

Programme of Delivery

2026

Micro

Fine micro patterns in lines, checks and chessboard design meet a mineral-like base in this Micro series designed by Sebastian Herkner. Gentle contrasts and directionless structures create harmonious surfaces with a soft appearance - a combination of graphic precision and natural calm for timelessly modern interior designs. Further information can be found on the pages 260-267.

Smalto

Smalto combines traditional glazing techniques with modern technology. Intense colors, vibrant effects and fine textures create distinctive surface patterns full of depth - a tribute to the diversity of ceramic glazes and their fascinating, individual aesthetics. Further information can be found on the pages 386-389.

Discover

Discover combines fine streaks, shades and grains to create a harmonious, lively surface appearance. The combination of smooth and relief surfaces gives walls and floors a natural yet modern look - discreet, distinctive and versatile. Further information can be found on the pages 162-169.

We understand. Since 1755.

Reliable

We know a lot about tiles. We have been working with clay since 1755 and have a comprehensive understanding of our material and the production of highest-quality stoneware, porcelain stoneware and earthenware. In our four German production facilities, we are constantly refining our recipes for mixing clay, feldspar, fireclay, kaolin and water. As a natural material which transitions from plastic to solid in carefully monitored firing processes, clay offers endless possibilities for creating ceramic products that help make architecture durable, sustainable and beautiful.

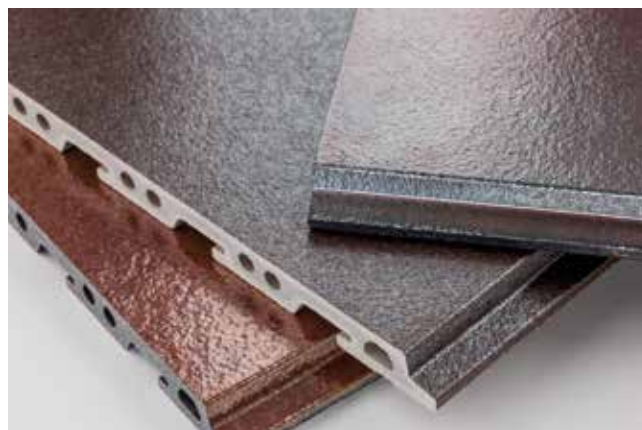

Versatile

Our products are used far and wide. Indoors and outdoors. From private homes to museums. From hotels to hospitals. From restaurants to offices. From shops to swimming pools. From bathroom floors to building facades. We offer floor, wall and facade tiles for every purpose. And we produce all kinds of special elements to meet almost any specific requirement, whether it's a custom edge for a swimming pool or an integrated orientation aid for visually impaired people. Our tiles can be found everywhere, world-wide.

Cooperative

No matter how good our products are, we believe that only their application brings out their qualities. That's why we value collaboration and are happy to share our knowledge to find the best solution for each of your architectural projects. Where our standard products reach their limits, we develop customized solutions. Special productions are our speciality. We have the expertise and experience to support architects from the invitation to bid to the project completion. Tell us how we can help you. Contact us if you want to hear what we know.

Innovative

We know how to produce great tiles. Yet we work ceaselessly to make them even better. Craftsmanship and new technologies combine in the creation of innovative slip-resistant surfaces for wet areas and the development of conductive ceramic floors for areas with electrostatic charge. We invest in health and hygiene, as demonstrated by our sustainable Hytect technology, which is used in almost every product we make. In addition to developing innovations in all areas, we are proud of offering tailor-made new solutions and helping architects at the realization of their best ideas.

Sustainable

The requirements to be met in the construction sector are continuously increasing. Building owners, planners and users make new demands which also include the future developments to a great extent. Energy efficiency, preservation of resources and climate change are the keywords in this connection, which have a decisive influence. Agrob Buchtal is aware of its responsibility with regard to sustainable building and supports not only the idea of sustainable building by its membership in the German association for sustainable building (Deutsche Gesellschaft für Nachhaltiges Bauen (DGNB)). Our industry has decided early - in the scope of an ecological product declaration according to ISO 14025 - to make all ecological product data important for the planning process of a sustainable building transparent. In this connection, for example, energy recovery at the production as well as the processing and recycling of waste materials also play an important part.

We are on site.

Produced in Germany
and available world-wide.

Modular color systems

Modular color systems are designed for complex requirements in all areas of architectural ceramics. The new Area Pro series is a real all-rounder with its extensive product range of tiles and accessories. It combines sophisticated design with high functionality and thus offers well thought-out solutions for the most diverse areas of application. As a perfect synthesis of function and aesthetics, Emotion supports consistent room concepts for functional and representative areas. With 50 colors matched to one another and a wide variety of formats, Chroma and Plural promote the varied, room-spanning design of wall and floor surfaces. Fresh and Loop offer particularly exciting colors and formats in the mosaic sector.

Area Pro: naturally intuitive

Good design always conveys an intuitive approach to its use – and thus, designing with Area Pro is also easy. With its earthy shades and pleasant haptics, the wide range of products immediately inspires ideas for their use. The series inspired by fine-grained, layered limestone blends in effortlessly and stands out at the same time. This makes the tiles and their accessories perfect all-rounders in almost every ambience. The series already exudes the potential to become a classic.

Chroma: the color concept: mixing and combining

When it comes to color design in the pool area, blue is usually the color of choice. However, Chroma also offers warm and neutral shades from the color system inspired by nature – for classics rich in variation, individual accents and a holistic look.

The color scales are divided into six groups: warm, earthy, cool, fresh and sunny shades move around a group of muted, neutral grey shades. Each group contains colors which can be easily combined, both within the group and with other groups. In this way, a consistent and uniform design can always be created.

Plural: colorful and flexible

The color range specially developed for Plural comprises 50 colors matched to one another. Whether glazed or unglazed, earthenware, stoneware or porcelain stoneware – the narrow 3 mm joint is just as standard with Plural as the pollutant-reducing Hytect coating and the design in various slip-resistance classes. Thus, Plural can be used in many indoor and outdoor areas: from the facade to the floor, from the underground station to the wellness landscape.

Emotion: modular and timeless

With colors and surfaces matched to one another, slip-resistant tiles from R9 to R12V4 and formats from 30 x 30 to 60 x 60 cm, the tiles of the Emotion series offer architects a great deal of freedom. Emotion ensures good design particularly in areas where transitions between different slip-resistance requirements are needed. This makes front cooking in direct view of restaurant guests just as feasible as the seamless and aesthetically pleasing combination of workshop and showroom in a car dealership.

Fresh: fresh and modern

Fresh offers a harmonious range of modern, fresh colors in the popular mosaic formats of 2.5 x 2.5 cm and 5 x 5 cm, allowing for unique yet easily achievable designs. A particularly practical feature: The tiles come with color-coordinated, slip-resistant mosaics in R10/B and R11/C.

Color gradients accentuate selected areas, liven up the overall aesthetic and stage artistic interplays with homogeneous tiled surfaces. When used as cladding for individual elements such as columns, partition walls or bar counters, they bring their own rhythm to the room.

Loop: fine and round

The secret of the depth, luminosity and durability of the colors is the glaze. Up to ten layers are applied to the stoneware and fired in to make them abrasion-proof. We create the glazes ourselves – with selected raw materials. This is how mosaics of radiant, lasting beauty are created.

Loop offers a wide spectrum of intensive and muted color shades ranging from blues and greens to bold yellows, oranges, and reds, as well as gray and brown tones, all the way to deep black. Delicate transparency for lightness and timelessness, luminous richness for accent and expression.

Innovative.

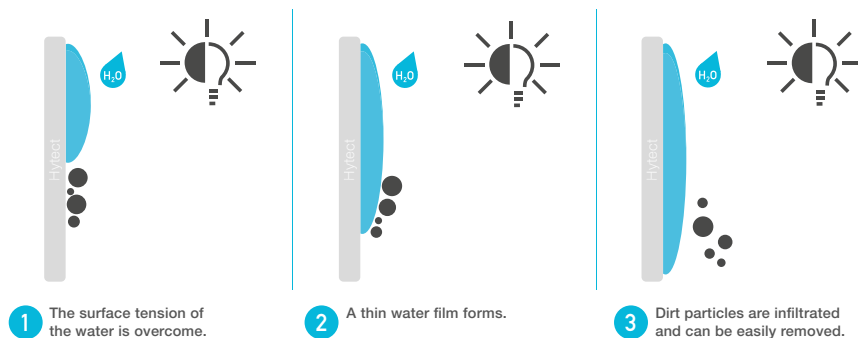

Hytect – the air is clean

The Hytect technology is securely baked into the ceramic surface at high temperatures. When light falls on the tiles coated in this way, active oxygen is released through photocatalysis. This process effectively combats bacteria and mould. At the same time, Hytect tiles naturally eutralize air pollutants.

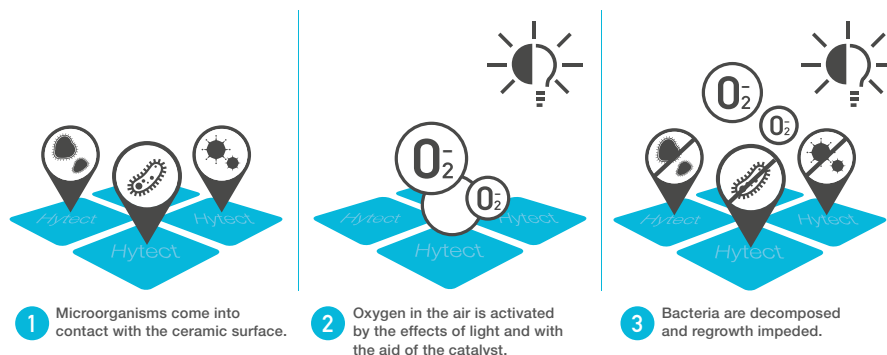

And because they are also hydrophilic, dirt and grease hardly adhere to them. All these effects remain unchanged over the entire service life of the tiles. And thanks to a wide range of products, Hytect ceramics can be used in a wide variety of areas. Our products refined with our Hytect technology are marked with the Hytect logo.

The effects

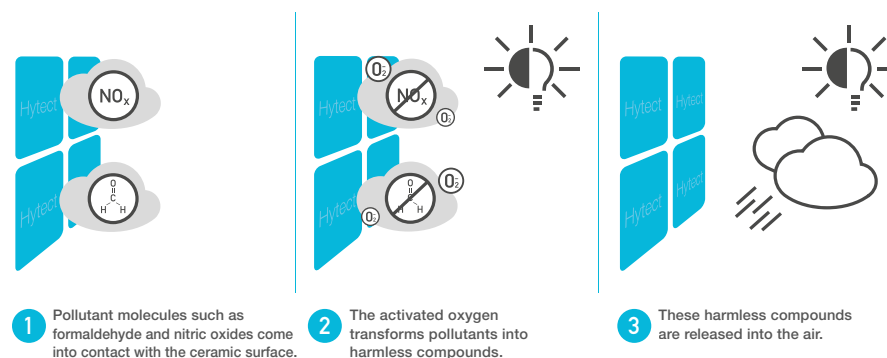

Extremely easy to clean

Effective against fungi and bacteria

Active elimination of air pollutants

Slip-resistant tiles for all areas of application

Slips, trips, and missteps are the primary cause of accidents in most companies and facilities. Slip-resistant tiles, marked with the GRIP quality seal, are one of our core competences. Since the introduction of the first slip-resistant tiles in the 1930s, we have continuously further developed this innovation through intensive research.

The results include prestigious awards for outstandingly designed surfaces, functional advancements such as quiet and vibration-free movement, and micro-rough special glazes for barefoot areas in swimming pools. The quality of our slip-resistant tiles is ensured through continuous internal laboratory testing and regularly and independently monitored by external institutes and participation in inter-laboratory comparisons with accredited test laboratories.

The latest innovation in slip-resistant tiles: R12V4

In collaboration with the German designer Sebastian Herkner, a special anti-slip surface was developed for Area Pro. Sebastian Herkner was looking for a pattern that appears spontaneous while still maintaining a certain logic. This is how he came up with the repeating, trapezoidal rectangles and the pattern that can be continued in all four directions. Area Pro is available with various slip-resistant surfaces, including Grid, with a slip resistance of R12V4. None of the slip-resistant surfaces compromise the aesthetics of the tiles. They are also available for large-format tiles, which, due to their properties, can also be used in commercial kitchens.

Functionality and beauty combined:
the R12V4 surface of the Area Pro series.

Designer Sebastian Herkner develops the
slip-resistant surface "Grid".

The design of Grid.

The in-house planning department

Efficient support for seven decades

At Agrob Buchtal, high-quality products and expert services go hand in hand. In this way, planners and architects who use our products have had access to our proven architect service since 1952, fostering a collaborative partnership.

A dedicated team of qualified technicians, engineers, architects, designers and color experts ensures swift and seamless realization of individual concepts. Since these experts are not only specialized advisers but also carry out numerous routine tasks, Agrob Buchtal customers can completely concentrate on the realization of their creative ideas. The range of services includes installation plans, quantity calculations, tender specifications, and project-specific technical consulting. Upon request, an on-site contact person is available.

Individual production

for special requirements

More than standard solutions

Creative architects and planners need unlimited design freedom to bring their ideas to life..

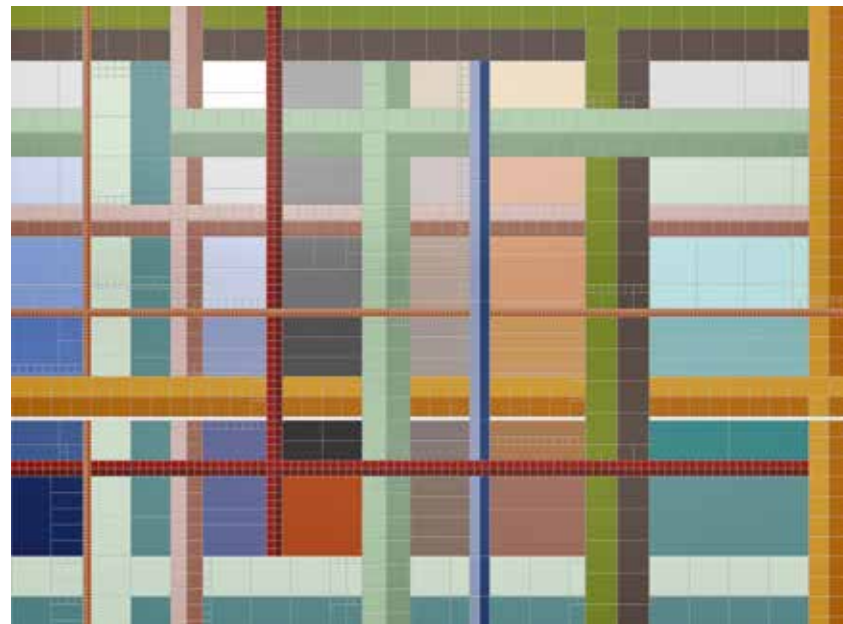

Special colors

Chosen individually or custom-created from nearly 20,000 glaze recipes in any desired shade. This also applies to Corporate Colors that match a company's corporate design (CD).

Water-jet cutting technique

it allows for the precise shaping of ceramic tiles, including curved forms, which can be assembled according to design specifications.

Special formats

These are in demand for both high-end new constructions and the renovation of historic buildings and are manufactured exactly according to the specifications of the architects.

Mosaic Designer

Free your mind

With the mosaic planning tool, Agrob Buchtal expands the horizon for architects and interior designers with an unlimited range of solutions in terms of form, color and size. The digital service provides scope for new ideas and impresses with its excellent user experience thanks to its intuitive, almost playful usability. A tool with which Agrob Buchtal is revolutionizing the ancient art of mosaics and breathing new life into it.

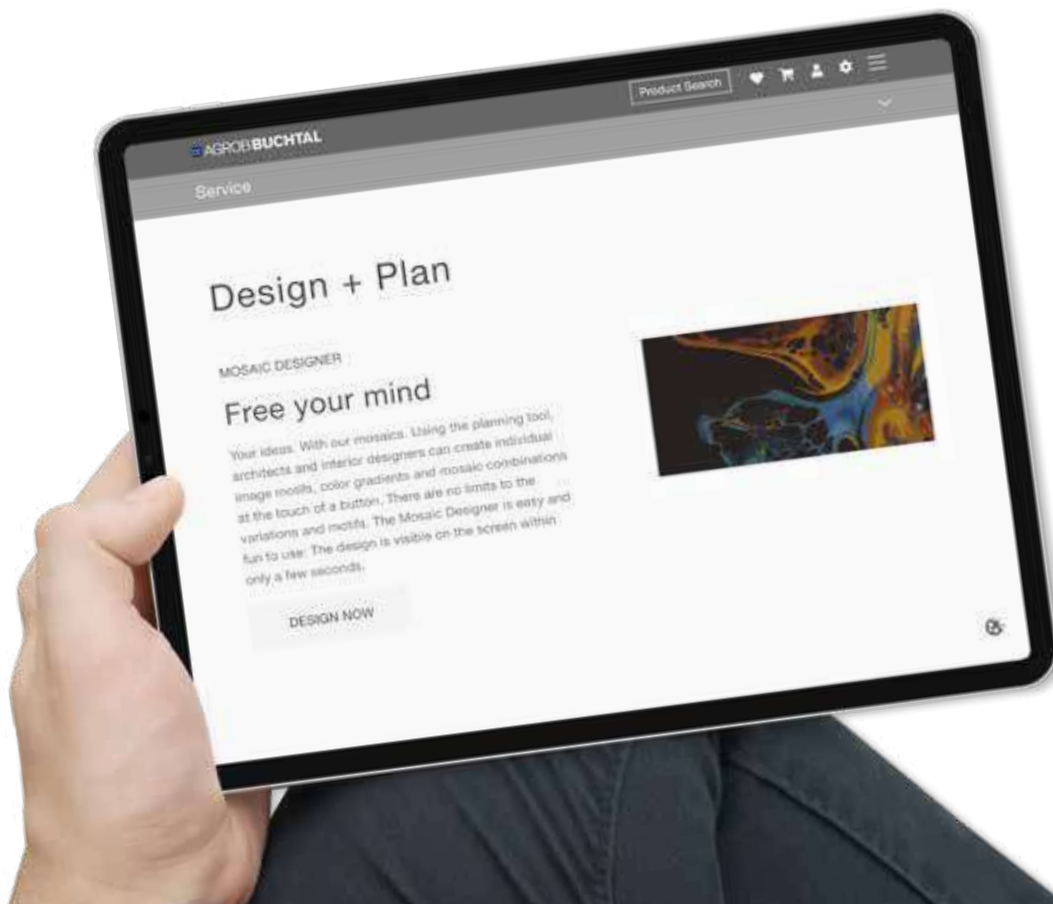

By entering the desired basic parameters such as the dimensions of the mosaic surface, selection of product series, tile format and joint color, individual color gradients or color blends can be generated automatically. Depending on the size, the desired design is generated and visualized on the screen in the shortest possible time.

Many small tiles are required for an area of 3 x 6 metres, for example. They are digitally arranged and designed in a flash. There is no size limits which makes the Mosaic Designer

from Agrob Buchtal a creative accelerator, especially for the design of swimming pools and wellness facilities, restaurants, hotels, schools and public spaces, including underground stations.

There is a choice of the three mosaic series Loop, Fresh and Plural, which are ideal as pure color system series without surfaces such as wood, concrete, marble or the like and offer a wide spectrum of tonal values for the design. Each design can be saved as a project or sent immediately to Agrob Buchtal as an inquiry.

In addition to graphic gradients and color mixtures, the Mosaic Designer can also implement individual motifs. Images and photos can be directly uploaded using the upload function.

directly to the Mosaic Designer

We develop product solutions for all areas of application

Retail

Brands and shopkeepers want settings which underline their values and offer the consumers a positive shopping experience. In areas where brand worlds are to be authentically represented, we turn the spotlight on the individual special production. That includes special colors for a consistent Corporate Design, special formats, digital prints or water-jet cuts. Retail concepts require high-quality materials which are robust and can withstand heavy loads, such as, for example, our extra thick tiles.

Authentic brand worlds

Extra thick tiles

Hotel + Gastronomy

Hotels are temporary homes. An all-round successful interior design contributes to making guests feel at home. Authentic materials which create atmosphere and highlight the special charm of the place are in demand. Tiles have been a popular and versatile means of design in architecture for centuries. High-quality ceramics is robust, resistant to wear, color-fast, easy to clean and therefore economical.

Colorful tiles as a design statement

Mosaics for wellness areas

Health + Care

In health and care facilities, the well-being of patients is paramount – whether in patient rooms, operating theatres, treatment rooms, large kitchens, laboratories or therapy baths. The standards of hygiene, cleanliness and accessibility are very high. At the same time, operators want sophisticated interior design with a calming and friendly atmosphere. This positively impacts patients' well-being and supports their recovery. We also provide tailored solutions to meet the unique requirements of health care facilities: Ceramics with a specialized glaze reduce disruptive reflections—ideal for operating rooms and areas where laser technology is used. Special solutions for therapy pools combine functionality with beautiful design.

Therapy areas

Ceramics against germs

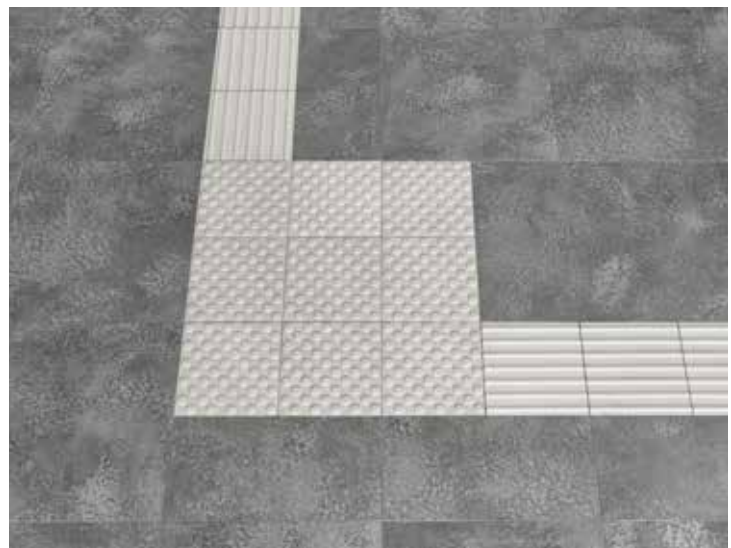

Education

Schools, kindergartens, and universities are places of education, just like political, artistic, or musical institutions. An attractively designed environment increases the willingness to learn and has an inspiring effect. And when people feel comfortable, they like to come back. Color is an important element for giving rooms atmosphere and expression. In combination with material and texture, a positive, stimulating environment is created in day-care centres or primary schools, for example. The depth of color, brilliance and expressiveness of ceramics are long-lasting. High-quality ceramics withstands the demands of constant public traffic for decades.

Modular color systems

Orientation aid for the blind

Industry + Infrastructure

The planning and execution of infrastructure buildings are challenging. Buildings such as railway stations, underground stations, tunnels, or airports should be multifunctional, visually appealing, and integrate seamlessly into the cityscape. Thousands of people come together in these areas every day. High-traffic areas require slip-resistant, durable, low-maintenance building materials, as well as easy-to-clean surfaces. This is where the Hytect tile comes in useful. The patented surface coating activates a natural process that purifies the air and neutralizes nitrogen oxides and odours. Unwanted graffiti is also demonstrably easy to remove. Special products, such as orientation aids for the blind, ensure accessibility and support barrier-free design.

Pool + Spa

The conception of contemporary pool architecture is complex and must meet high demands. And not only in terms of design: whether sports, leisure and adventure pools, therapy pools, private and hotel pools, sports and competition pools – they all have to be safe, easy to clean and inexpensive to maintain. Tiles meet these functional requirements: for example, with slip-resistant special surfaces ensuring a safe foothold even when wet. Modularly combinable tiles and special pieces are important for a consistent design from the pool and pool surround to all adjacent areas such as showers, saunas, changing rooms or restaurants.

Further information on the products can be found in the Pool + Spa programme of delivery.

Consistent design in all pool areas

Color gradients

Indoors and outdoors

Facade

The facade is more than a protective outer shell. It covers the building like a dress. Its design not only shapes the building itself, but also often has a visible effect on the urban environment. As a building material which has been tried and tested for thousands of years, ceramics also has ideal properties for the facade. It is non-combustible, resistant to chemicals, light-fast, pressure-, impact- and scratch-resistant. In addition, it is biologically safe for buildings, offers an unlimited service life, and is fully recyclable. Design possibilities emerge from the interplay of color, surface, format, and shape in all variations: bold, vibrant tones or subdued monochromatic shades. Glazed, unglazed, matt or glossy surfaces. Large-size panels, narrow oblong formats or mosaics for organic shapes. Three-dimensional shapes, baguettes or tubes.

Living

Wall and floor coverings significantly characterize the overall impression of rooms. When planning contemporary bathrooms and living spaces, design usually is the top priority when it comes to choosing wall and floor coverings. At the same time, the materials used to furnish the home office or dining room, hallway, living room or bathroom should also be hard-wearing and durable. It is important to create living comfort without compromises, ecologically sustainable, easy to clean and barrier-free. We offer products which meet these requirements and create smart additional benefits with the advantages of the antibacterial Hytect surface. From the mosaic up to large formats.

[illegible]

[illegible]

A musical score for a single melodic line on a grand staff. The staff consists of five lines. The melody is written in a single voice, starting on the second line from the bottom, moving up and down with various intervals, and ending on the second line from the bottom. The notes are represented by black dots.

Series from A to Z

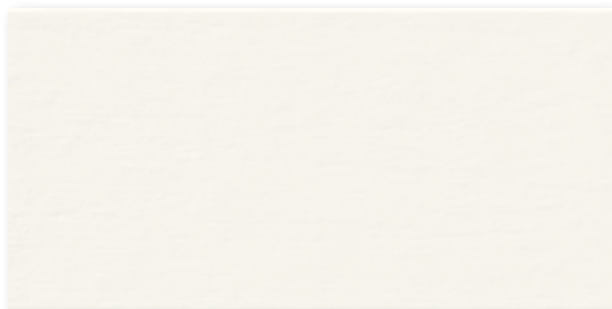

Warm and natural

With its naturally textured surfaces, Alcina offers an elegant range of earthy and warm shades for walls and floors in living and wet areas. Alcina can easily be combined with a variety of living styles. The delicately colored wall tiles feature a Hytect surface. Floor tiles in various colors and formats create bold or subtle contrasts. The Sola décor adds stylish variety across all floor colors. This extensive tile range is complemented by matching skirtings, non-slip 5 x 5 cm mosaics, and patio tiles.

⁵ On request, other special pieces can be produced: see overview of special pieces on page 79.

Deeply impressive and lively

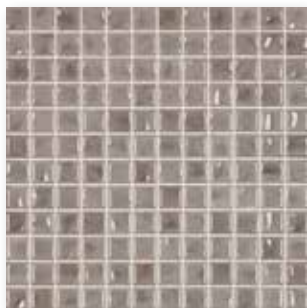

Inspired by the movement of water, Amano features a finely textured relief surface. In combination with blurred glazes, Amano creates watercolor-like effects, adding natural charm and exclusive liveliness to the series. When light refracts on its glossy surface, Amano captivates with sparkling reflections.

Area Pro comes naturally

Like the best design objects that intuitively reveal their use, the Area Pro series feels natural and easy to work with. With its earthy colors and pleasant tactility, the wide range of ceramic products offered by Area Pro immediately spurs ideas on how to use them. The Area Pro series, which is inspired by fine-grained, layered limestone, seamlessly blends in while standing out. This makes these tiles and accessories reliable versatile all-rounders in nearly any setting. The series already exudes the potential

Rendering

to become a classic. Area Pro is the ceramic equivalent of the little black dress or a classic white shirt. Whether in office buildings, residential buildings or leisure facilities — like the fashion classics, the series is convincing in any environment and is thus a true all-rounder. All tiles can be installed in any direction. In addition, they impress with their versatility and a variety of formats and color shades. All Area Pro colors are coordinated with the Chroma and Plural series by Agrob Buchtal, allowing for diverse combinations. In addition, customized projects are also possible with this series.

Grid

In order to live up to its own claim of combining high functionality with sophisticated design, Agrob Buchtal engaged design shooting star Sebastian Herkner, who normally works for brands such as Thonet, Ligne Roset or Moroso. He created a completely new design for the surface of the highest slip-resistance class. The result: "the Grid".

Smart features

Always perfect grip

Area Pro is available with diverse slip-resistant surfaces, including Grid with a slip resistance of R12V4.

Sustainable, thin wall tiles

6 mm thin wall tiles require less material, reducing energy consumption during production and transport, as well as lowering weight.

Decorated cove skirtings

Our integrally colored and therefore color-fast cove skirtings facilitate cleaning and hygiene thanks to the gently rounded, seamless transition between floor and wall. This prevents the accumulation of dirt and moisture in corners.

Hytect hygienic surface

Area Pro tiles are provided with the sustainable Hytect surface, which makes them extremely easy to clean. In addition, Hytect protects ceramic tiles against bacteria and mould and neutralizes air pollutants and unpleasant odours.

Ceramic channel cover

For tiles laid around the pool in swimming baths, Agrob Buchtal offers the appropriate termination which ensures visual continuity: a channel cover with water jet cut openings.

Large formats

Large-size tiles such as 120 x 120 cm create a particularly calm, modern and generous room appearance, as they require significantly fewer joints. In addition, large tiles make even small rooms appear more spacious and elegant.

Other versions regarding edge formation and/or formats possible on request.

Minimum order quantity: 10 linear metres per order (division into several articles possible), smaller quantities after separate price calculation.

Experience diversity

Ascona is made for spas, wellness areas and swimming pools in hotels, but also for private homes. This stems from the versatility of the series. Visually, the series offers mosaics and oblong formats, small and large sizes for walls and floors, and a refined selection of colors, providing a wide range of design possibilities. The series also stands out for its functional versatility and technical solutions, making it ideal for all swimming pool areas or spas—both indoors and outdoors, in entrance areas, and spaces where visitors walk barefoot or in dedicated wet areas. With its clean lines and grounded colors, a wide variety of style worlds can be created. The series accommodates both minimalist architecture and classic or modern country house designs. The Ascona series can be perfectly combined with our mosaic series Marble & More.

¹⁰ Color deviations compared to the adjoining covering due to production are no reason for complaint in case of horizontal laying.

Timeless and simple

The timeless color palette and formats, ranging from 5 x 5 cm to 35 x 100 cm, offer economical solutions for various areas. The Basis Pro series enhances the existing collection by adding a selection of porcelain stoneware floor tiles with a contemporary and durable design. Additional features include high slip resistances ranging from R10/A to R13V10, as well as shower tub systems, stair tiles, and special pieces to complete the range.

Functional and versatile

Basis Pro enhances the established Basis programme by introducing porcelain stoneware products in contemporary and durable design. Basis Pro is a compact selection of floor tiles in classic formats, timeless basic colors and a range of slip-resistance categories tailored to the solid project sector. The series offers functional, ceramic solutions for public buildings and residential construction.

³ Short edges rectified

Inspired by wood

With its subtle evocation of wood surfaces, Cedra is the perfect choice for a homely bathroom design. The two wall tile colors available in two formats can be harmoniously combined with the borders. These borders, available with or without porcelain stoneware inserts, create visual accents and echo the three classic colors of the floor tiles. Particularly practical: in addition to the floor tile, the shower area can be continued with a matching mosaic in R10/B. Thanks to their Hytect surface, the wall tiles are especially easy to clean.

⁵ Glass fibre net on reverse side

⁶ Decoration elements only available in full boxes.

In its element: Chroma

Especially under water, ceramics face significant architectural demands. Chroma consolidates extensive expertise in swimming pool construction in a product series specially designed for underwater use for architects and planners. The standard joint width of 6 mm, which is widely used above all in pool construction, is used.

Stability in the pool: 6 mm joint

Physical stresses create high loads in the pool area, which make a specific joint width advisable. Installing the tiles with a 6 mm joint ensures maximum safety.

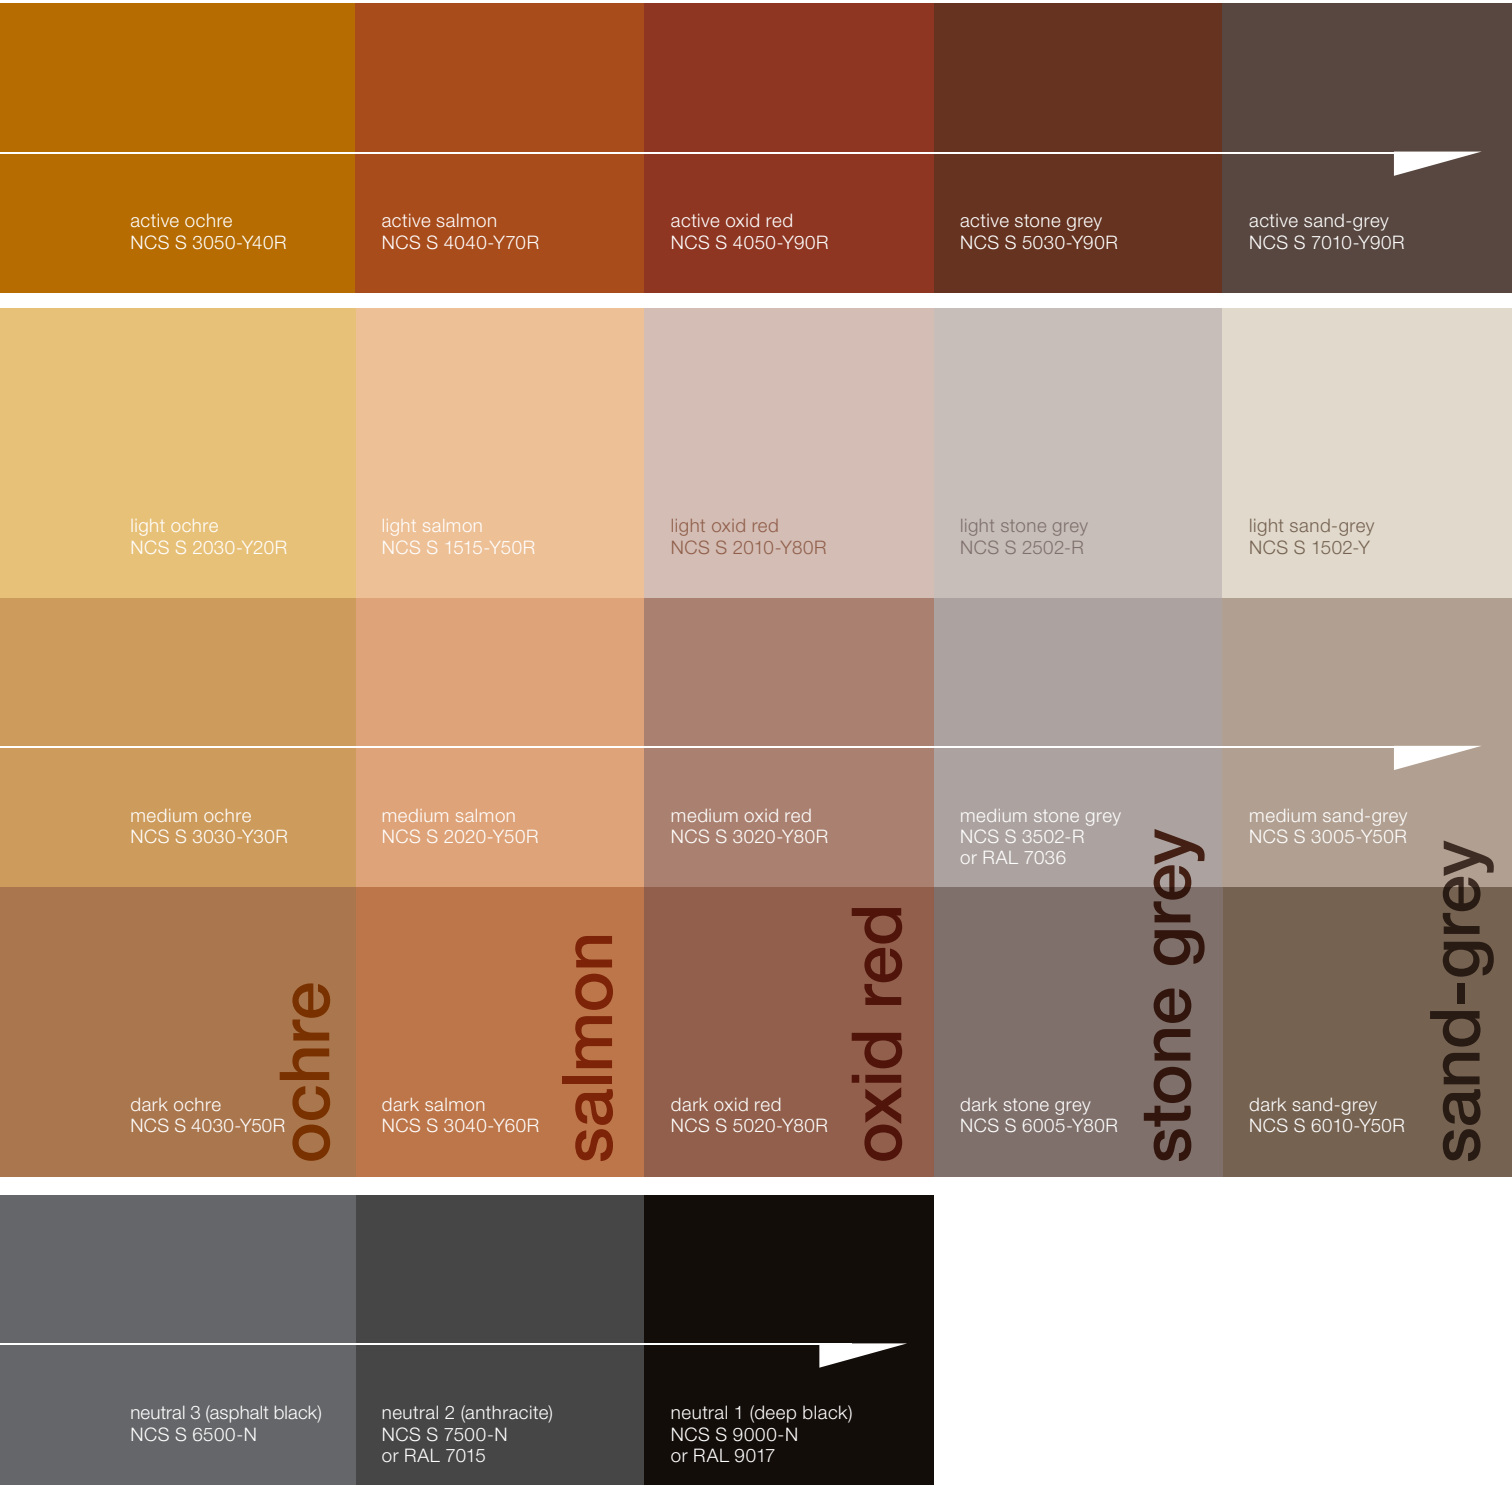

Safety without compromises

Accident prevention has the highest priority in every swimming pool – especially in areas with a particularly high risk of slipping, such as stairs leading into the water or walk-through pools. That is why Chroma also offers the slip-resistance classes of category "C". In this way, the highest design and safety requirements can be implemented uniformly and without compromise.

³ Overglazed edges / corners, see below

⁴ Supplied as double-tiles; to be broken by customer.

⁵ without Hytect coating

⁶ Exception: contrasting colors black, orange, lemon-yellow, contrasting red, intense blue, apple-green, violet: smooth, glossy

Overglazed edges available on request:				
Replace last figure 0 of Standard model no. by ...	... 3 = Corner left	... 4 = Corner right	overglazed edges	Example: Standard model no. 18120 = 119 x 244 x 6 mm, model no. 18123 = overglazed corner left

² Especially suitable for non-slip and clearly visible (stair) edge design.

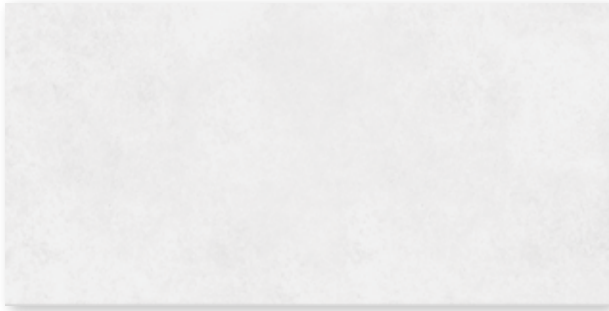

Harmonious feeling of homeliness

With its wall tiles in the colors silver-grey and sand-beige, the series Concrete creates a natural and harmonious living atmosphere. Eye-catching accents can be set with the Screen and Stripes mosaic tiles in graphite and sand-beige along with the matching borders. The wall tiles are easy to clean thanks to their Hytect surface.

Inspiring and modern

The heritage hype in fashion, lifestyle and technology which has been going on for years has also left its mark on tiles. Craft evokes familiarity while appearing surprisingly modern. Equally suited for indoor and outdoor use, the series owes its handcrafted character to the depth and transparency of its high-gloss glaze. Compositions of alkaline earths, fluxes, and metal oxides interacting with the clay body create particularly luminous, intense colors and typical surface structures when the tiles are fired openly.

hematite black 							

² Supplied as double-tiles; to be broken by customer.³ Minimum order quantity: 250 m²⁴ The format 2821 is produced with a glued edge. The price is calculated project-specifically.⁵ For format 2270: Due to manufacturing reasons, right and left overglazed short edges are generated at a ratio of 1:1 in the case of this article, which have to be purchased by the customer. Only one longitudinal edge can be glazed.

For the series Craft:

Minimum order quantity in the case of special colors: 500 m²

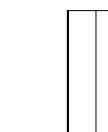

Price for lower quantities on request.

The customer agrees to purchase a possible overproduction of 10 %.

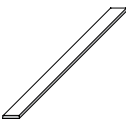

Overglazed edge(s) possible up to max. 25 % of the order quantity.

A separate order is necessary.

Familiar. Versatile. Authentic.

Discover reinterprets concrete: a subtle collage of fine streaks, shades and grains creates a harmonious, lively surface pattern. Smooth and relief surfaces combine naturalness with modern clarity - for rooms which appear familiar and individual at the same time.

¹ High weight only to carry with two persons.

² Important: special pallet, no return, no exchange.

³ On request, other stair tiles/stair safety borders can be produced: see stair matrix on page 36.

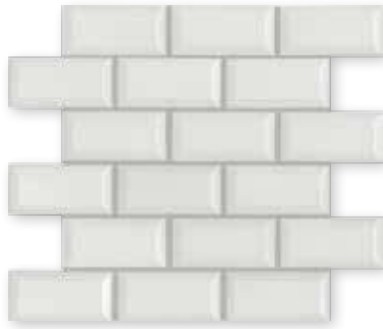

Urban and stylish

Faceted tiles like District are very trendy at the moment. Whether in kitchens, bathrooms, shops or living areas – they create a noble, minimalist or stylish look, depending on the color and area of application. With District, there are eight trendy colors to choose from. All are available in the formats of 5 x 10 cm and 10 x 25 cm. Thanks to the thermoplastic glueing on the back in the case of the 5 x 10 cm format, they are particularly easy to lay as sheets in addition.

Conductive floor coverings

These two specific solutions – as a stoneware tile (Eladuct) on the one hand and as a ceramic large-size panel in model size 60 x 60 cm on the other (ELA 10.6) – are suitable for use in those areas where electrostatic charge requires a conductive floor covering or where the latter is recommended. The special laying instructions must be followed carefully. We shall be delighted to advise you and to give you assistance for individual applications.

Sectional Drawing

* Number and arrangement depending on the technical requirements.
Connection only by an electrical specialist in line with the relevant guidelines.

Conductive Floor Coverings

These two specific solutions - as a stoneware tile/porcelain stoneware tile (Eladuct) on the one hand and as a ceramic large-size panel in model size 60 x 60 cm on the other (ELA 10.6) - are suitable for use in those areas where electrostatic charge requires a conductive floor covering or where the latter is recommended. The special laying instructions must be followed carefully. We shall be delighted to advise you and to give you assistance for individual applications.

Eladuct

is especially predestined for those areas where the discharge of static electricity is desired together with the advantages of an unglazed surface (high mechanical-chemical stress resistance).

Examples: gravure and flexographic printing areas, laboratories, rooms for lacquer production, processing and decanting, munitions dumps, chemical production plants etc.

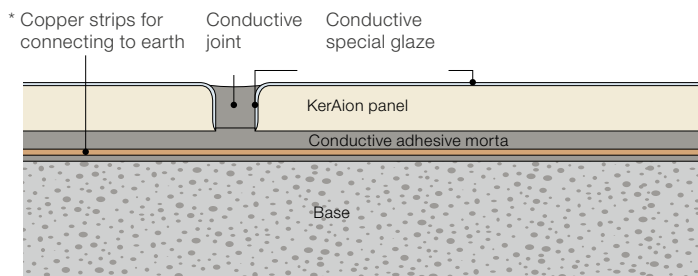

KerAion ELA 10.6

2401 RH - IV
grey glazed

(RH = non-slip version)

Sectional Drawing

* Number and arrangement depending on the technical requirements.
Connection only by an electrical specialist in line with the relevant guidelines.

In the case of ELA 10.6, static electricity is discharged via the four overglazed panel edges.

KerAion ELA 10.6

is recommended for those areas where the discharge of static electricity is desired and importance is attached to the advantages of a glazed surface (e.g. very easy to clean) and a generous, representative look.

Examples: office rooms, production rooms for electronic equipment, physical measuring and work rooms, laboratories, rooms for microchip and computer manufacture, medical areas (e.g. operating theatres), telecommunication workshops, sales areas for electronic equipment etc.

¹ Without Protecta upgrading

In the case of Eladuct, static electricity is discharged through the tile body.

The Eladuct series is classified as dissipative according to test standard EN 1081/Method A (electrical resistance between 106 ohms and 109 ohms) and is suitable for the production of electrostatically dissipative floors in accordance with TRBS 2153 (prevention of ignition hazards due to electrostatic charges). Specific values regarding the dissipative properties are available upon request in the form of a batch-related test certificate.

The 355s is defined by the contact resistance and not by the color. Color deviations must be accepted and are no reason for complaint.

In the case of KerAion ELA 10.6, static electricity is discharged via the four overglazed panel edges. Surface resistance according to Procedure C pursuant to DIN EN 1081: 106 Ohm.

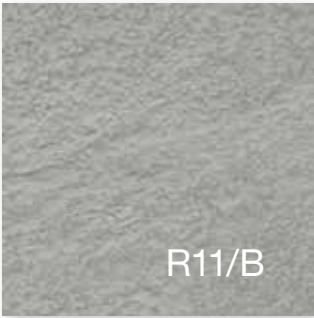

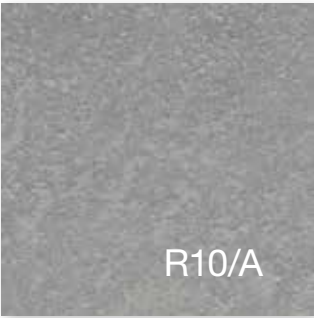

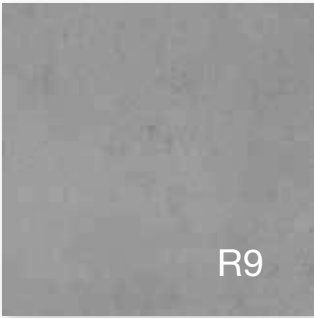

Modular and timeless

With colors and surfaces matched to one another, slip-resistant tiles from R9 to R12V4 and formats from 30 x 30 cm to 60 x 60 cm, the tiles of the Emotion series offer architects a great deal of freedom. Emotion ensures good design particularly in areas where transitions between different slip-resistance requirements are needed. This makes front cooking in direct view of restaurant guests just as feasible as the seamless and aesthetically pleasing combination of workshop and showroom in a car dealership.

¹

² Specification of the logistical data for single-row or double-row installation

³ Delivery time on request

⁴ For details, refer to page S. 516

⁵ Fitting to cove skirting 10 x 20 / 10 x 30 cm

⁶ Color deviations compared to the adjoining covering due to production are no reason for complaint in case of horizontal laying.

⁷ On request, other stair tiles/stair safety borders can be produced: see stair matrix on page 36.

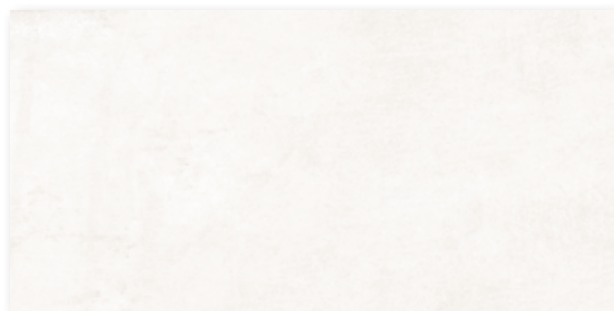

Authentic surface

The Factory series ceramically transforms lived-in concrete floors into a lively and uncomplicated covering. In combination with classic ornamental accents, the result is a series which combines the style worlds of Industrial & Modern Country in a cosy way. Color shades from both worlds round off the concept and cater to individual design preferences. Factory also includes Circle, a versatile decorative element for walls and floors, which sets accents without appearing fashionable or dominant. All products are Hytect-coated and therefore particularly easy to clean.

⁵ On request, other special pieces can be produced: see overview of special pieces on page 79.

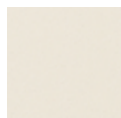

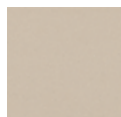

Innovative and robust

Specialists achieve more. This also applies to the ceramic floor tiles of the Ferrum series, which were specially developed for the tough requirements of industrial plants. The integrally colored, unglazed split tiles are particularly slip-resistant and thus prevent accidents at work. They are extremely robust and exceed the compressive strength of concrete or coating materials many times over. A technically sophisticated range of accessories, which includes cove skirtings and gutter tiles, facilitates the realization of company-specific complete solutions.

² Fitting insert for the outlet: Art. no. 182 - Programme of delivery Pool + Spa 2026
(installation prior to laying)

No pallet rebate is granted for the gutter tiles. Surface to be treated with a suitable impregnation agent! See page 507 in the Technical Information.

Fresh and modern

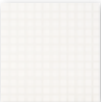

Fresh offers a harmonious range of modern, fresh colors in the popular mosaic formats of 2.5 x 2.5 cm and 5 x 5 cm, with which individual, but at the same time uncomplicated to realize designs are possible. A particularly practical advantage is that R10/B and R11/C slip-resistant mosaics in colors matching the tiles are available.

Homage to craftsmanship

The Karl collection interprets craftsmanship and original glazes in an exceptionally creative manner. Due to the type of glaze and the raw material recipe, different tile patterns are created each time during the firing process, which – laid as surface covering – radiate authentic and elementary appeal: symbolizing the simple life with the focus on the essential. The glazed variant is primarily recommended for wall design; the stone-matt version also for floors thanks to R10/B slip resistance. With the 2.5 x 2.5 cm variant, larger surfaces, columns or other structures can be designed particularly impressively. Like a tailor-made ceramic dress. The Stories series is recommended as suitable floor tile.

KerAion Special glazes for operating theatres

Ideal for wall coverings in rooms where lasers are used such as e.g. operating theatres. These products perfectly meet the requirements with regard to diffusely reflecting surfaces: incident laser beams are "split up", thus preventing uncontrolled reflection. This is confirmed by the expert opinion of the Laser Medical Centre Berlin and applies to the following types of lasers normally used in medical applications:

- Argon – a typical visible laser
- Nd:YAG – a typical laser in the close-infrared range
- Excimer – a typical UV-laser
- CO₂ – a typical laser in the mid-infrared range

Special advantage of the large model size of 60 x 60 cm: reduced number of joints, therefore easy to clean and hygienic. Perfect complement for the floor: the static electricity conducting panel ELA 10.6 (see page 177), also in model size 60 x 60 cm.

The panels of the series KerAion OP Special Glazes are also available in other sizes (up to the maximum edge length of 120 cm) and glazes. When required, please contact your advisor to customers.

The narrow joints, the large size and the Hytect coating effectively support easy cleaning and a high standard of hygiene.

Tiles for living spaces

Tiles for living spaces – private living, gastronomy & hotels or public buildings in which the focus is on well-being. Rooms in which one likes to spend time. LIKE is a tile collection that is made to create a perfect whole in combination with other materials. The look is discreetly lively – fine irregularities give the tiles their unmistakable character and bring out each of the 5 colors perfectly. Whether mosaic or large format, the LIKE series always unfolds its full charm – both in the room and on the terrace.

⁶ On request, other special pieces can be produced: see overview of special pieces on page 79.

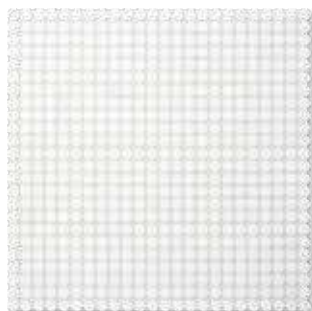

Fine and round

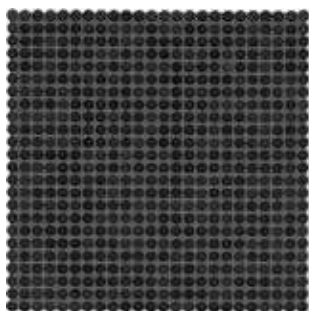

The perfect answer to the trend towards soft, rounded designs is the mosaic Loop. It is available in 15 finely nuanced, high-gloss colors, six of which are also available in a matt, slip-resistant version. This extends the range of applications to showers and other wet areas. In addition x+to the mosaic with a 2 cm diameter, a 1 cm variant is also available, which conveys a particularly filigree and elegant impression. In contrasting colors, it is also suitable for pictograms, letters, arrows and QR codes.

The products depicted can also be manufactured in other colors.
We would be delighted to examine the possibility of such customized production in individual cases.

Lintharena, Näfels, Switzerland / Architect: K & L Architekten AG, St. Gallen, Switzerland
 Series: Loop, special composition / Photo: Kim Britt Photography

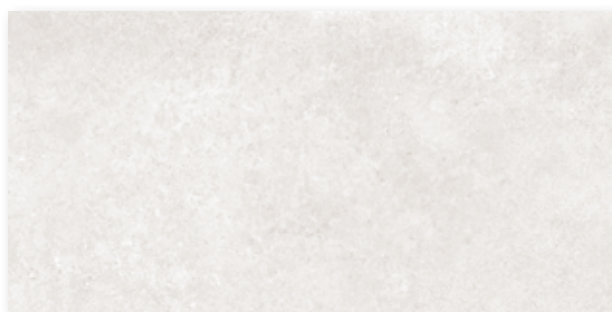

Natural design scope

Unique in its ceramic composition and with color nuances between anthracite and white, the series Lounge looks fantastic in any room. The Stone decor with its discreet marble and stone look is the highlight of every room design – on large or small surfaces. The colorful Garden decoration whisks us away to the exotic gardens of this world. All tiles are Hytect-coated and thus easy to clean.

Wall tile 30 x 90 cm, 12 x 36 in, grey white, structured

Decoration elements

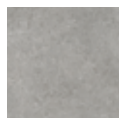

Decorative tile Garden 30 x 60 cm, 12 x 24 in, green mix, structured

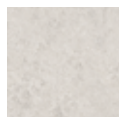

Decorative tile Stone 30 x 90 cm, 12 x 36 in, grey mix, structured

The decoration you have chosen is a high-quality product made of glazed earthenware. The decoration consists of different individual pictures. The connections of the individual pictures are deliberately designed freely and thus do not connect in the continuous laying. The composition of the motifs in the box may vary due to production reasons.

¹ without Hytect coating; with Protecta upgrading
³ High weight only to carry with two persons.
⁴ Important: special pallet, no return, no exchange.
⁵ Glass fibre net on reverse side

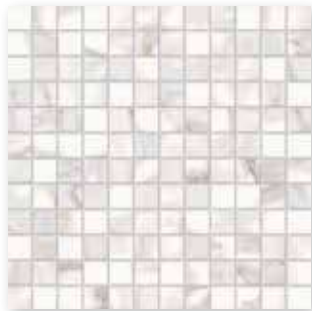

Possibilities rich in detail

While marble is usually used in large formats, the Marble & More mosaic series captivates with its almost small-scale aesthetics and varied colorfulness. Unlike its natural marble counterpart, this tile is insensitive to aggressive media such as cleaning agents, shampoos and soaps. Slip-resistant variants extend the laying freedom of planners and architects. As Hytect tiles, Marble & More are very easy to clean and they ensure hygiene. In addition, the series is color-coordinated with the Ascona series on the floor and wall.

Fine patterns, impressive effect

The designer Sebastian Herkner reinterprets classic patterns with Micro: whether lined, checked or in chessboard design, the fine micro patterns on a mineral-like base unfold a surprisingly soft, harmonious effect. Gentle contrasts, directionless structures and subtle color nuances combine naturalness with graphic precision - a play of calm and rhythm which lends every room a modern yet timeless atmosphere.

³ Color deviations compared to the adjoining covering due to production are no reason for complaint in case of horizontal laying.

⁴ On request, other stair tiles/stair safety borders can be produced: see stair matrix on page 36.

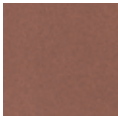

Every tile is unique

Natural Ceramics combines creative diversity and traditional craftsmanship in an authentic ceramic product. And as the material is absolutely frost-proof, a uniform, harmonious floor design of indoor and outdoor areas can be realized. The unique play of colors in warm earthy shades offers a great deal of comfort with maximum design freedom.

Nosing tiles 12.5 x 25 cm in the colors autumn leaves, portofino and colorado-brown can be produced with glued edge on request. The price is calculated project-specifically.

Endurance test: withstanding any pressure

Floors in supermarkets should be attractive, easy to clean and extremely robust. Agrob Buchtal meets these requirements with extra thick tiles in thicknesses of up to 14 mm. With breaking strength values which are considerably higher than required by the relevant standards, the rectified large formats also withstand the loads caused by driving forklift trucks and pallet trucks without any problems. At the same time, extreme robustness is combined with an attractive look: porcelain stoneware surfaces in a wide range of colors offer all the prerequisites for a representative design.

Nivella levelling mat 30 x 60 cm, 12 x 24 in

Nivella levelling mat

Nivella mats solve the problem of levelling height differences between mosaics (6.5 mm) and wall and floor tiles (8 mm). They therefore ensure a consistently even surface conveying a perfect sensation of space. Nivella is ideal for working with small-format tiles and suitable for use in both indoor and outdoor applications. Another advantage is of an acoustic nature: Nivella effectively minimizes any hollow-sounding effects. Cut to the required size, the mat is pressed fully into the tile adhesive.

Technical data

Fire class: B2

Load resistance: 2 kN/m² (category A1-B1)

Spot load for tiles in 1 x 1 cm format:

not greater than 0.25 kN/cm²(approx. 25 kg/cm²)

Special conditions for accessories

Levelling mat for commercial and private use in indoor and outdoor applications (walls / floors)

Eigenschaften:

- Levelling
- Especially under small-format coverings
- No hollow sound
- High tensile bond strength

Product description:

Nivella is a special levelling mat which is ideal for combining mosaics (6.5 mm) with the wall and floor tiles (8 mm). High tensile bond strength as well as bending, tensile and compressive strength are the distinctive performance features of this levelling mat.

Surfaces:

The surfaces on which Nivella is used must be examined for evenness, loadbearing capacity and surface strength. Differences in floor levels must be eliminated. Adhesion-inhibiting layers must be removed by grinding. Primers co-ordinated to the surface, grout and/or levelling layers must also be used.

Compensation filling and levelling – including for the adjacent coverings – must be performed prior to fitting the levelling mat. Surfaces which are sensitive to moisture must be protected by performing the appropriate sealing measures.

- Cement-based surfaces such as screed or concrete must be at least 28 days old; new screed up to 7 days after accessibility.
- Calcium sulphate screed with residual moisture < 1%
- Poured asphalt screed
- Magnesite/Stonewood screed
- Heated screed
- Dry screed
- Old, firm ceramic coverings
- Old natural stone coverings
- Plasterboard
- Fibre cement boards
- Plaster

Vertical payloads for ceilings to DIN 1055-3 (excerpt)				
Category	Application	Examples	Distributed load q _k (kN/m ²)	Point load Q _k (kN)
A1	Attics	Attic space to clear height of 1,8 m	1.0	1.0
A2	Residential and recreational applications	Rooms with sufficient lateral load distribution such as rooms and corridors in residential buildings, hotel rooms and hospital wards	1.5	–
A3		As for A2 but without sufficient lateral distribution	2.0	1.0
B1	Office and working areas	Corridors in office buildings, office space, doctors' surgeries, wards, recreational rooms incl. corridors, stables	2.0	2.0

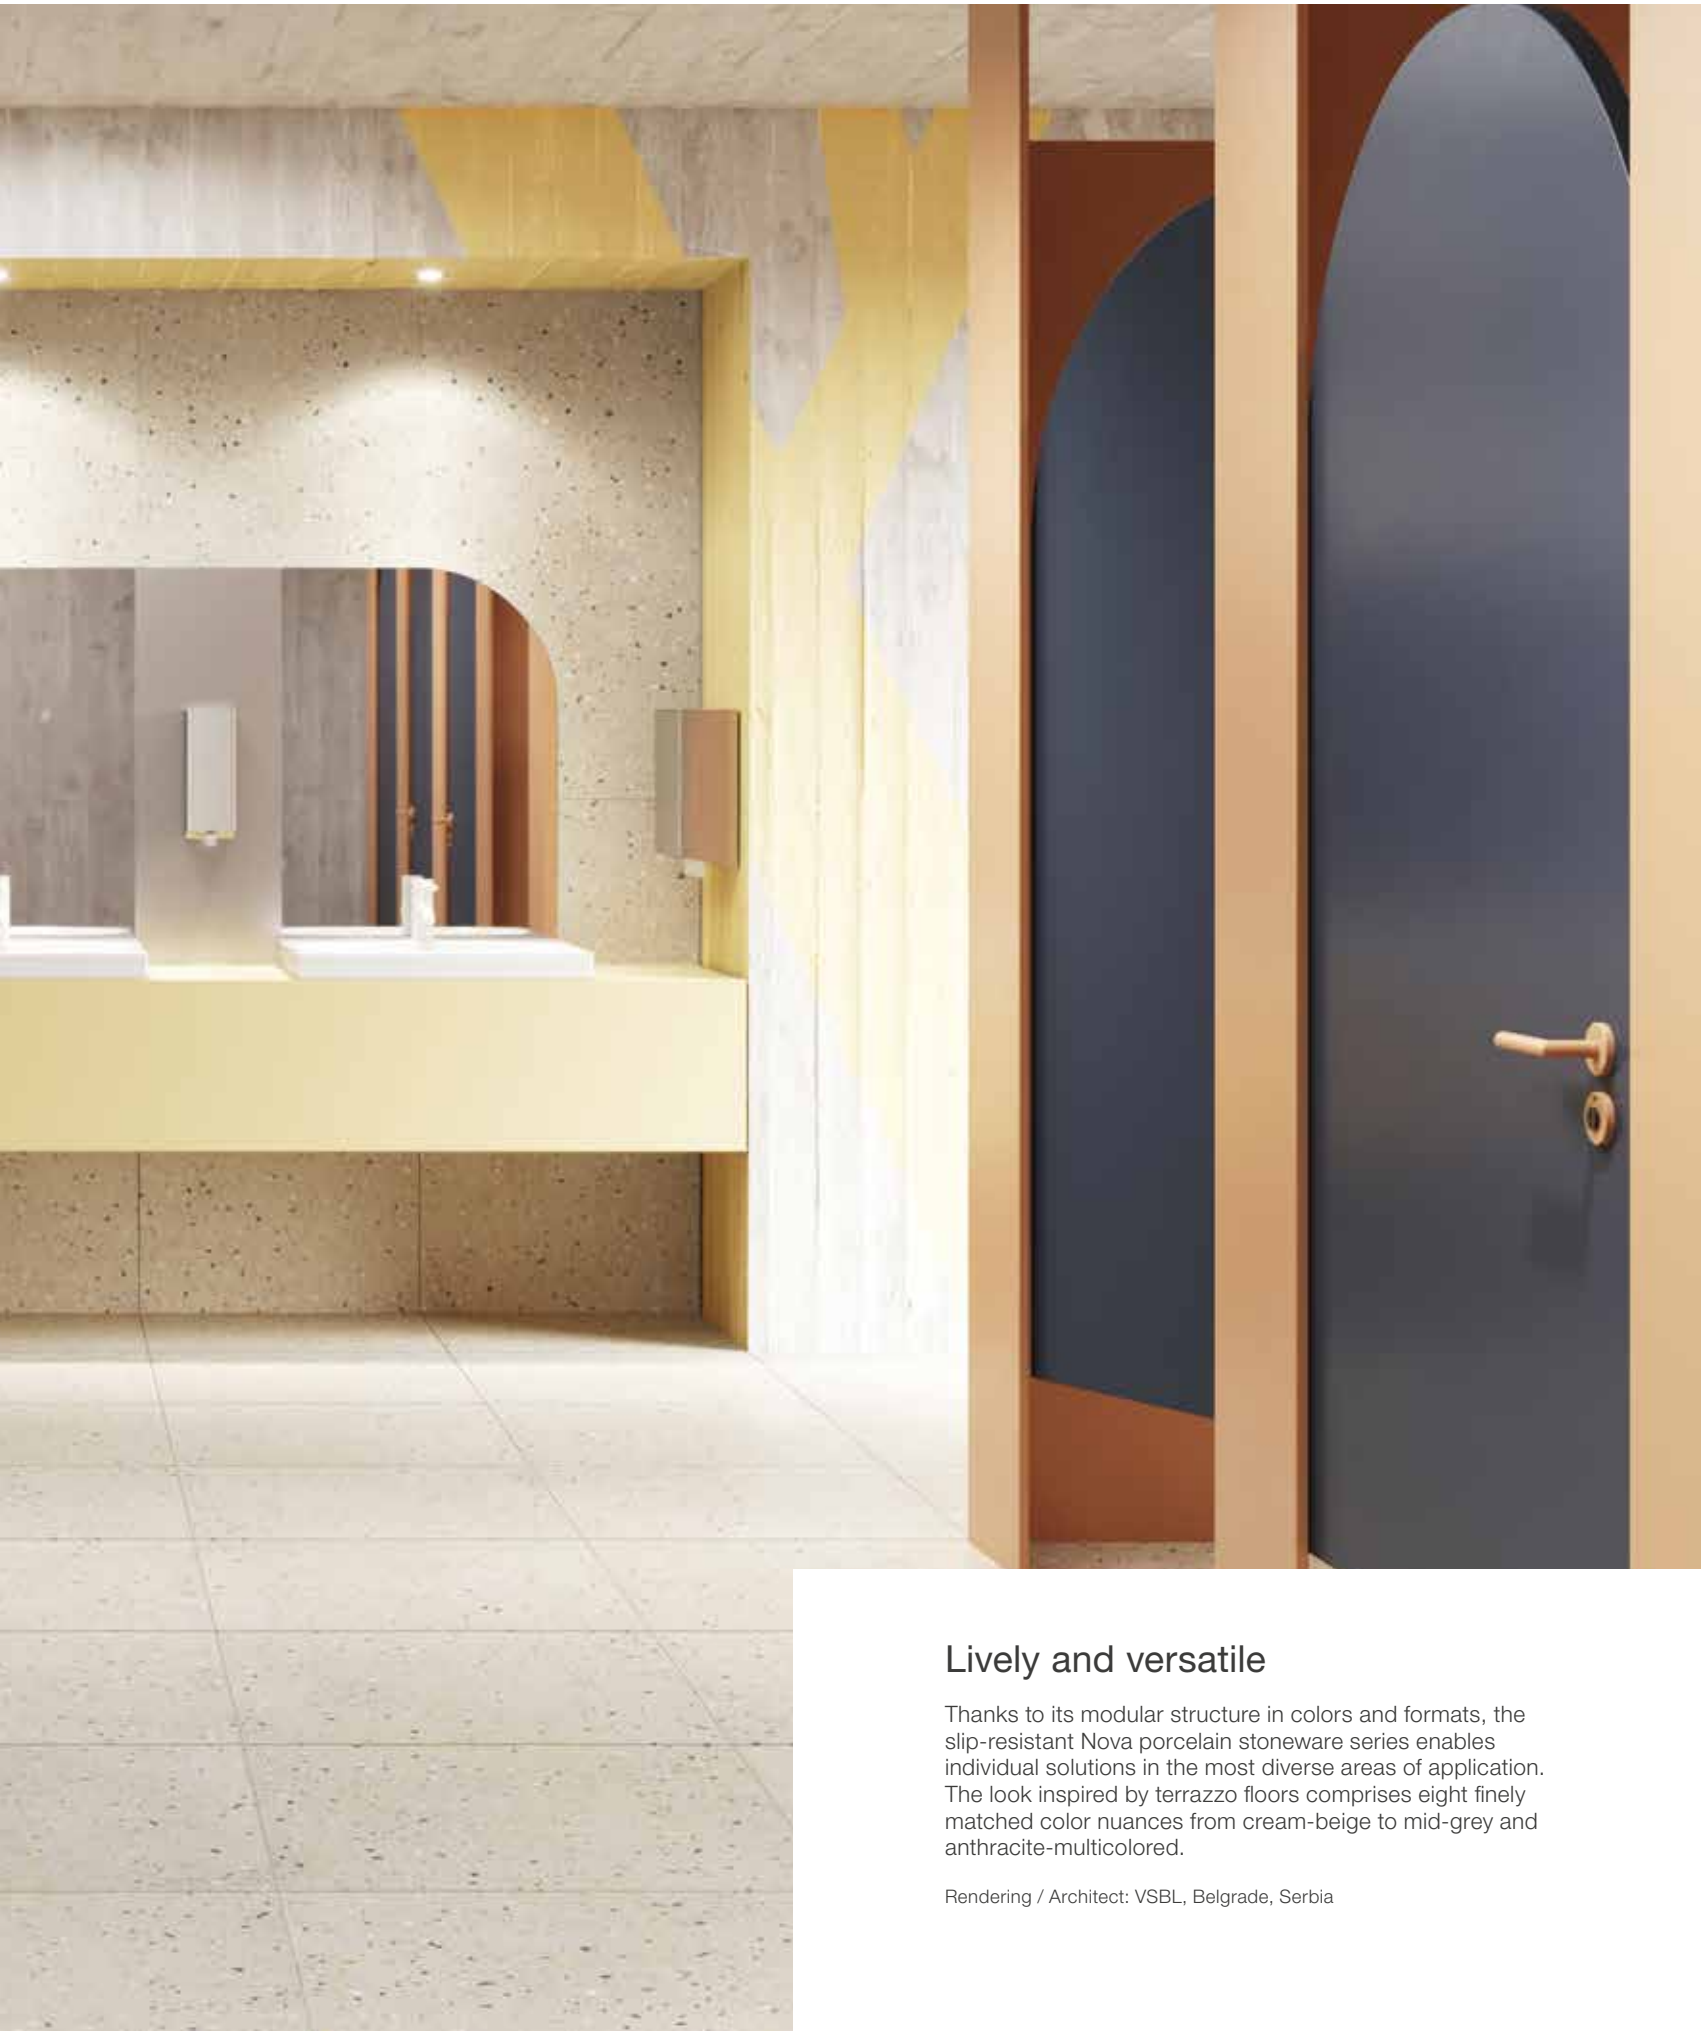

Installation:

Apply suitable tile adhesive to the prepared surface in accordance with DIN EN 12004 C2 and DIN EN 12002 S1. Nivella mats are cut to the required size, fully embedded in the adhesive and laid edge to edge. The tile adhesive is filled consistently in the grooves (mesh structure). The mesh cavities must be 100% filled. Using the corresponding toothed bar, comb out the adhesive and lay the mosaics. At the earliest after 24 hours, the areas are grouted using a polymer-modified mortar.

Attention:

The correct and therefore successful application of our products is beyond our control. A guarantee can therefore only be given for the quality of our products within the framework of our terms and conditions governing sale and delivery but not for successful installation thereof. We retain the right to modifications representing technical progress.

Lively and versatile

Thanks to its modular structure in colors and formats, the slip-resistant Nova porcelain stoneware series enables individual solutions in the most diverse areas of application. The look inspired by terrazzo floors comprises eight finely matched color nuances from cream-beige to mid-grey and anthracite-multicolored.

³ Rectified only on the two short sides. The long side can not be rectified.

⁴ For details, refer to page S. 518. For more solutions concerning stair design, refer to the series Area Pro.

⁵ Color deviations compared to the adjoining covering due to production are no reason for complaint in case of horizontal laying.

⁶ On request, other stair tiles/stair safety borders can be produced: see stair matrix on page 36.

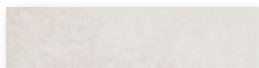

Sea of colors

The Ocean series offers a diverse color range for pools, spas and wellness areas, which reflects the element of water in all its vibrancy. Delicate cloud and fine-grained structures blend with the shimmer of the sun reflections. By means of digital printing and glaze pigments, iridescent colors such as crystal-clear green, caribbean turquoise or deep blue are created. The formats in oblong and mosaic look are suitable for atmospheric and functional pool designs and perfectly complement series such as ChromaPlural.

With a breath of nostalgia

Experiencing original ideas anew, playfully combining motifs indoors and outdoors: with additional patterns and individual decorative elements, the “vintage modular system” of the series Pattern provides an extensive range of products and perfectly fits into any living style. The Vanda decorative element offers a mix of 12 different floral and geometric motifs. The floral Isola decorative element and the geometric Baleno decorative element are ideal as individual motifs. Thanks to their delicate color compositions, each of the three decorative variants harmonizes with the basic tile in cement-grey. However, they can also be arranged to form larger motifs – or even a ceramic “carpet”.

Rendering / Architect: STELLWERK architekten, Dresden, Germany

Mosaic 2.5 x 2.5 cm, 1 x 1 in

A quotation from nature

For lovers of a natural look: the strikingly structured surface of the Pizarro series is reminiscent of slate – in a ceramic interpretation. The wall tiles in plain white and delicate grey are a perfect wall cladding for timeless bathrooms in a reduced ambience. For a rhythmic or accentuated look of the wall surface, elegant borders with metallic inlays are available.

Colorful and flexible

The color range specially developed for Plural comprises 50 colors matched to one another. Whether glazed or unglazed, earthenware, stoneware or porcelain stoneware – the narrow 3 mm joint is just as standard with Plural as the pollutant-reducing Hytect coating and the design in various slip-resistance classes. Thus, Plural can be used in many indoor and outdoor areas: from the facade to the floor, from the underground station to the wellness landscape.

Formats Stoneware

Mosaic 2.5 x 2.5 cm, 1 x 1 in

Mosaic sheet 30 x 30 cm, 12 x 12 in,
smooth

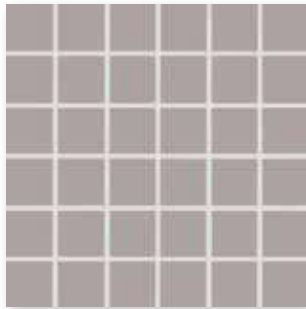

Floor/wall tile
10 x 20 cm, 4 x 8 in,
smooth

Floor/wall tile
12.5 x 50 cm, 5 x 20 in,
smooth

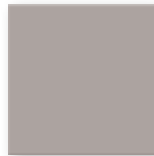

Mosaic 5 x 5 cm, 2 x 2 in

Mosaic sheet 30 x 30 cm, 12 x 12 in,
smooth

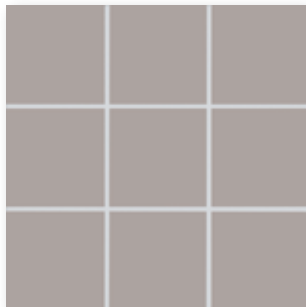

Floor/wall tile
10 x 30 cm, 4 x 12 in,
smooth

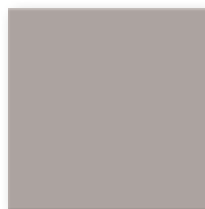

Floor/wall tile
15 x 15 cm, 6 x 6 in,
smooth

Mosaic 10 x 10 cm, 4 x 4 in

Mosaic sheet 30 x 30 cm, 12 x 12 in,
smooth

Floor/wall tile
20 x 20 cm, 8 x 8 in,
smooth

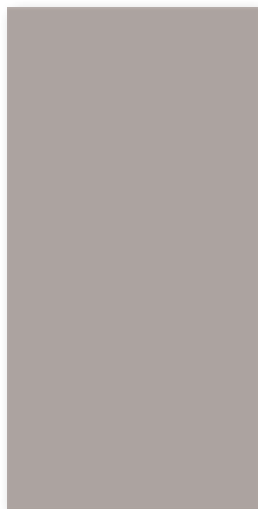

Mosaics glued thermoplastically on back of Agrob Buchtal can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas.

Do you already know our Mosaic Designer at our website www.agrob-buchtal.com?

There, you will have the possibility of designing your individual color gradients, mosaic compositions and the laying of pictures.

² For details, refer to page S. 514

³ Color deviations compared to the adjoining covering due to production are no reason for complaint in case of horizontal laying.

Natural and lively

Besides its natural look, Quarzit is impressive because of a surface vividly nuanced by unusual gloss and mica spots in an authentic stone look. In addition to the aesthetic advantages, there are also practical ones: pleasant haptics is combined with high slip resistance and enormous wear resistance.

³ On request, also available in a length of 497 mm.
⁴ High weight only to carry with two persons.
⁵ Minimum order quantity: 10 pieces. In case of smaller quantities, the price must be individually calculated.
⁶ Short edge rectified

Further details on gutter tiles and grooved tiles in the Pool+Spa delivery programme.

Elegant and timeless

Structures and colors of various rocks from the Italian coastal region of "Cinque Terre" merge in the Savona floor tile series to create a lively composition of coarsegrained texture and soft layers. A finely dosed granulate application gives the surface a pleasantly stony look and haptics. Mica-like glossy spots underline the natural effect.

Zeitgeist meets timeless

The Senja Pure ceramic tile series gives bathrooms and private wellness areas a cosy touch and a warm, lively impression. Its natural colors and finely structured surfaces are trendy and at the same time timelessly beautiful. The result: rooms harmoniously matched to one another in clear vintage style, in pleasantly restrained Nordic Design or in Shabby-Chic-Style. The successful collection was extended to include the strong color Shabby-Chic-Brown - thus offering even more scope for design.

Mix of concrete, ornaments and colors

Even the basic design of the Sento series is convincing with its modern concrete look. And it can be wonderfully combined with the fine floral ornaments of the Blossom decor. Those who want more contrast, simply combine the concrete look with the brightly colored rod mosaic. All tiles of this series – with the exception of the Stripe decor – are Hytect-coated.

³ Important: special pallet, no return, no exchange.

⁴ High weight only to carry with two persons.

⁵ Decoration elements only available in full boxes.

Original and elegant

The porcelain stoneware Sierra series adds originality and naturalness to living areas thanks to its colors and surface look. The color light-beige authentically reflects the characteristics of sandstone and its subtle color layers with typical color variations. In the anthracite variant, block mosaics in various sizes and cutting angles emphasize the masonry character even further. Matching floor tiles in the sizes 5 x 5 cm and 30 x 60 cm are available in the four colors of the series (light-beige, anthracite and light-grey). The floor and stair tiles (30 x 60 cm) are Protecta-upgraded and feature slip resistance R10/A.

Practical in commercial buildings

With a compact product range, the new Skill floor series offers a practical selection of colors and formats. Fine grains, subtle veinings and soft color transitions with a delicate relief characterize the design. With a material thickness of 9 mm, the porcelain stoneware tiles in the sizes of 30 x 60 cm, 60 x 60 cm and the large format of 60 x 120 cm are perfectly suitable for use in commercial buildings. Two stair tile formats round off the series. All tiles have slip resistance R10/A+B and are particularly easy to clean thanks to the Hytect coating.

The art of glazing

The Smalto series celebrates the fascination of ceramic glazes: inspired by the diversity of handcrafted glaze samples, surfaces with intense colors and unique effect structures are created. Traditional know-how and modern technology combine to create expressive surface designs full of depth and vitality - a collection which combines craftsmanship, art and architecture in a very special way.

Art in interior design

The Solid Ground series, designed in cooperation with the Hadi Teherani architecture office, combines concrete and travertine to create a harmonious design, which radiates stability and elegance. The series offers creative freedom with modern colors and a modular format system. Stair tiles in travertine look with a length of 145 cm are a highlight. Solid Ground provides varied and noble design possibilities for residential areas, offices, hotels and retail shops – a perfect solution for architects, planners and builders.

⁵ On request, other stair tiles/stair safety borders can be produced: see stair matrix on page 36.
⁶ Matching stair landing tiles available on request.

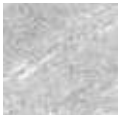

Naturally expressive

Solid Rock – this name alone is a clear statement. And the robust quality of this series is almost set in stone. Solid Rock eliminates the boundaries between inside and outside. Purely aesthetically, because it brings the power of nature into bathrooms, foyers and all other rooms. But there are also unlimited possibilities when it comes to laying. Because interior tiles in combination with Solid Rock patio tiles create seamless transitions between indoors and outdoors. A highlight for hotels and restaurants, but also in private living areas. The lively structure of the tiles accentuates rooms clearly and stringently. The Move wall bond further expands the design freedom for architects and planners. This is due to the different and carefully selected color shades in which this aesthetically truly stunning tile is available. Solid Rock is Protecta-upgraded and thus resistant to dirt and stains.

Classics for the bathroom

If plain white tiled walls previously were considered perhaps the most timeless setting for the bathroom, then Stone Concept is another variant which has what it takes to become a classic: organic marble and natural stone looks in the proven 30 x 60 cm format create a cosy, warm ambience and transform the bathroom into a feel-good oasis. With six different designs and surfaces ranging from transparent glossy to stone-matt, the series opens up flexible design options and always remains a timeless setting in its natural simplicity for the private retreat or the hotel bathroom.

Price list Agrob Buchtal 2026 - Status December 2025

Natural elegance

The Stone design combines soft grains, natural veinings and subtle shades to create a cosy look. The color range includes shades from beige to anthracite and emphasizes the naturalness and elegance of the tiles. The tiles of the Stone Duo series are all provided with the innovative and easy-to-clean Hytect surface. This feature not only ensures easy care, but also long-lasting beauty and makes the series the ideal choice for demanding builders.

When rooms tell stories

The series Stories is urban to the core: with its cement-like look, timeless grey shades, countless creative options and fascinating opulence. The intentional combination of components of the series reflects the residents' individual preferences: rooms literally tell stories. The floor tiles are convincing thanks to their soft nuances and unadulterated, stone-matt cement characteristics, thus creating an appealingly urban flair. What also makes the series Stories interesting is its two decoration variants: the Tangram cut decor and the Ivy full decor.

New naturalness

Strata reinterprets natural colors. The new ceramic series from Agrob Buchtal was developed together with the color designer Peter Zoernack. Following the example of nature, color shades were sought which correspond to a ceramic, stone material. The result is two color families with eight harmonious colors. With its nuanced color range, ceramic implementation and variety of formats, Strata offers architects and planners a useful modular system for timeless room designs. Technically sophisticated, it satisfies various practical requirements in indoor and outdoor areas.

² Color deviations compared to the adjoining covering due to production are no reason for complaint in case of horizontal laying.

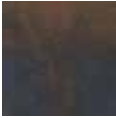

Urban, casual, cool

Streetlife Metallic translates the good feeling of lived-in surfaces into an expressive tile design. The protagonists of the series: rust surfaces with streaks, traces of oxidation and radiant vibrancy. In addition, a soft, cloudy, iridescent look reminiscent of brushed metal surfaces. In Streetlife Metallic, the two form a powerful combination which lends a timeless urban feel to open-plan living concepts and modern loft architecture. Intense, metallic colors provide a stage especially for real wood, shimmering fabrics and metal elements. With formats of 60 x 60 and 60 x 120 cm and a thickness of 10.5 mm, this timeless floor covering also qualifies for public applications such as e.g. office spaces or retail design.

⁴ On request, other stair tiles/stair safety borders can be produced: see stair matrix on page 36.

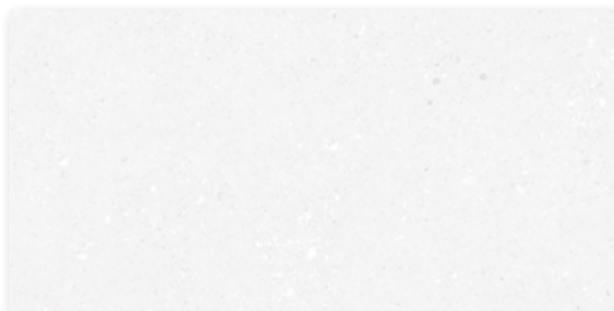

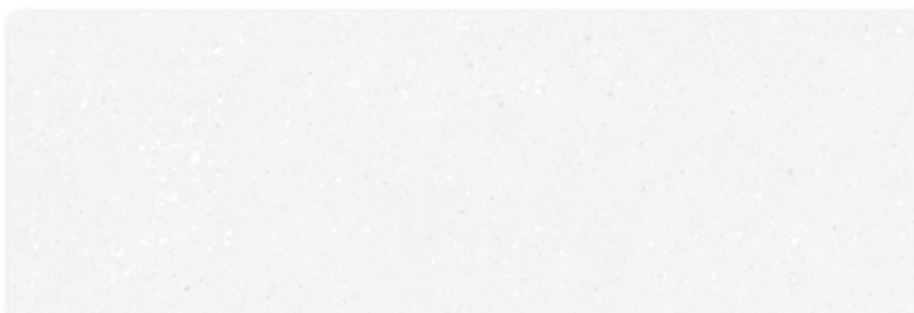

Harmonious style mix

Trio builds a bridge between a craft which has become rare and modern tile production. In the centre of Trio's triad is the floor in a natural cement stone look: clay, natural stone and cement seamlessly layered on top of each other and livened up by colored small stones. In the decorative tiles, the craftsmanship of terrazzo casting is picked up and interpreted in vivid colors. The variety of forms and colors of the small stones creates a natural, lively overall picture and sets subtle color contrasts. The glaze colors in the 15 x 15 cm small format form a powerful chord together with the cement stone and terrazzo look of the series. The color range consists of a clear white and three expressive, slightly tinted mixed colors.

Expressive and versatile

With eight formats, four colors and two slip-resistance categories, the Unique series is suitable for many areas of application. The color spectrum of the Protecta-upgraded porcelain stoneware floor tiles, which ranges from beige to anthracite, the slightly structured, discreet surface as well as the slip-resistance categories R10/A and R10/B enable versatile use, also in wet areas.

Natural and lively

The Valley porcelain stoneware series was inspired by the panorama of the distant landscape of a valley plain. Its earthy relief and its fine, grainy textures bear witness to this. Each color evokes different associations: of blue or clay slate, river pebbles, sand and earth. The effects of the weather, earth movements, water flows and metallic material deposits also create a lively surface with a typical “mountain-valley” effect. The series is rounded off by an extra thick, frost-resistant patio tile in all four colors, which is also suitable for laying in sand or gravel.

³ High weight only to carry with two persons.
⁴ On request, other stair tiles/stair safety borders can be produced: see stair matrix on page 36.
⁵ On request, other special pieces can be produced: see overview of special pieces on page 79.

Powerful, relaxed and timeless

Walden is a classic, natural wood design manufactured in high-quality ceramics. It is a natural product which combines the popularity of authentic wood surfaces with the advantages of ceramic covering materials. The 5 color shades in the classic 20 x 120 cm plank format serve a wide range of different styles and can be combined harmoniously or in contrast with other materials as desired. The slip resistance R10/A+B provides for versatile application possibilities in private and public interiors.

Agrob Buchtal offers tiles with overglazed edges in many series. In the case of **split tiles**, overglazed or overglazed rounded edges are available upon request according to the following model number system:

					
Last figure 0 of model no.	...1 = Short edge	...2 = Longitudinal edge	...3 = Corner left	...4 = Corner right	overglazed edges
to be replaced by ...	...5 = Short edge	...6 = Longitudinal edge	...7 = Corner left	...8 = Corner right	overglazed rounded edges (bullnoses)

Example: Standard model no. 18120 = 244 x 119 x 6 mm,
model no. 18123 = overglazed corner left

The use of color as an architectural design means has gained increasing importance during the last years. Therefore, we provide you with a list of the relevant Agrob Buchtal design series in order to facilitate planning. It classifies the colors according to:

NCS = Natural Color System

(More detailed information can be obtained from: Skandinavian Color Institute AB, P.O. Box 49022 · S-10028 Stockholm · Phone +46/8/6174700 · Fax +46/8/6174747, Institut für Farbe – Brigitte Hartmann · Rotes Knie 6 · 74389 Cleebronn Phone 07135/12742 · Fax 07135/12737)

RAL Color Chart

Lightness Value:

This figure (standard color value Y) describes the lightness of a color in comparison with an ideally white surface if illuminated under identical light conditions, i. e. same intensity, direction and quality. For an ideal white, which means that all the incident light is reflected, the value Y = 100 applies (black: Y = 0).

Please note that these classifications may only serve as an orientation aid. Original samples will be made available to you upon request.

The difference in lightness of two adjoining colored surfaces is called luminance contrast. By means of this value, one can determine whether a room design is rich in contrast, as it is required, for example, by DIN 32975 "Designing visual information in the public area for accessible use". In the following, you will

find the relevant values for selected series. They result from the respective lightness values, which are indicated as averaged values of individual measurements. We will be pleased to determine values for other products upon request.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

Deutsche Steinzeug tiles present better values than required by the standards.

In addition, they are construction biologically, ecologically, hygienically and bacteriologically safe; this is guaranteed through the choice of raw materials, method of processing and firing technique.

Terms and Classification according to DIN EN 14411

All our tiles consist of natural raw materials such as clay, quartz sand and feldspars, which are processed, refined and fired. Depending on the application they are manufactured with a glazed (GL) or unglazed (UGL) surface. They can be classified in accordance with DIN EN 14411 as follows:

Classification of the ceramic tiles according to their groups of water absorption (E) and their shaping

Shaping	Group I E ≤ 3 %	Group IIa 3 % < E ≤ 6 %	Group IIb 6 % < E ≤ 10 %	Group III E > 10 %
A extruded tiles	Group AIa E ≤ 0.5 % (Annex M)	Group AIIa-1a) (Annex B)	Gruppe AIIb-1a) (Annex D)	Group AIII (Annex F)
	Group AIb 0.5 % < E ≤ 3 % (Annex A)	Group AIIa-2a) (Annex C)	Gruppe AIIb-2a) (Annex E)	
B dry-pressed tiles	Group BIa E ≤ 0.5 % (Annex G)	Group BIIa (Annex J)	Group BIIb (Annex K)	Group BIIIb) (Annex L)
	Group BIb 0.5 % < E ≤ 3 % (Annex H)			
a) The groups AIIa and AIIb are subdivided into two parts (parts 1 and 2) with different product requirements.				
b) Group BIII essentially applies to glazed tiles. There is a small number of dry-pressed unglazed tiles manufactured with a water absorption of more than 10 % to which this product group does not apply.				

Traditionally the following terms are used:

Extruded tiles

(marked with A)

Tiles that are cut off with a certain length from a bar formed from the plastic mass by means of an extruder.

Dry-pressed tiles

(marked with B)

Tiles that are formed from a finely ground and subsequently granulated mass by pressing under high pressure.

Stoneware tiles are frost-resistant, single extruded vitrified tiles with a firing temperature of appr. 1260 °C.

KerAion is the unique extruded ceramic large-size panel from Agrob Buchtal.

Vitrified dry-pressed tiles are frost-resistant, single dry-pressed tiles with a firing temperature of up to 1200 °C.

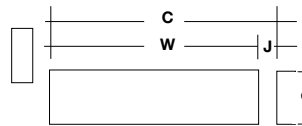

Porcelain stoneware stands for especially densely sintered tiles with a water absorption of < 0.5 %.

Mosaics are small (porcelain) stoneware tiles stuck onto sheets.

Earthenware tiles are non-frost-resistant, single dry-pressed tiles with a firing temperature of up to appr. 1100 °C.

The **water absorption E** in weight-% is determined in accordance with DIN EN ISO 10545-3.

Description of dimensions

Coordinating dimension (C) in cm = Work size (W) + joint (J)

Work size (W) in mm = Dimensions of the visible surfaces and thickness (d)

Dimensions and Surfaces

1 - 5. Dimensions, DIN EN ISO 10545-2

All dimensions are determined in accordance with the standard.

Permissible length and width tolerances corresponding to the product standards						
DIN EN 14411	Group AIa / AIb (25 x 12.5 cm)		Group AIIa (25 x 12.5 cm)		Group BIIa / BIIb (30 x 30 cm)	Group BIII (10 x 10 cm)

Deviation from the work size	± 2 %, max. 4 mm	± 1 %, max. 2 mm	± 2 %, max. 4 mm	± 1.25 %, max. 2 mm	± 0.6 %, max. 2 mm	± 0.2 %, max. 2 mm
Deviation from the average side length	± 1.5 %	± 1.0 %	± 1.5 %	± 1.0 %	± 0.5 %	± 0.5 %

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

The work sizes of our **special pieces** are given according to visual sides.

6. Surface Quality, DIN EN ISO 10545-2

The surfaces of 1 m² or 30 pieces are tested at 300 lux for visible defects at a distance of 1 m.

7. Color Deviations, DIN EN ISO 10545-16

Glazed mono-colored products with values of $\Delta E_{cmc} < 0.75$ are considered as identical in color; the value of 1.0 applies to unglazed mono-colored products.

7.1. Color Shade Grading

The color shade code is stamped on the box. Only identical color shades will result in a uniform surface look. In the case of rustic split tiles greater color deviations are normal. During laying, tiles from different boxes should be mixed.

8. Size Grading

The production sizes vary for technical reasons. The production size is coded and stamped on the box. Only boxes with the same coding should be laid together. According to VOB, the differences are evened out in the joints.

Physical Properties

1. Water Absorption, DIN EN ISO 10545-3

The **water absorption (E)** gives the weight increase as compared to the dry weight of samples saturated with water under vacuum.

1.1 Apparent Density, DIN EN ISO 10545-3

It gives the ratio between mass and external volume.

2. Modulus of Rupture, DIN EN ISO 10545-4

The breaking load F is determined on samples by means of the three-point load in N . From this, the modulus of rupture and the breaking load are calculated according to the following formula.

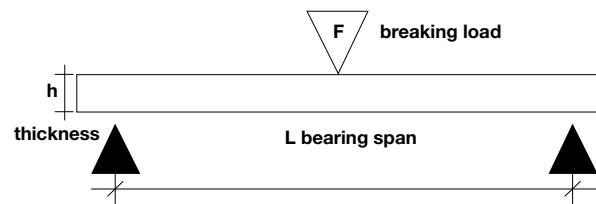

Modulus of Rupture

$$R = \frac{3 \cdot F \cdot L}{2 \cdot b \cdot h^2}$$

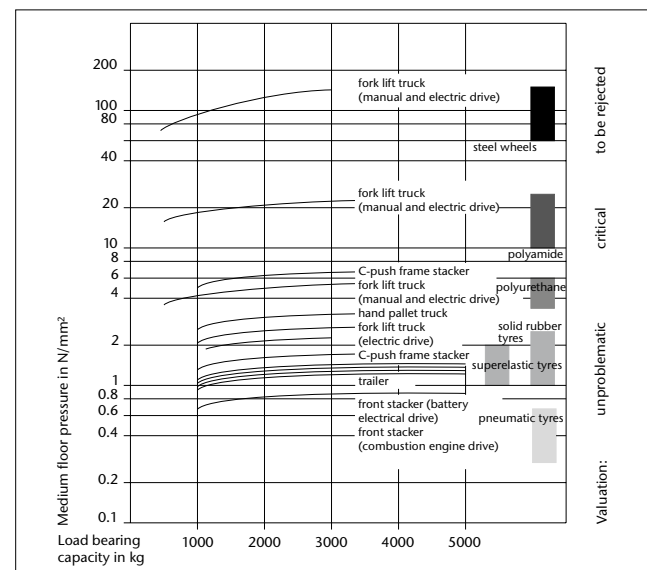

F = breaking load in N
 L = bearing span in mm
 b = width in mm
 h = thickness in mm
 R = modulus of rupture

Breaking Load

$$S = \frac{F \cdot L}{b}$$

Possible Applications	Stress Group
Breaking load under 1,500 N Housing construction and floor coverings subject to comparable mechanical stress, e.g. hotel bathrooms, rooms in the health service sector	1
Breaking load 1,500 – 3,000 N Administration, trade and industry (practicable with vehicles with pneumatic tyres), e.g. canteen kitchens, canteens, traffic zones, car exhibition and maintenance areas, sales rooms, always without industrial truck traffic Floor pressures up to 2 N/mm ²	2
Breaking load 3,000 – 5,000 N Trade and industry (industrial truck traffic with superelastic, solid rubber and vulkollan tyres), e.g. in food retailing and wholesaling, non-food retailing and wholesaling, shopping malls Floor pressures 2 to 6 N/mm ²	3
Breaking load 5,000 – 8,000 N Trade and industry; areas of application as in group 3, but practicable with polyamide rollers Floor pressures 6 to 20 N/mm ²	4
Breaking load above 8,000 N Trade and industry; heavy-duty areas with industrial truck traffic with polyamide rollers; runners of metal parts, such as e.g. in factory buildings, assembly halls and storerooms, repair workshops for machines and heavy equipment Floor pressures > 20 N/mm ²	5

Floor pressures in N/mm² of industrial truck wheels according to a FMPA test in Stuttgart

The table illustrates the floor loads and indicates the effect of the different wheel types: steel wheels should be rejected and polyamide (Nylon and Perlon) is not advisable. Softer tyres (≤ 75 Shore-A-Hardness) as well as larger wheel diameters and wider supporting surfaces are especially advantageous.

Important note:

The "application possibilities" are of course only recommendations, as the method and quality of laying are decisive factors. Our recommendations are based on conventional, professional laying. With increasing mechanical load as well as harder tyres a thicker tile is required.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

Mechanical Strength

Deutsche Steinzeug offers tiles in thicknesses from 5 up to 20 mm for extreme loads in industrial and commercial areas. The breaking load values of our products partly are by far better than the values required by DIN EN 14411 (the relevant test certificates will be made available on request).

The calculated breaking load indicates the suitability for floors subject to mechanical loads. The stress itself is caused by bending rather than by pressure. The “extra strong” tiles from our programme with their high pressure, breaking and bending strength values are the ideal covering for floors subject to heavy loads. They withstand the wheels of industrial trucks, fork lift trucks and platform lift-trucks with their high floor pressure. They are especially suitable as floor coverings for industrial logistics, hyper- and supermarkets.

3. Compressive Strength

The compressive strength of tiles is not standardized. In the case of vitrified dry-pressed tiles it reaches values of up to 150 N/mm². The following conversion table shows the importance of a perfect and professional embedding of the tiles on site. The relatively low values for cement and thin-bed mortar can only be compensated by special and professional laying (mortar composition, water/cement value and manual or mechanical compression).

4. Resistance to Shock, DIN EN ISO 10545-5

Rebound measurement with 5 samples.

5. Resistance to Deep Abrasion, DIN EN ISO 10545-6

With regard to the deep abrasion on unglazed tiles, the abrasion is determined by means of fusion corundum and a rubbing plate. The lower the value, the higher the wear resistance of the material.

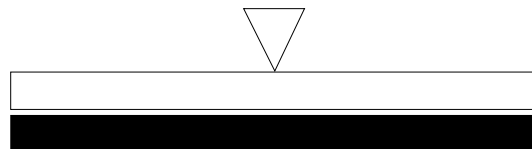

6. Glaze Abrasion, DIN EN ISO 10545-7

The **abrasion class** of glazed tiles is established in the wet test. Artificial abrasion is produced with the help of aluminium oxide grains, steel balls and the addition of water in an eccentrically revolving system. The number of revolutions at which a visible change of the test surface occurs results in the following classification:

Resistance to Surface Abrasion

Class	Revolutions
0	100
1	150
2	600
3	750/1500
4	2100/6000/12000
5	>12000*

* Must pass the stain test according to DIN EN ISO 10545-14.

Vitrified material has a compressive strength approx. 10 - 20 times higher than cement mortar, cast plaster floors and reinforced concrete.

Conversion table for different materials

Types of material	N/mm ²	N/cm ²	kN/cm ²
Vitrified dry-pressed tiles	100 – 150	10.000 – 15.000	10 – 15
Extruded split tiles	180 – 250	18.000 – 25.000	18 – 25
Cement mortar Gr. III	10	1.000	1
High-grade cement mortar	20	2.000	2
Thin-bed mortar 15 – 30	1.500 – 3.000	1.5 – 3	
Epoxy resins 60 – 75	6.000 – 7.500	6 – 7.5	
Cement screed CT, C12 (ZE 12)	12	1.200	1.2
CT, C20 (ZE 20)	20	2.000	2
CT, C30 (ZE 30)	30	3.000	3
Mechanically resistant floor 65	65	6.500	6.5
Reinforced concrete C 20/25 (B 25)	25	2.500	2.5
C 30/37 (B 35)	35	3.500	3.5

Class 0

The use of glazed tiles of this class for floor coverings is not recommended.

Class 1

Floor coverings in areas mainly walked on in soft footwear or barefoot and not exposed to abrasive dirt (e.g. bathrooms and bedrooms without direct access from outside).

Class 2

Floor coverings in areas occasionally walked on with soft or normal footwear and exposed to only little abrasive dirt (e.g. rooms in living areas of houses, except kitchens, entrances and similar heavily frequented rooms). This does not apply to special footwear such as e.g. hobnailed boots.

Class 3

Floor coverings in areas frequently walked on with normal shoes and exposed to little abrasive dirt (e.g. kitchen-cum-living-rooms, halls, corridors, balconies, loggias and terraces). This does not apply to special footwear such as e.g. hobnailed boots.

Class 4

Floor coverings walked on regularly and exposed to little abrasive dirt, so that they are subject to greater stress as in the case of class 3 (e.g. commercial kitchens, hotels, exhibition and sales rooms).

Class 5

Floor coverings subject to heavy pedestrian traffic over long periods of time and exposed to little abrasive dirt, so that they are subject to the most extreme stress under which glazed tiles can be applicable (e.g. public areas such as shopping centres, entrance halls of airports, hotel foyers, public footpaths and industrial applications).

Every floor covering is subject to wear. This depends on the area of application and the frequency of use, the kind and degree of dirt as well as the hardness and resistance to wear of the covering material. While unglazed vitrified floor tiles can be used practically anywhere, glazed floor tiles have to be categorized according to stress groups. Scrapers, mats and the like help to remove dirt and abrasives and to protect glazed floor coverings. Something of this kind has to be provided especially in rooms with direct access from outside or from the garden.

Extreme Stress

For such areas we recommend the use of integrally colored, unglazed tiles, which are available in a wide range of colors and sizes. Examples: floors subject to high traffic loads, e.g. in supermarkets, hotels, schools, administrative buildings, railway stations, hospitals, passageways, etc., taking into account the mechanical load.

7. Coefficient of Expansion, DIN EN ISO 10545-8

The coefficient of expansion is ascertained between room temperature and 100°C ermittelt. The measured values are at around $6.0 \times 10^{-6} \text{ m/(m}\cdot\text{K)}$ in the case of vitrified materials and at around $8.0 \times 10^{-6} \text{ m/(m}\cdot\text{K)}$ in the case of porcelain stoneware. At 8 m length and 50° temperature difference the result is a change in length of approx. 2.4 mm in the case of vitrified materials (in the case of screed/concrete 4.6 mm and steel 5.6 mm).

8. Thermal Shock Resistance, DIN EN ISO 10545-9

The thermal shock resistance is tested between 15° and 145°C.

9. Moisture Expansion, DIN EN ISO 10545-10

The moisture expansion is determined between tempered and water-saturated samples.

10. Resistance to Glaze Cracking, DIN EN ISO 10545-11

This test takes place in the autoclave at 500 KPa with subsequent color control.

Glazes with hair cracks/crazes are marked as such and require the wetting of the covering prior to pointing to avoid deposits of fine particles of the pointing mortar in the hair cracks. Colored pointing compounds are not suitable in the case of these glazes. The glaze surfaces must not be marked with felt-tip pen and the like.

11. Thermal Conductivity etc.

Thermal conductivity, heat radiation and storage capacity as well as the thermal resistance are not standardized. Vitrified material produces the following approximate values:

Thermal conductivity:	1 W/mK	Heat storage capacity:	0.8 kJ/kgK
Heat radiation:	5.3 W/m ² K ⁴	Thermal resistance:	0.01m ² K/W

12. Electrical Leakage Resistance

With a volume resistance of $>10^{10} \text{ Ohm}$ (DIN EN 1081), our ceramics is insulating in dry condition. With the series Eladuct and KerAion ELA 10.6, however, we offer ceramics for floors capable of discharging static electricity. The glaze of ELA 10.6 has a surface resistance of approx. 10^6 Ohm according to DIN EN 1081. The discharge of static electricity is effected from the glaze via conductive joints and tile adhesive into copper strips to be connected to earth, which are laid on the base to be tiled. In the case of Eladuct, the complete tile body is capable of discharging static electricity. The volume resistance according to DIN EN 1081 is approx. 10^8 Ohm . Here, conductive joints are not required; apart from that, the base has to be carried out as described for ELA 10.6.

13. Steam Diffusion Resistance

According to DIN EN ISO 12572 the steam diffusion resistance is approx. $\mu 120,000$ in the case of vitrified material/split tiles and $\mu 100,000$ in the case of earthenware (excluding joints).

14. Resistance to Frost, DIN EN ISO 10545-12

The test for frost resistance is carried out on 10 samples or > 0.25 m² samples. After water saturation under vacuum the samples are checked for defects after 100 frost-thaw alternations.

The resistance to frost of an outdoor flooring, however, does not only depend on the quality of the ceramic tiles used.

Professional construction and laying are essential. For this, please refer to our specifications and the notice of the umbrella organization of the German building and construction industry "Outdoor Tiled and Paved Coverings".

15. Light and Color Fastness

Both glazed and unglazed ceramics are light- and color-fast according to DIN 51094.

16. Luminance

The lightness value of a tile describes the brightness of the surface as perceived by the human eye. The measuring value $Y = 100$ corresponds to the brightness of an absolutely white surface, and $Y = 0$ to that of an absolutely black surface. The lightness value is determined for mono-colored tiles.

17. Behaviour in Fire

Ceramic tiles are classified A 1 according to EN ISO 13501-1 and DIN EN 14411. Therefore, they are generally non-combustible and thus fire-resistant. Also in the case of fire they do not release any toxic emissions.

Chemical Properties

1. Resistance to Chemicals, DIN EN ISO 10545-13**Resistance to Household Chemicals and Bath Water Additives**

- Household chemicals
 - Ammonium chloride solution 100 g/l
- Bath salts
 - Sodium hypochlorite solution 20 mg/l

Classes

A/B/C*

Resistance to Acids and Alkalis

- Low concentration (L)
 - a) Hydrochloric acid solution 3% (V/V)
 - b) Citric acid solution 100 g/l
 - c) Potassium hydroxide solution 30 g/l
- High concentration (H)
 - a) Hydrochloric acid solution 18% (V/V)
 - b) Lactic acid solution 5% (V/V)
 - c) Potassium hydroxide solution 100 g/l

Classes

LA/LB/LC or HA/HB/HC*

Acid Protection and Apparatus Engineering

The resistance for acid protection engineering DIN EN 993-16 or chemical apparatus engineering DIN 28062 is subject to individual tests.

* Class A shows the highest resistance to chemicals, which decreases more and more towards C.

2. Stain Resistance, DIN EN ISO 10545-14**Stain Forming Substances**

- Stain forming substances, leaving traces
 - Green stain forming substances in oil
 - Red stain forming substances in oil
- Chemical stain forming substances
 - Iodine, 13 g/l in alcohol
- Stain forming substances, forming a film
 - Olive oil

Cleaning (within the framework of the test)

- Cleaning agent
 - Hot water (+55 °C)
 - Weak cleaning agent
 - Strong cleaning agent
- Solvent
 - Hydrochloric acid solution 3% (V/V)
 - Potassium hydroxide 200 g/l
 - Acetone

Classes

Cl.5 / Cl.4 / Cl.3 / Cl.2 / Cl.1*

3. Lead and Cadmium Delivery

The glazed surfaces are exposed to a 4 percent acetic acid solution. Then, the quantity of the delivered lead and cadmium is determined.

* Class 5 shows the highest stain resistance, which decreases more and more towards 1.

Surface Coatings and Upgradings

Hytect

Hytect is a highly effective and durable coating of tiles and panels of Deutsche Steinzeug. The coating baked onto the surface on the base of titanium dioxide uses the principle of the photocatalysis. It offers the user the following advantages:

A) Hytect decomposes bacteria and germs

The surface is activated by sunlight or artificial lighting. Activated oxygen forms, which decomposes microorganisms.

B) Hytect eliminates disagreeable odours

Disagreeable or even unhealthy odours in the air are also eliminated by Hytect.

C) Hytect reduces the cleaning efforts

The hydrophilic surface makes it possible for water to get under the dirt. In this way the quantity of cleaning agents is considerably reduced, which means a contribution to environmental protection and the saving of time for manual works at the same time.

Hytect surfaces are odourless, non-poisonous, meet the requirements for food and are completely harmless for persons suffering from allergies.

Laying and pointing are carried out by the usual techniques. The conventional agents (without hydrofluoric acid and its compounds) are applicable for cleaning. All additives forming a film, leaving fat on the surface or impregnating are excluded, which impair the surface activation by light.

Renowned institutes in Germany and abroad have confirmed us the corresponding effects of Hytect.

Protecta Surface Upgrading

Better Beats Good ...

Unglazed vitrified tiles are hard-wearing and resistant by nature. Thanks to the Protecta surface upgrading, the stain and dirt resistance could be improved considerably: during the firing process, the coating applied **in-plant** is ceramically bonded to the biscuit and closes the existing "micropores" quite natural for unglazed ceramics. In this way, the penetration of substances forming stains is prevented. Thus, an impregnation is no longer required and may possibly even have a negative effect in the case of slip-resistant tiles with Protecta surface upgrading, as the impregnating agent can not penetrate the tile but remains on the surface as lubricating film.

Products with Protecta surface upgrading are marked with this symbol in the corresponding series:

Hygiene

Glazed tiles and tiles with Protecta surface upgrading of Deutsche Steinzeug ensure the best possible hygiene conditions. Thanks to the closed surface, they offer no possibility for germs to proliferate. Tests of institutes for hygiene confirm the suitability for the covering of drinking water reservoirs. Hyper-sensitive people such as those suffering from allergies make the best experiences with tiles.

Cleaning

On principle, claddings and coverings must be protected by appropriate measures against heavy soiling which may be caused in particular by subsequent construction works (painting etc.). Our tiles can generally be cleaned with water and a neutral or alkaline cleaning agent.

In the case of hard water, the sporadic use of acid cleaning agents is required. In the case of stains, cleaning depends on the type of stains and has to be carried out with suitable chemicals.

In the case of a higher concentration of the cleaning agent used, subsequent wiping with clear water is required. Rinsing with clear water is absolutely necessary when carrying out a basic cleaning.

Cleaning agents containing maintenance additives are not recommended by us. They usually reduce the slip resistance and cause a negative visual appearance of the floor covering by forming layers!

Important: the use of cleaning machines with pads containing abrasive grain has a polishing effect by which the slip resistance of the tiles is considerably reduced. We therefore expressly disapprove of such methods. Hydrofluoric acid or its compounds attack the ceramics and cause irreversible damage!

You will find detailed cleaning instructions for ceramic tiles on the Internet at www.agrob-buchtal.de

- ➔ Service
- ➔ Architects & Planners / Dealers / Tilers
- ➔ Cleaning instruction.

Impregnation

Unglazed stoneware without Protecta surface upgrading or Hytect coating should be impregnated in order to prevent the penetration of colored liquids, fats and oils and to facilitate cleaning.

The impregnating agent must be applied on the clean and dry floor; excess material must be removed immediately.

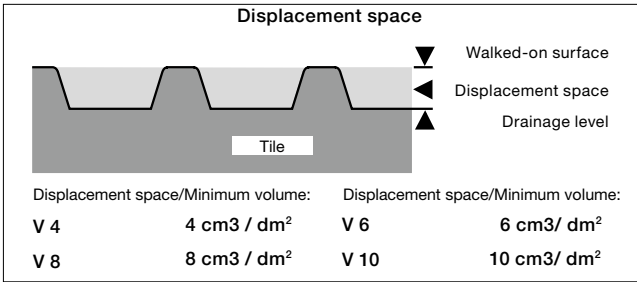

Slip Resistance

1. Coefficient of Friction/Slip Resistance

Workshop rules as well as accident prevention regulations require floors to be smooth, slip-resistant and easy to clean. Special protective measures against slipping are necessary where there is a risk as a result of the use of water, oil, slush, grease or waste. This should be taken into consideration when choosing the surface material. This clear requirement is based on investigations carried out by the insurance companies, which proved that slipping is the primary cause of accidents.

1.1. Industrial Areas

Competent authority:
Deutsche Gesetzliche Unfallversicherung,
Mittelstraße 51, 10117 Berlin-Mitte,
phone: +49 (0)30 28876-3800,
fax: - 3808, www.dguv.de, info@dguv.de
Test standards: DIN EN 16165 and DIN 51130:2023-03
Guideline: ASR A 1.5 - Floors
Code of practice: DGUV regulation 108-003 "Floors in work rooms and work areas with high risk of slipping" (previous BGR 181)
Test procedure: Inclined plane, safety footwear worn, test medium oil. The surface finish can be smooth, fine-rough, rough or profiled.

The displacement space (V4-V10) is the open space between the upper walked-on surface and the drainage level of profiled surfaces.

Valuation Groups

In a detailed table (see next page) the required valuation groups are assigned to work areas where there is a high risk of slipping. Information is available from Deutsche Gesetzliche Unfallversicherung and Agrob Buchtal.

Test on "inclined plane"

Valuation groups	Angle of inclination	Industrial + commercial areas
R9	> 6° - 10° low static friction	
R10	> 10° - 19° normal static friction	
R11	> 19° - 27° increased static friction	
R12	> 27° - 35° high static friction	
R13	> 35° very high static friction	

The indicated angles of inclination exclusively serve for the assignment of the valuation groups and can not be equated with the angles of inclination of slopes/ramps.

Slip-resistant tiles are marked with the logo "GRIP" in the corresponding series:

Legal Basis

Workshop rules as well as accident prevention regulations require floors to be smooth, slip-resistant and easy to clean. The brochure "Technische Regel für Arbeitsstätten" ASR. A 1.5 – Floors (Code of practice for work areas) contains detailed requirements.

28.8	Special rooms for handicrafts	R10				
28.9	Schoolyards	R11 (or R10 V4)				

No responsibility is taken for the correctness of the information.
Validity at the time of printing, subject to changes in the meantime.

Depending on the operational exposure to slippery substances to be expected, floors in working rooms and areas must be provided with a discharge facility, if required.
The surfaces adjoining discharge openings as well as drain channels should have a slope of at least 2 per cent in order to facilitate the draining of fluid liquids. These areas should preferably be located outside of traffic routes. The discharge of liquids via traffic routes should be avoided, if possible.

Floor surfaces which normally are wet and have to be walked on barefoot, e.g. in swimming pools as well as sanitary rooms such as washing and changing rooms, must be suitable for ensuring safe walking.

1.2. Barefoot areas

Competent authority:

Deutsche Gesetzliche Unfallversicherung, Mittelstraße 51, 10117 Berlin-Mitte, tel.: +49 (0)30 28876-3800, fax: - 3808, www.dguv.de, info@dguv.de, www.unfallkassen.de.

Floors in wet barefoot areas, e. g. swimming pools, hospitals as well as dressing rooms, washrooms and showers in sports and work facilities.

Test standard: DIN EN 16165.

Code of practice: DGVU information 207-006 "Floor coverings in wet barefoot areas" (previous GUV-I 8527).

Testing method: Inclined plane, walked on barefoot, wetting agent solution as test medium.

The surfaces are smooth, micro-rough or slightly profiled.

"Nonslip" glazes with their micro-rough surfaces have proved to be excellent in practice.

The various areas are assigned to the valuation groups. Information can be obtained from Deutsche Gesetzliche Unfallversicherung and Agrob Buchtal.

Valuation group C

- Ladders and stairs leading into the water
- Stairs up to diving facilities and water slides
- Surfaces of diving platforms and diving boards over the length reserved for the diver (the slip-resistant surface of the diving platforms and diving boards must cover the front edge where the hands and the toes of the divers grip)
- Walk-through pools
- Inclined pool edge designs
- Kneipp basins, water-treading basins
- Ramps in the pool surround area with an inclination > 6 %
- Starting blocks

Walkable seating areas such as e.g. stands and pedestals near the pool into which moisture can be brought must be treated like floor coverings. If barefoot areas are regularly also walked on with footwear, the requirements according to ASR A1.5/1,2 must be observed in addition.

Valuation group A

- Barefoot passages and sanitary areas (nearly dry)
- Individual and common dressing rooms
- Pool floors in non-swimmer areas if the water depth is more than 80 cm in the entire area
- Sauna and relaxation areas (nearly dry)

Valuation group B

- Barefoot passages and sanitary areas, if not classified in group A
- Showers
- Steam baths
- Area of disinfecting spray facilities
- Pool surrounds
- Pool floors in non-swimmer areas if the water depth is less than 80 cm in certain areas
- Non-swimmer sections of wave-action pools
- Movable floors
- Paddling pools
- Ladders and stairs outside the pool area, if not classified in group C
- Accessible surfaces of diving platforms and diving boards, if not classified in group C
- Sauna and relaxation areas, if not classified in group A

Test on "inclined plane"

Valuation groups	Angle of inclination	Barefoot area
A	$\geq 12^\circ$	
B	$\geq 18^\circ$	
C	$\geq 24^\circ$	

The indicated angles of inclination exclusively serve for the assignment of the valuation groups and can not be equated with the angles of inclination of slopes/ramps.

1.3. Measurement of sliding frictiong

Competent authority:

Deutsche Gesetzliche Unfallversicherung, Mittelstraße 51, 10117 Berlin-Mitte, tel.: +49 (0)30 28876-3800, fax: - 3808, www.dguv.de, info@dguv.de, www.unfallkassen.de.

Test standard: DIN 51131

Code of practice: DGUV information 208-041 "Assessment of the risk of slipping under operating conditions" (previous GUV-I 8687).

This test is not a type examination and thus is neither suitable for the choice of floor coverings at the planning stage nor for classification in a slip-resistance valuation group. The method can be applied, e.g. for assessing the success of cleaning measures or in the event of planned changes of utilisation.

For the choice of a floor covering, DGUV information 108-003 (previous BGR 181) and DGUV information 207-006 (previous GUV-I 8527) respectively must be applied exclusively!

1.4. Private areas

With regard to slip resistance, ceramic floor coverings in private areas are not subject to standard regulations. Independent of that, however, we recommend that you choose slip-resistant tiles according to your personal safety requirements.

Color Shade Variation

"Color shade variation" refers to the variations in color between the tiles of a certain color, i.e. the degree of shading. Our products are classified into 4 shading coefficients.

V0 = No variation / no play of colors

V1 = Low variation / low play of colors

V2 = Medium variation / medium play of colors

V3 = High variation / high play of colors

V4 = Strong variation / strong play of colors

Mosaics glued thermoplastically on back: Permanently safe also in wet areas

The thermoplastic glueing of mosaics of the brands Agrob Buchtal and Jasba is also perfectly suitable for permanently wet and underwater areas. Analyses of independent institutes have proved that no microbiological infestation at the glass fibre net occurs under normal hygienic conditions. With the values $>0.5\text{N/mm}^2$, the bonding behaviour after dry and wet storage is better than the values required according to DIN EN 12004. Thus, the thermoplastic glueing on back can be recommended not only for dry areas but also for underwater areas (swimming pools and whirlpools) as well as for per-

manently wet areas such as showers and pool surrounds. In addition, the glueing on back facilitates laying and leads to considerable time saving compared to the film on the face side required so far. The glass fibre net on the back largely prevents the penetration of tile adhesive in the joints. The time-consuming removal of the film and possible residues on the tile surface is no longer necessary, and the cladding of columns and curvatures is significantly simplified.

Quality Controls

Quality controls are carried out by:
- manufacturers themselves with strict sorting
- controls and special tests by the Deutsche Steinzeug laboratories
- individual and batch testing by external material testing institutions in Germany and abroad

Certificates

The characteristics and the quality of our products are constantly tested by acknowledged material testing institutions.
The corresponding test certificates are available.

* We will be pleased to make a survey of the certified individual products available to you on request.

Shower Tub System – Area Pro/Plural non-slip/Plural unglazed/Basis 3

The shower tub system consists of special tiles for realizing a shower tub integrated in the tile covering.

The shower tub system is a registered design. It meets the requirements of DIN 18040 “Barrier-free building” and DIN 18025 “Barrier-free living”.

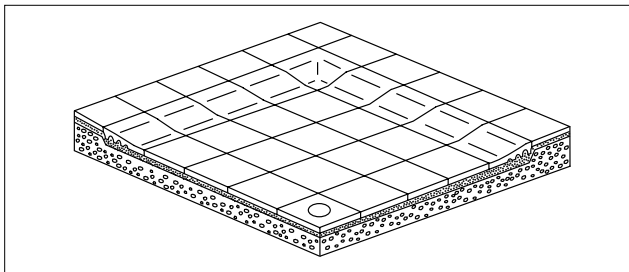

In Germany, the 10 mm lip means that it is possible to take full advantage of various housing grants.

The 100 mm modular dimension inclusive of a 3 mm wide joint guarantees perfectly hygienic tile coverings with a narrow joint width and accurately sized tiles.

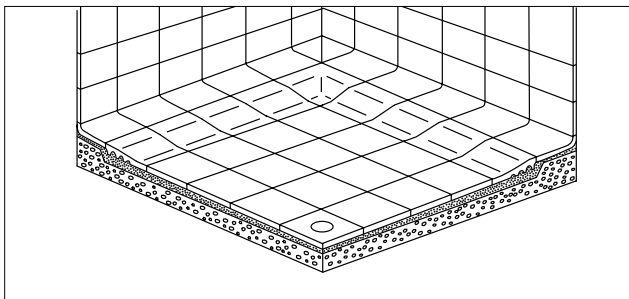

As with all slip-resistant surfaces of Plural non-slip/Plural unglazed, the series Basis 3, the surfaces of both the glazed and the ceramically upgraded unglazed tiles are very easy to clean.

The shower tub system is predestined for wet areas in hospitals, sanatoriums, rehabilitation centres, old people's and nursing homes, but also for showers in commercial areas, swimming pool, sauna and sports facilities, hotel and private bathrooms.

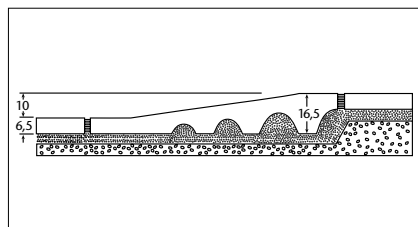

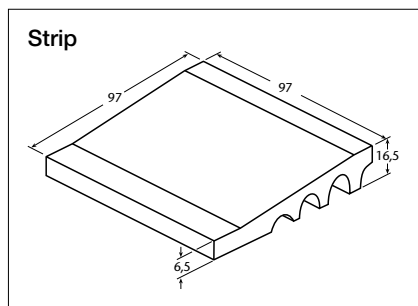

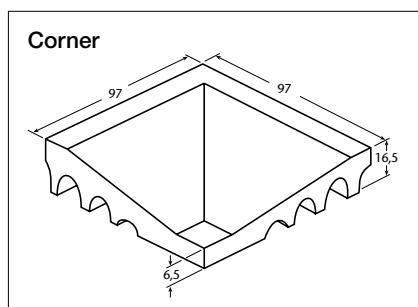

1. The shower tub is a module with the necessary slope that can be integrated in the joint grid of the tile covering as required.

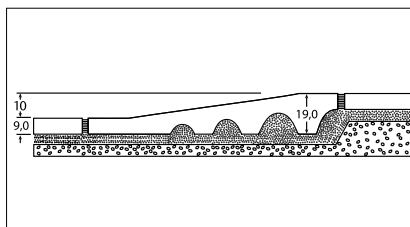

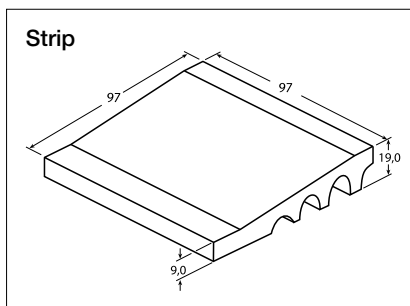

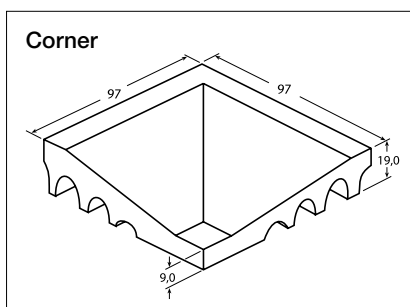

2. In combination with the cove skirting laid horizontally, a rounded transition between floor and wall covering is possible.

**Area Pro, Plural non-slip,
Plural unglazed**

Basis 3 Softcorn

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

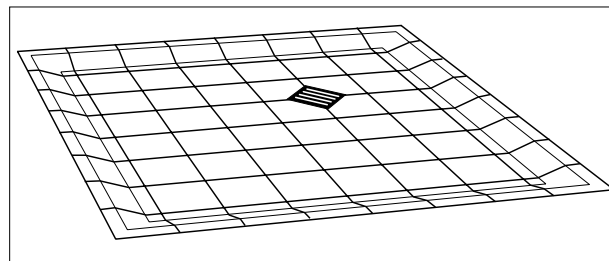

The Shower Tub System of the Series Chroma / Chroma unglazed – Quantum

This shower tub system consists of only two components: the strip and the one-piece corner belonging to it.

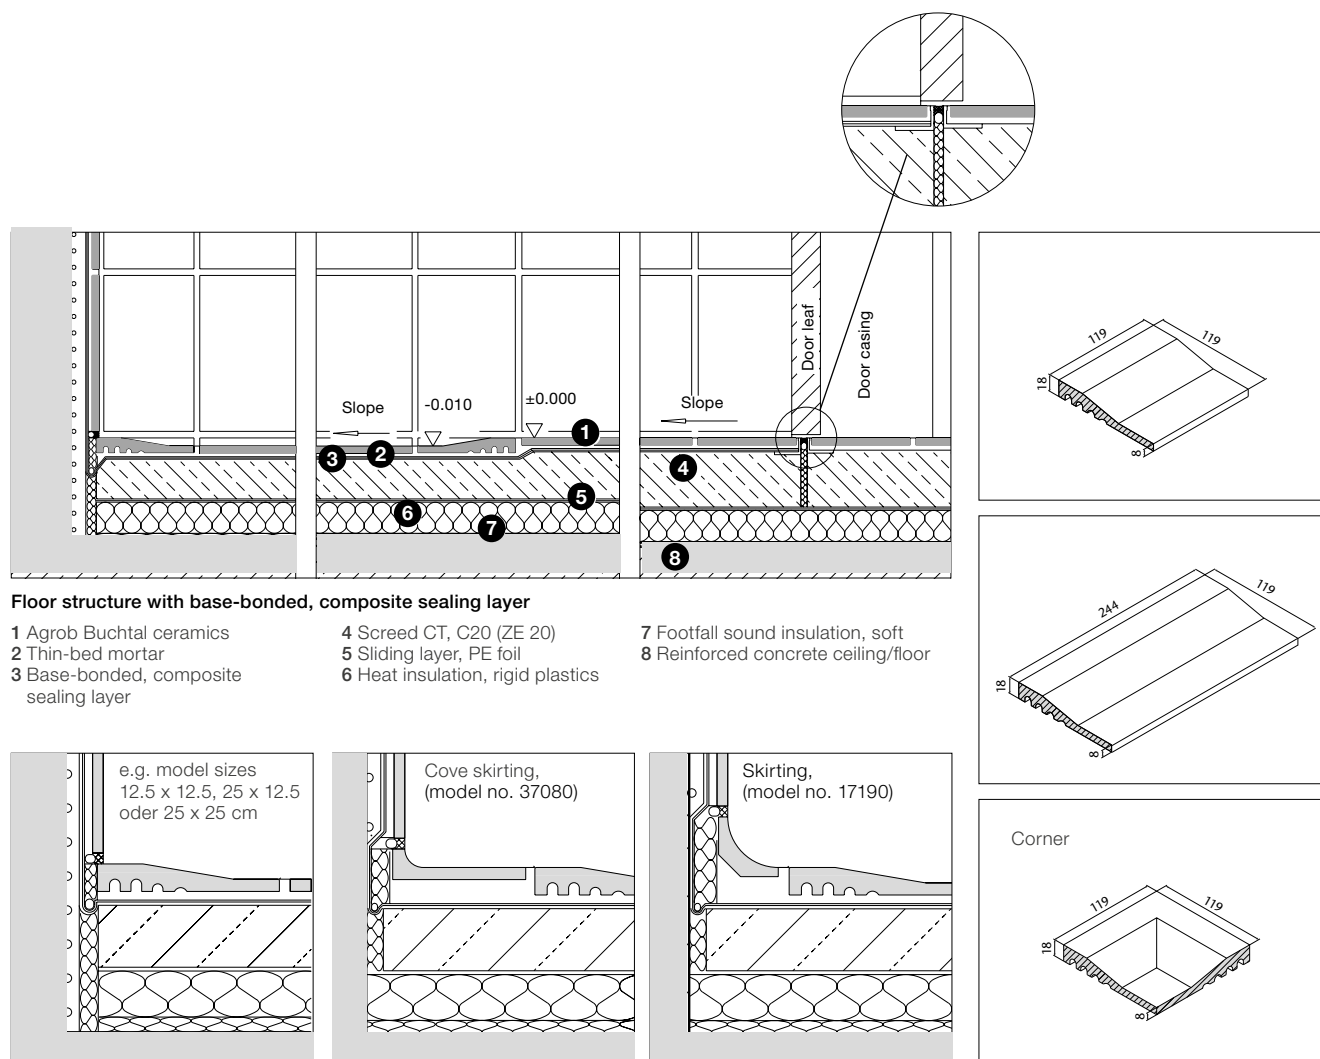

A peculiarity of the system is the special form of the slope which provides a difference in height of 10 mm. The edge of the shower tub designed in this manner is easy to pass on foot and with a wheel-chair. The relevant requirements (DIN 18040 or 18025) with regard to barrier-free construction taking into account the needs of senior and handicapped persons are effectively supported in this way.

Thanks to the "integrated slope" the time-consuming execution of the edge of the shower tub on site is no longer required, and together with the even lower side facilitating laying the processing of these tiles is absolutely simple:

The shower tub system is perfectly completed by the series Chroma / Chroma unglazed – Quantum.

The shower tub system is based on a grid size of 12.5 x 12.5 cm. This permits a very variable dimensioning of the shower tub independent of standard dimensions and a harmonious integration in the shower installation or sanitary block.

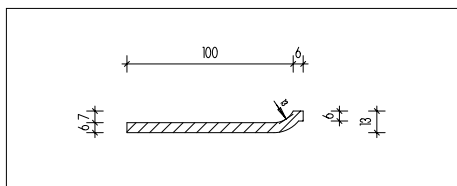

Wall connection variants

The shower tub systems of Agrob Buchtal are laid on a continuous screed and therefore do not require a high-maintenance movement joint between shower tub and adjoining areas.

Cove Skirting

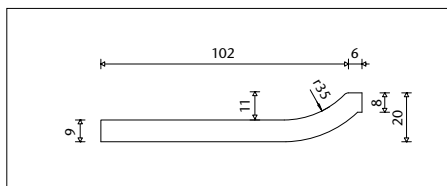

Cove Skirting 10 x 10 cm

Fitting to:

Area Pro, smooth, 10 x 10 cm, unglazed
Plural/Plural non-slip, smooth and slip-resistant, 10 x 10 cm
Basis 2, smooth, 10 x 10 cm, glazed
Basis 3, smooth, 10 x 10 cm, unglazed
Plural unglazed, smooth, 10 x 10 cm

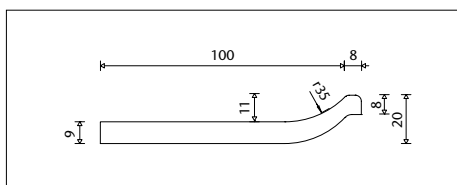

Cove Skirting 10 x 15, 10 x 20, 10 x 30 and 10 x 60 cm

Fitting to:

Emotion GRIP, smooth oder Softcorn, 10 x 20, 10 x 30 cm, unglazed
Basis 3, smooth, 10 x 15, 10 x 20 cm, unglazed
Basis Pro, smooth, 10 x 30 cm, unglazed
Area Pro, smooth, 10 x 20, 10 x 30 and 10 x 60 cm, unglazed
Micro, structured, 10 x 60 cm, unglazed
Strata, smooth, 10 x 30, 10 x 60 cm, unglazed

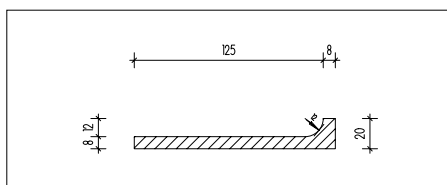

Cove Skirting 10 x 25, 10 x 50 and 10 x 60 cm

Fitting to:

Ascona, strukturiert, 10 x 25, 10 x 50, 10 x 60 cm, glazed
Nova, smooth, 10 x 60 cm, glazed
Quarzit, strukturiert, 10 x 60 cm, glazed

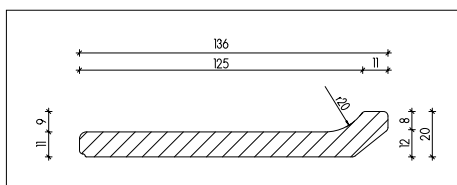

Cove Skirting 12.5 x 25 cm

Fitting to:

Chroma unglazed, smooth, 12.5 x 25 cm, unglazed

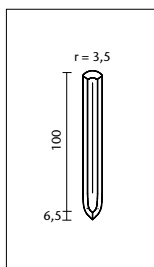

Cove Skirting 12.5 x 25 cm

Fitting to:

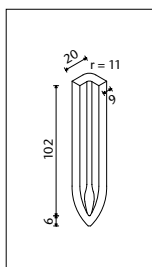

Ferrum, smooth, 12.5 x 25 cm, unglazed
Eladuct, smooth, 25 x 25 cm, 355S unglazed

Internal Corner

Fitting to
cove skirting:

Plural non-slip,
10 x 10 cm, glazed

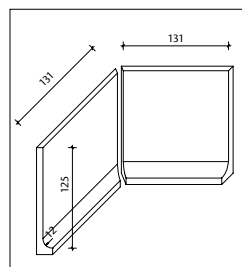

Fitting to
cove skirting:

Area Pro,
10 x 10, 10 x 20, 10 x 30,
10 x 60 cm, unglazed

Emotion GRIP,
10 x 20 and 10 x 30 cm, unglazed

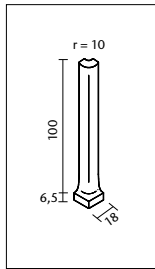

Basis 3,
10 x 20 cm, unglazed

Fitting to
cove skirting:

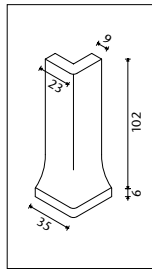

Chroma unglazed,
12.5 x 25 cm, unglazed

External corner

Fitting to
cove skirting:

Plural non-slip,
10 x 10 cm, glazed

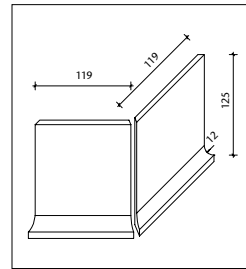

Fitting to
cove skirting:

Area Pro,
10 x 10, 10 x 20, 10 x 30,
10 x 60 cm, unglazed

Emotion GRIP,
10 x 20 and 10 x 30 cm,
unglazed

Basis 3,
10 x 20 cm, unglazed

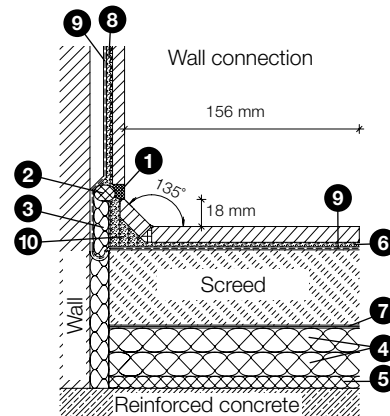

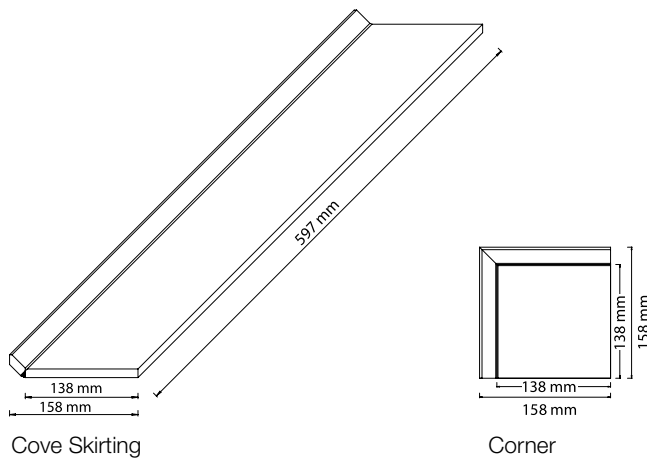

Fitting to
cove skirting:

Chroma unglazed,
12.5 x 25 cm, unglazed

Cove skirtings, cut/glued 15 x 60 cm and internal corners 15 x 15 cm

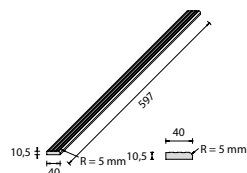

Details: Can be manufactured from any tiles/panels. The look and the haptics correspond to those of the adjoining surface, i.e. both the same structure and the same color are guaranteed. Minimum order quantity for the skirtings: 50 pieces; corner: 50 pieces.

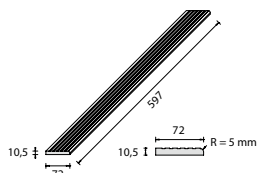

- 1 UW Silicone
- 2 Closed-cell PE foam cord or separating foil
- 3 Water-resistant elastic filling material
- 4 Heat insulation, rigid foam
- 5 Footfall sound insulation, soft
- 6 Mortar / adhesive
- 7 Sliding layer, PE foil
- 8 Thin-bed laying on rendering
- 9 Base-bonded sealing layer
- 10 Solid backfill

Regulations / Standards

Steps

Gradient ratio (s/a)

The dimensions of the treads and risers depend on the length of stride. For adults, this is between 59 and 65 cm. Ideally, all stairs in the building should have the same rise ratio. However, this should always be the case within individual flights of stairs.

Step dimension formula: $62 \text{ cm} \leq 2s + a \leq 65 \text{ cm}$

Safety formula: $45 \text{ cm} \leq a + s \leq 47 \text{ cm}$

Comfort formula: $a - s \approx 12 \text{ cm}$

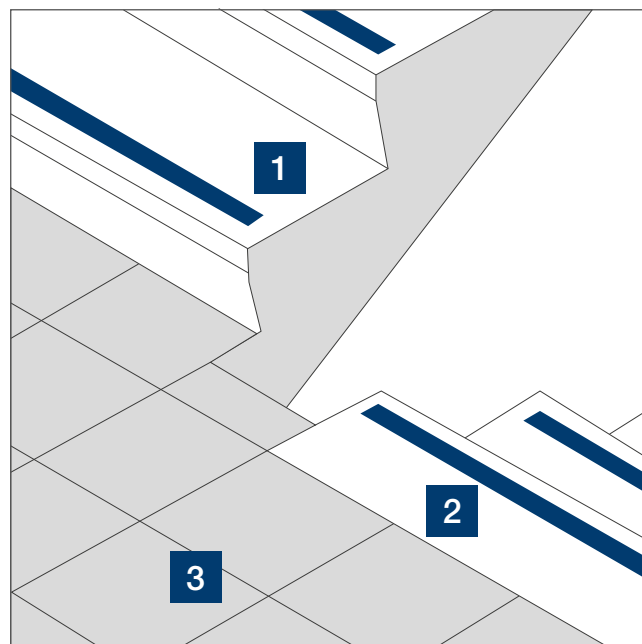

Step designs

1. Closed risers with an undercut $\leq 3 \text{ cm}$ are among the safest types of steps.
2. Vertically closed steps with short treads can be dangerous when walking downstairs if the tread area is too small. When walking upstairs, they harbour the risk of tripping by getting stuck.
3. For open risers: undercut $\geq 3 \text{ cm}$ and openings $< \varnothing 12 \text{ cm}$

Stair treads

The following designs have proven to be effective in preventing tripping or injuries when falling on stairs:

1. Bevelled/chamfered leading edge $\leq 10 \text{ mm}$
2. Rounded leading edge: $2 \text{ mm} \leq r \leq 5 \text{ mm}$

Visibility of tread edges / leading edges

Highlighting the leading edges of steps using additional systems can help to prevent tripping or slipping on the edge as a safety measure. In addition, leading edges **1** and **2** should contrast with the rest of the floor covering **3**.

Make visible through:

- Color and light/dark contrasts
- Change of material

Non-slip and Hytect

Slip-resistance classes R10 and R11 as well as variants with grooves ensure a safe tread even in wet conditions. The Hytect surface finish reduces cleaning effort to a minimum, degrades air pollutants and odours, and has an antibacterial effect without chemical substances – an important criterion when stairs are not only walked on, but also used for lingering on or learning, for example in schools.

Standards (D)

The individual stair elements must be easily recognisable for visually-impaired people.

This is achieved, for example, by step markings:

- 4 cm to 5 cm wide on treads
- min. 1 cm, better 2 cm, on risers

A tactile guide tile should be positioned at the beginning and end.

Special pieces – patio tiles

Matching special pieces – e.g. for stairs, projections or pool surrounds – enable a perfect design of the outdoor area. No matter which structural challenges have to be met: special pieces are available in all series on request. They serve as a completion and ensure uncomplicated laying. Furthermore, other designs with regard to edge formation and additional formats are also possible.

Patio tile with rounded edge on one side, 60 x 60 cm

Patio tile with corneradjacent rounded edges, 60 x 60 cm

Patio tile with rounded edge on one side and grooves, 60 x 60 cm

Patio tile step with nosing, 30 x 60 cm

Patio tile step with nosing as corner solution, 60 x 60 cm

Patio tile with rounded edge on one side and grooves as corner solution (2 pieces), 30 x 60 cm

1. Construction Products Regulation (CPR)

The CPR distinguishes itself from the previous Construction Products Directive (CPD) above all by the Declaration of Performance, CE marking as well as assessment and verification of the constancy of performance of the product concerned.

Construction products brought into circulation after 1 July 2013 must comply with the CPR. "Bringing into circulation" means that a construction product is made available on the European market for the first time by the manufacturer. We would like to point out that the term of "provision" is delineated from that; it means the passing on of a construction product brought into circulation in the supply chain, e.g. from the specialist tile trade to end consumers.

Essential characteristics of a construction product – here ceramic tiles – are defined in Annex ZA of the harmonised standard DIN EN 14411.

2. CE marking

With the CE marking, the manufacturer indicates that it assumes responsibility for the conformity of the construction product with the performance stated in the Declaration of Performance as well as compliance with all relevant European legal regulations.

Furthermore, it is responsible for making sure that the CE marking is applied to the actual construction product, to a label or on the packaging. The CE marking is the sole conformity identification for all essential characteristics of a construction product. Additional marks may only be used for aspects which – in our case – are not regulated by DIN EN 14411.

3. Declaration of Performance

As of 1 July 2013, every manufacturer is obliged to establish a Declaration of Performance for each of its construction products. It thereby assumes responsibility for the conformity of the construction product with the declared performance. The Declaration of Performance replaces the former Declaration of Conformity.

The technical documentation of the manufacturer serves as basis for the Declaration of Performance. Among other things, it includes the results of the in-plant production controls such as e.g. initial tests.

The Declaration of Performance has to be provided with an arbitrary reference number by the manufacturer to which the CE marking refers, thus permitting unambiguous identification of the construction product.

The Declaration of Performance can be made available in printed or electronic form (e.g. by e-mail, CD or USB stick).

In addition, the Declarations of Performance for the construction products of Agrob Buchtal GmbH are to be found at www.agrob-buchtal.de/leistungserklaerung. Alternatively, you can scan this QR code:

Project: Bildungspark Schweizerischer Plattenverband / Location: Dagmersellen, Switzerland / Architect: Amberg Architekten AG, Sursee, Switzerland
Series: Craft / Photo: Adriano Faragulo

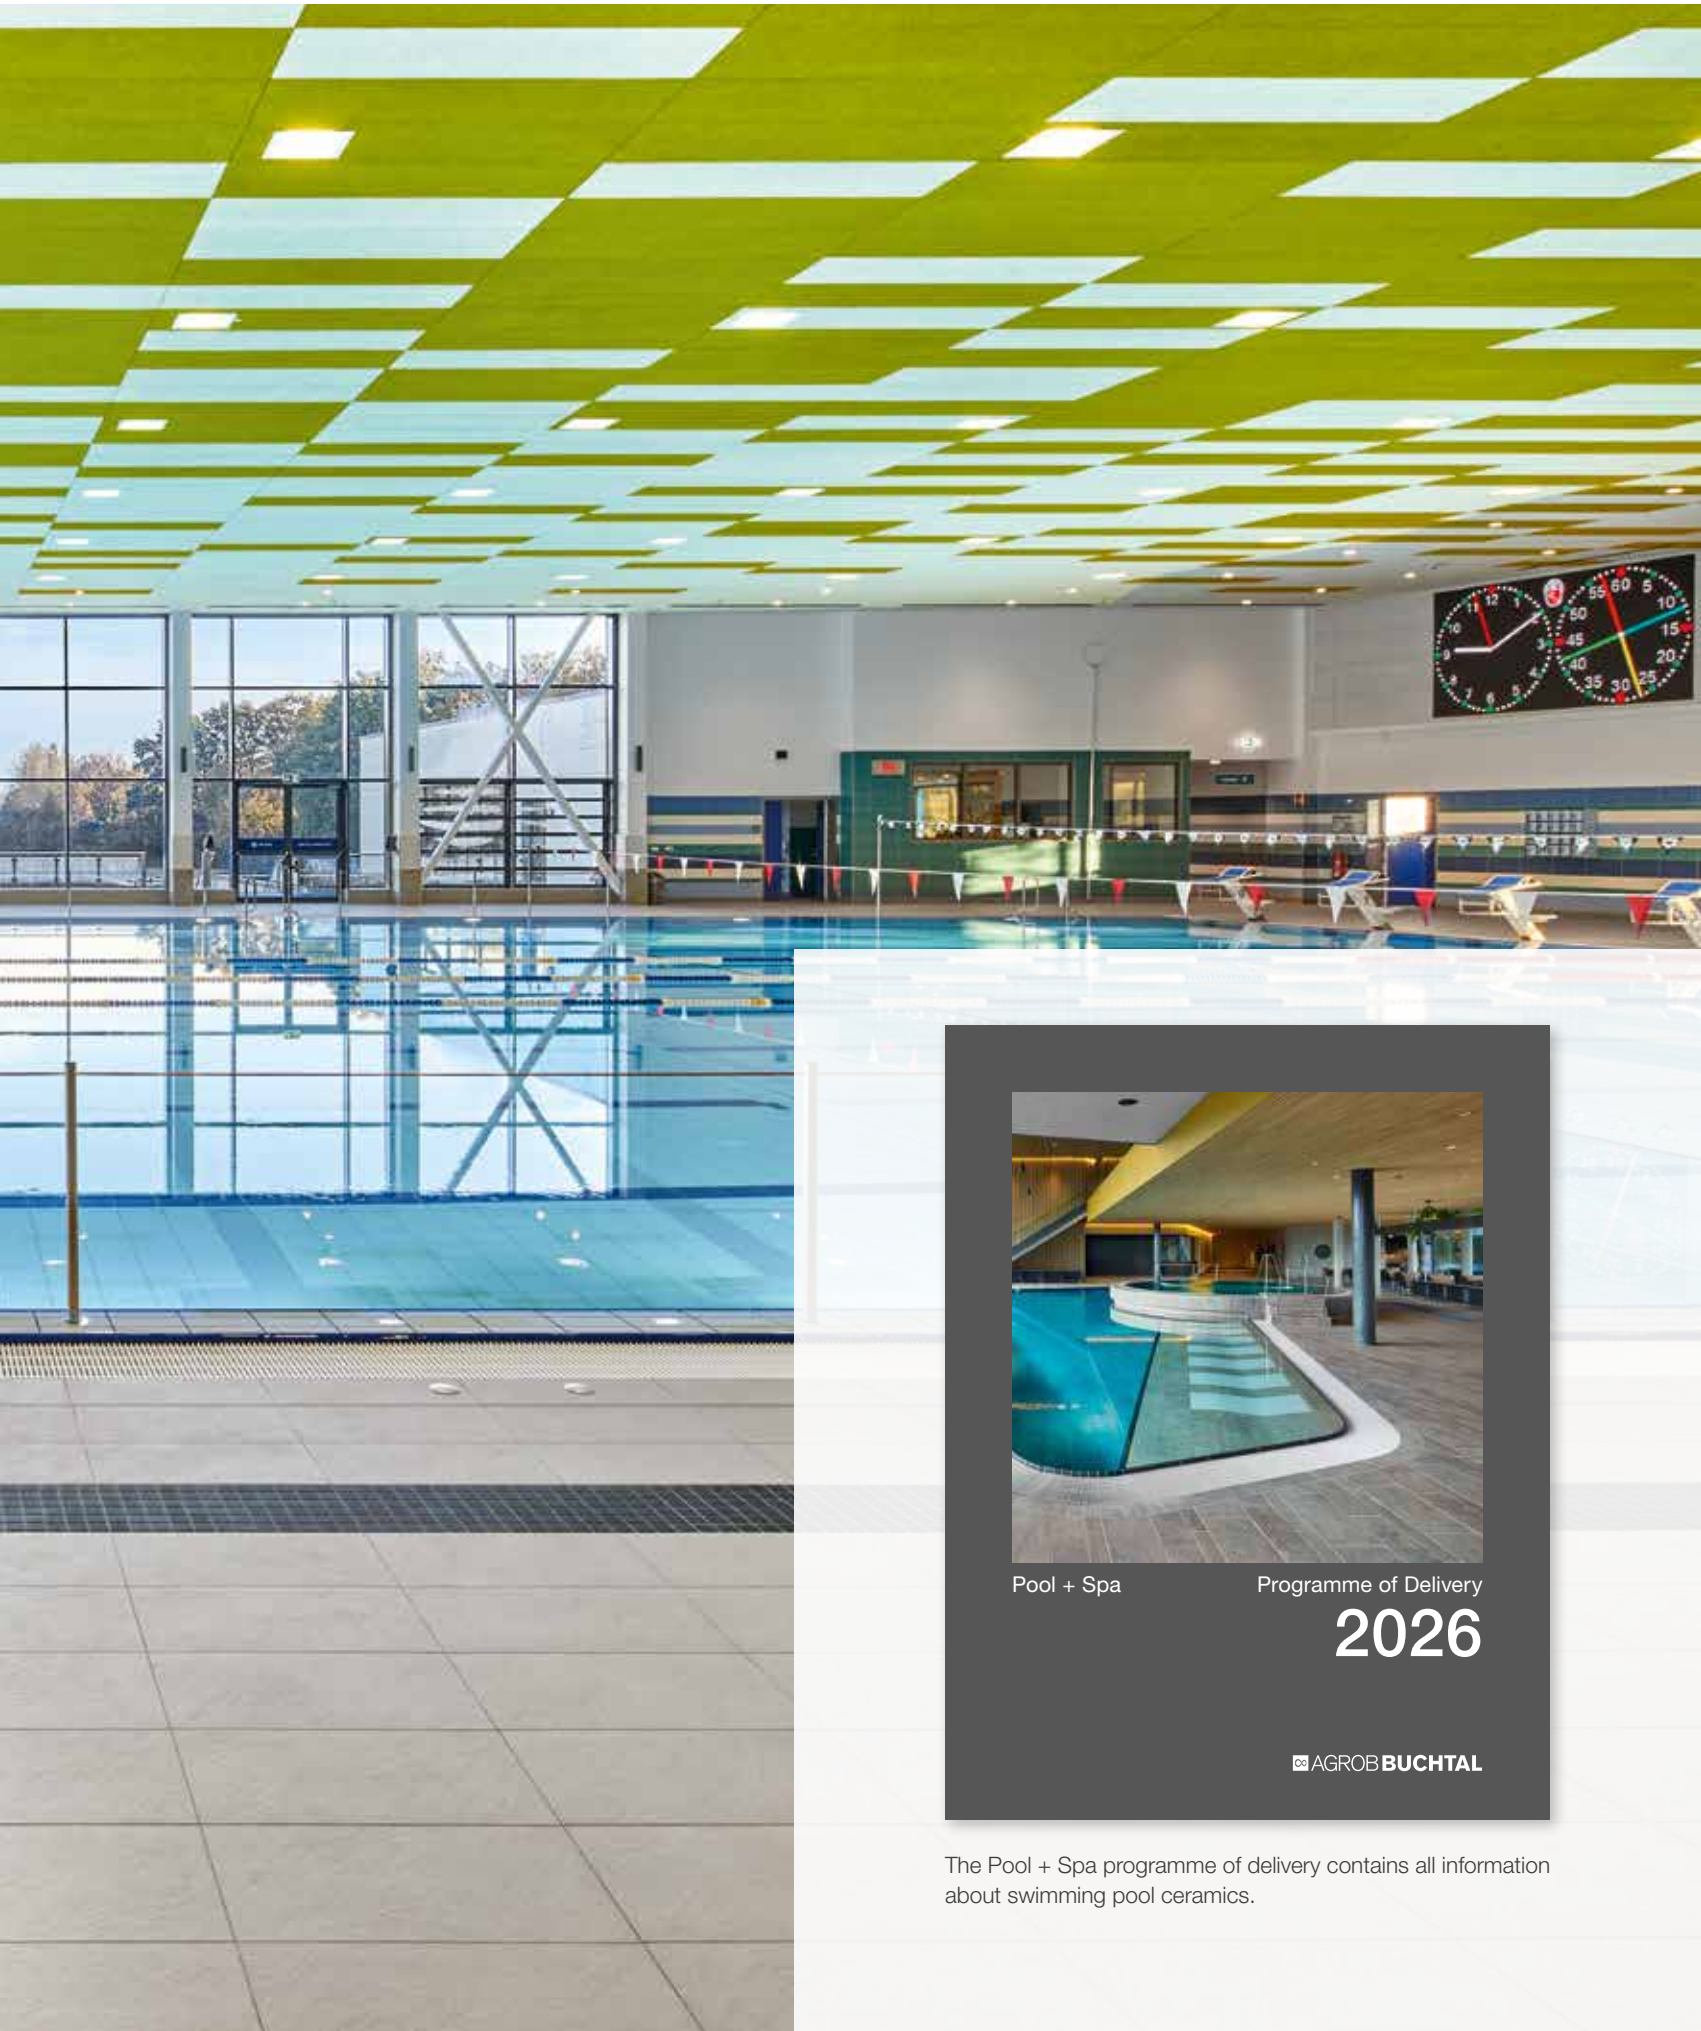

Residential building, Nacka Strand, Sweden / Architect: DinellJohansson
Series: Craft / Photo: Dinell Johansson

The image shows the front cover of a brochure or programme. It features a photograph of a curved swimming pool area with a modern interior design. Below the photo, the text 'Pool + Spa' and 'Programme of Delivery' are printed. The year '2026' is prominently displayed in large white digits. At the bottom right, the AGROB BUCHTAL logo is visible.

The Pool + Spa programme of delivery contains all information about swimming pool ceramics.

Easy to find

Each individual series is always represented as follows:

- Color chart
- Short description
- Product specifications

- Series name;** sort of material (see page 501) and relevant product standard (see page 503)
- Schematic arrangement of the models** from left to right: Standard models from small to large: in the case of extruded split tiles, at first rectangular and then square models from small to large, fittings/special pieces

- Peculiarities** of the model

- Model number** (only in the case of extruded split tiles)

- Nominal dimensions** = work size + recommended joint width in centimetres and inches
Work size = only material dimensions without joint

- Surface quality**

- Logistic **product specifications**

- Product standard**

- Slip-resistance classification:**
Barefoot areas/public and industrial areas (see pages 11 and 508 and the following)

- Stress groups 1-5;** orientation help for the industrial and commercial sector (see page 504 and the following)

- Article number**

- Abrasion**
In the case of glazed materials according to stress groups 1 - 5; (see page 505)

- Designation and/or number of color**

- Price group** (pricing unit in brackets)

- Color Shade Variation**
("Color shade variation" refers to the variations in color between the tiles of a certain color, i.e. the degree of shading. Our products are classified into 4 shading coefficients.)

V0	No variation / no play of colors
V1	Low variation / low play of colors
V2	Medium variation / medium play of colors
V3	High variation / high play of colors
V4	Strong variation / strong play of colors
