere in a macro version. The collection is available in five formats – 160x160, 120x120, 100x100, 60x120, and 60x60 cm – and in six colors with warm and cool tones featuring a dense and variegated texture, made even more realistic through the use of 3D Ink technology. The R9 and Structured R11 surfaces in the 120x120 and 60x120 cm formats allow for continuous flooring between indoor and outdoor spaces, perfect for coordinated and harmonious projects.

The range is completed by Stick Mosaic, in the 31x31 cm size, composed of irregular vertical tesserae with a “spaccatella” effect, creating contrasting joint patterns. The Murrina Mosaic in the 30.5x38.5 cm format, more decorative in character, features glossy material arranged randomly on triangular tesserae, crafted for refined wall coverings. A distinctive feature of Solida is the Tappeto Decor, a large-scale cementine tile that reflects the colors of the collection, available in the 100x100 format in two versions – warm and cool – on Avorio and Bianco backgrounds.

REALSTONE_CLASSICA COLLECTION

natural
allure

Realstone_Classica

essential living

Realstone_Classica is the result of a profound reinterpretation of the original material: the intense tone of Emperador marble is gently softened, along with its characteristic veined pattern. The surface is sandblasted, made drier and more contemporary to offer visual balance and versatility in the design of residential, public, and commercial spaces, where discreet elegance seamlessly combines with durable and safe porcelain stoneware surfaces.

Manufactured in colorbody porcelain stoneware, **Realstone_Classica** is available in three neutral colors in the 120x120 and 60x120 cm sizes, both featuring R10 and Structured R11 surfaces, for continuous installation across indoor and outdoor areas, while the 60x60 cm format is intended for indoor use. The use of 3D Ink technology emphasises the microtextures of the veins, crafting a visual and tactile relief that gives the material an authentic and natural dimension. The Clip mosaic, in the 28x33 cm format, composed of a collection of elongated triangular tiles with glossy material inserts arranged randomly, is ideal for crafting decorative walls that amplify the expressive power of the surfaces.

NODIS COLLECTION

deep
beauty

WOOD EFFECT

Nodis

pure materiality

Nodis is presented in two tones strongly characterised by natural variations: Rovere, with warm and profound shades recalling the well-worn beauty of wood aged by time, and Natural, a lighter, brighter variant that breathes life into spaces while preserving a nuanced and tactile aesthetic. The collection is developed in the 5.3x30 cm format, introduced for the first time in a wood-effect line, ideal for creating decorative textures, graphic inserts, or striking panels, as well as in the 10x70, 11x54 and 20x120 cm formats, the latter available in both Natural and Structured R11 finishes, ensuring flooring continuity between indoor and outdoor spaces.

STONE EFFECT

Realstone_Travertino

rediscovered warmth

Realstone Travertino is the porcelain stoneware collection that precisely and delicately reinterprets the timeless identity of Italian travertine, an ancient stone that has spanned eras and styles, preserving its natural elegance.

Today the collection evolves with the introduction of the new 160x160 cm format, developed on the Cross graphic, which delivers a soft and warm texture in the two tones White and Beige, and the 5.3x30 format available in the Vein and Cross graphics in the same tones.

STONE EFFECT

Stoneplay

broad horizons

Material realism and chromatic refinement come together for large surfaces that interpret various natural stone aesthetics with sensitivity and coherence, in the new 120x120 cm format. Mayenne, with its warm and Mediterranean mood, is available in Avorio and Beige and features soft veins and gentle shades. Cliff, with a more pronounced graphic design, is characterized by cross-cut effect clouding in the Bianco and Beige colors.

MID COLLECTION

color accents

Mid

shiny inserts

Mid is the new porcelain stoneware collection that celebrates the meeting between craftsmanship and industry, between memory and innovation. A project inspired by small handmade ceramic productions, reinterpreted through the precision of contemporary design, giving life to compact, vibrant, and intensely tactile small-format surfaces. Available in a single 6x24 cm format and Glossy finish, in six bold and powdery colors – Lino, Sabbia, Ambra, Rubino, Salvia e Turchese. Mid stands out for its lively and irregular texture: the dotted graphic is achieved through the presence of glassy grit, distributed in grains of different sizes, making each piece unique and unrepeatable.

Mid

dynamism and depth

Parallel, deep and sharp reliefs cross the surface, creating dynamic depth effects. The 3D Way Structure completes the series, available in the 6x24 cm format and in all the colors of the collection. Installed on walls, it creates a chalked, striped effect, ideal for wainscoting layouts or for enhancing partitions, shower walls or decorative inserts.

HAND COLLECTION

surface
vibrations

Hand

harmonious textures

The material, in its most essential and pure form, is the absolute protagonist of a white-body wall tile that evokes the aesthetics of plastered and troweled walls. Hand is available in a single 33x100 cm format and in two neutral shades: Pomice, the lighter one, and Calce, slightly darker. The graphic design is intentionally subtle, barely hinted at, while the surface acquires a deeply material expressiveness, enhanced by 3D Ink technology. Thanks to the combination of three-dimensional structures and a highly refined decoration, Hand covers residential or commercial spaces with a calm and contemporary beauty. The 3D Made structure stands out for its irregular vertical relief and three-dimensional graphics where light and shadow alternate in constant motion. The 3D Form structure, on the other hand, features a relief module with a “tray” design. The Decoro Kerala, a delicate and refined pattern, is offered as a single module and plays with the alternation of Pomice and Calce colors to harmoniously integrate with both backgrounds.

Tiempo Wall

past present

The Tiempo Wall collection introduces the new 20x60 cm format, ideal for cladding even the most compact spaces. Presented in four delicate and versatile shades, the new format harmonizes perfectly with the existing Tiempo range, serving as an ideal foundation for visually balanced and coherent compositions, both in residential and commercial environments.

The collection is enriched by the 3D Flare Structure, distinguished by a soft, subtle three-dimensional relief that imparts movement and depth; the Biophilia Decoration, inspired by a delicate foliage motif on a single module available in warm and cool tones; and the Patchwork Decoration, which combines geometries and ornaments in a distinctive graphic balance.
