EQUIPE

Compromiso con la sostenibilidad

En Equipe Cerámicas entendemos la sostenibilidad en sus tres vertientes: ambiental, social y de gobernanza

**Cuidado del medio ambiente:** Nos esforzamos por minimizar nuestro impacto ambiental mediante el uso eficiente de los recursos, la reducción de emisiones y la adopción de prácticas responsables que garanticen la preservación del planeta para las futuras generaciones.

**Compromiso social:** Creemos en la importancia de promover la igualdad, la inclusión y el desarrollo comunitario. A través de iniciativas que fomentan la educación, la diversidad y el bienestar, buscamos ser un agente de cambio positivo en la sociedad.

**Gobernanza responsable:** Operamos con ética y transparencia, integrando buenas prácticas en la toma de decisiones y garantizando el cumplimiento de normativas que respalden nuestro compromiso con la sostenibilidad.

Este enfoque holístico nos permite no solo generar valor para nuestros clientes y accionistas, sino también contribuir activamente a un futuro más sostenible y equitativo.

En EQUIPE estamos comprometidos con la sostenibilidad y la integramos en nuestras operaciones diarias, promoviendo la eficiencia energética, la reducción de residuos y el uso responsable de los recursos. El enfoque de EQUIPE está en generar un impacto positivo no solo en su entorno inmediato, sino también en la industria a la que pertenecemos.

Engagement en faveur du développement durable

Chez Equipe Cerámicas, nous comprenons la durabilité sous ses trois aspects : environnemental, social et de gouvernance.

**Prendre soin de l'environnement :** Nous nous efforçons de minimiser notre impact sur l'environnement en utilisant les ressources de manière efficace, en réduisant les émissions et en adoptant des procédures responsables qui garantissent la préservation de la planète pour les générations futures.

**Engagement social :** Nous croyons en l'importance de promouvoir l'égalité, l'inclusion et le développement communautaire. Grâce à des initiatives qui favorisent l'éducation, la diversité et le bien-être, nous cherchons à être un agent de changement positif dans la société.

**Gouvernance responsable :** nous agissons de manière éthique et transparente, en intégrant les meilleures pratiques dans la prise de décision et en veillant au respect des réglementations qui soutiennent notre engagement en faveur du développement durable.

Cette approche globale nous permet non seulement de créer de la valeur pour nos clients et nos actionnaires, mais aussi de contribuer activement à un avenir plus durable et plus équitable.

Chez EQUIPE, nous nous engageons en faveur du développement durable et l'intégrons dans nos activités quotidiennes, en encourageant l'efficacité énergétique, la réduction des déchets et l'utilisation responsable des ressources. EQUIPE s'efforce d'avoir un impact positif non seulement sur son environnement immédiat, mais aussi sur le secteur auquel nous appartenons.

Commitment to sustainability

At Equipe Cerámicas we understand sustainability in its three aspects: environmental, social and governance

**Care for the environment:** We strive to minimize our environmental impact through the efficient use of resources, the reduction of emissions and the adoption of responsible practices that guarantee the preservation of the planet for future generations.

**Social commitment:** We believe in the importance of promoting equality, inclusion and community development. Through initiatives that promote education, diversity and well-being, we seek to be an agent of positive change in society.

**Responsible governance:** We operate with ethics and transparency, integrating good practices in decision-making and ensuring compliance with regulations that support our commitment to sustainability.

This holistic approach allows us not only to generate value for our customers and shareholders, but also to actively contribute to a more sustainable and equitable future.

Chez EQUIPE, nous nous engageons en faveur du développement durable et l'intégrons dans nos activités quotidiennes, en encourageant l'efficacité énergétique, la réduction des déchets et l'utilisation responsable des ressources. EQUIPE s'efforce d'avoir un impact positif non seulement sur son environnement immédiat, mais aussi sur le secteur auquel nous appartenons.

Engagement für Nachhaltigkeit

Bei Equipe Cerámicas verstehen wir Nachhaltigkeit in ihren drei Aspekten: Umwelt, Soziales und Unternehmensführung.

**Umweltschutz:** Wir sind bestrebt, unsere Auswirkungen auf die Umwelt durch effiziente Ressourcennutzung, Emissionsreduzierung und die Einführung verantwortungsvoller Praktiken zu minimieren, die den Erhalt des Planeten für zukünftige Generationen sicherstellen.

**Soziales Engagement:** Wir glauben an die Bedeutung der Förderung von Gleichheit, Inklusion und gesellschaftlicher Entwicklung. Durch Initiativen zur Förderung von Bildung, Vielfalt und Wohlbefinden möchten wir als Motor für einen positiven Wandel in der Gesellschaft wirken.

**Verantwortungsvolle Unternehmensführung:** Wir handeln ethisch und transparent, integrieren bewährte Verfahren in die Entscheidungsfindung und stellen die Einhaltung von Vorschriften sicher, die unser Engagement für Nachhaltigkeit unterstützen.

Dieser ganzheitliche Ansatz ermöglicht es uns, nicht nur Werte für unsere Kunden und Aktionäre zu schaffen, sondern auch aktiv zu einer nachhaltigeren und gerechteren Zukunft beizutragen.

Bei EQUIPE engagieren wir uns für Nachhaltigkeit und integrieren diese in unsere täglichen Abläufe, indem wir Energieeffizienz, Abfallreduzierung und einen verantwortungsvollen Umgang mit Ressourcen fördern. Der Fokus von EQUIPE liegt darauf, nicht nur in seiner unmittelbaren Umgebung, sondern auch in der Branche, der wir angehören, positive Auswirkungen zu erzielen.

EQUIPE

Circular economy

At **EQUIPE**, we are aware of the **limits of natural resources**, which is why we apply the **circular economy to our production process**. Unlike the traditional linear approach of “take, make, dispose,” the circular economy proposes a system in which products, materials, and resources are kept in use for as long as possible, **minimizing waste and environmental impact**.

At the heart of the circular economy is the principle of closing the **life cycle** of products. This involves **designing goods and services that can be repaired, reused, recycled, or reconditioned**.

Instead of becoming **waste** at the end of their useful life, products **are reintegrated** into the economic cycle, generating **new value and minimizing the use of natural resources**.

Economía circular

En **EQUIPE** somos conscientes de los **límites de los recursos naturales**, por ello aplicamos la **economía circular a nuestro proceso productivo**, a diferencia del tradicional enfoque lineal de “tomar, hacer, desechar”, la economía circular propone un sistema en el que los productos, materiales y recursos se mantienen en uso el mayor tiempo posible, **reduciendo al mínimo los residuos y el impacto ambiental**.

En el núcleo de la economía circular está el principio de cerrar el **ciclo de vida** de los productos. Esto implica **diseñar bienes y servicios que puedan ser reparados, reutilizados, reciclados o reacondicionados**.

En lugar de convertirse en **residuos** al final de su vida útil, los productos **se reintegran** en el ciclo económico, generando **nuevos valores y minimizando el uso de recursos naturales**.

Kreislaufwirtschaft

Wir bei **EQUIPE** sind uns der Begrenztheit der **natürlichen Ressourcen bewusst** und wenden daher die **Kreislaufwirtschaft auf unseren Produktionsprozess an**. Im Gegensatz zum traditionellen linearen Ansatz „nehmen, herstellen, wegwerfen“ schlägt die Kreislaufwirtschaft ein System vor, in dem Produkte, Materialien und Ressourcen so lange wie möglich in Gebrauch bleiben, **wodurch Abfall und Umweltbelastung auf ein Minimum reduziert werden**.

Im Zentrum der Kreislaufwirtschaft steht das Prinzip, den **Lebenszyklus** von Produkten zu schließen. Dies bedeutet, **dass Güter und Dienstleistungen so gestaltet werden, dass sie repariert, wiederverwendet, recycelt oder wiederaufbereitet werden können**.

Anstatt am Ende ihrer **Lebensdauer** zu Abfall zu werden, werden die Produkte wieder in den Wirtschaftskreislauf zurückgeführt, wodurch **neue Werte geschaffen und der Verbrauch natürlicher Ressourcen minimiert werden**.

Économie circulaire

Chez **EQUIPE**, nous sommes conscients des **limites des ressources naturelles**. C’est pourquoi nous appliquons **l’économie circulaire à notre processus de production**. Contrairement à l’approche linéaire traditionnelle « prendre, fabriquer, jeter », l’économie circulaire propose un système dans lequel les produits, les matériaux et les ressources sont utilisés aussi longtemps que possible, **réduisant ainsi au minimum les déchets et l’impact environnemental**.

Au cœur de l’économie circulaire se trouve le principe de boucler le **cycle de vie** des produits. Cela implique de **concevoir des biens et des services qui peuvent être réparés, réutilisés, recyclés ou reconditionnés**.

Au lieu de devenir des **déchets** à la fin de leur durée de vie, les produits **sont réintégrés** dans le cycle économique, générant ainsi de **nouvelles valeurs et minimisant l’utilisation des ressources naturelles**.

The road to decarbonization:  
Electric Kiln

**EQUIPE CERÁMICAS** has developed and launched the project for **the first 100% electric kiln for manufacturing ceramic tiles**. This kiln has been in operation since May 2024, delivering the same quality and results as a gas kiln, but with **no direct CO2 emissions and lower energy consumption**.

Camino hacia la descarbonización:  
Horno Eléctrico

**EQUIPE CERÁMICAS** ha desarrollado y puesto en marcha el proyecto del **primer horno 100% eléctrico para la fabricación de baldosas cerámicas**, este horno está en funcionamiento desde mayo de 2024, dando la misma calidad y resultados que el de gas, pero con **ausencia de emisiones directas de CO2 y un menor consumo energético**.

Auf dem Weg zur Dekarbonisierung:  
Elektroofen für Keramikteile

**EQUIPE CERÁMICAS** hat das Projekt des ersten zu **100 % elektrischen Ofens für die Herstellung von Keramikfliesen entwickelt und umgesetzt**. Dieser Ofen ist seit Mai 2024 in Betrieb und liefert die gleiche Qualität und Ergebnisse wie ein Gasofen, **jedoch ohne direkte CO2-Emissionen und mit geringerem Energieverbrauch**.

Vers la décarbonisation :  
four électrique pour pièces céramiques

**EQUIPE CERÁMICAS** a développé et mis en œuvre le projet du **premier four 100 % électrique pour la fabrication de carreaux céramiques**. Ce four est en service depuis mai 2024 et offre la même qualité et les mêmes résultats que le four à gaz, mais **sans émissions directes de CO2 et avec une consommation énergétique moindre**.

¡Atención! Están fabricados usando esmaltes especiales con tendencia a tener un efecto craquelado natural y baja resistencia a ácidos, bases y productos de limpieza agresivos. No utilizar productos de limpieza agresivos. Se recomienda aplicar sellante antes del rejuntado.

Warning:They are made with special glazes that tend to have a natural crackle effect and low resistance to acids, alkalis and aggressive cleaning products. Do not use aggressive cleaning products. It is recommended to apply sealant before grouting.

Achtung! Sie werden mit Spezialglasuren hergestellt, die zu einem natürlichen Krakelien-Effekt neigen und nur geringe Beständigkeit gegen Säuren, Basen und aggressive Reinigungsmittel aufweisen. Keine aggressiven Reinigungsmittel verwenden. Es wird empfohlen, vor dem Verfugen eine Versiegelung aufzutragen.

Attention ! Ils sont fabriquées en utilisant des émaux spéciaux tendant à avoir un effet craquelé naturel et une faible résistance aux acides, bases et produits nettoyants agressifs. Ne pas utiliser de produits nettoyants agressifs. Il est recommandé d'appliquer du mastic avant de jointoyer.

⚠️ ¡Atención! Amber, Victorian Green y Cobalt fabricados usando esmaltes especiales con tendencia a tener un efecto craquelado natural y baja resistencia a ácidos, bases y productos de limpieza agresivos. No utilizar productos de limpieza agresivos. Se recomienda aplicar sellante antes del rejuntado.

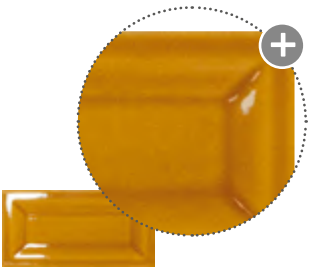

Warning: Amber, Victorian Green and Cobalt are made with special glazes that tend to have a natural crackle effect and low resistance to acids, alkalis and aggressive cleaning products. Do not use aggressive cleaning products. It is recommended to apply sealant before grouting.

Achtung! Amber, Victorian Green und Cobalt Spezialglasuren hergestellt, die zu einem natürlichen Krakelier-Effekt neigen und nur geringe Beständigkeit gegen Säuren, Basen und aggressive Reinigungsmittel aufweisen. Keine aggressiven Reinigungsmittel verwenden. Es wird empfohlen, vor dem Verfügen eine Versiegelung aufzutragen.

Attention ! Amber, Victorian Green and Cobalt fabriquées en utilisant des émaux spéciaux tendant à avoir un effet craquelé naturel et une faible résistance aux acides, bases et produits nettoyants agressifs. Ne pas utiliser de produits nettoyants agressifs. Il est recommandé d'appliquer du mastic avant de jointoyer.

¡Atención! Están fabricados usando esmaltes especiales con tendencia a tener un efecto craquelado natural y baja resistencia a ácidos, bases y productos de limpieza agresivos. No utilizar productos de limpieza agresivos. Se recomienda aplicar sellante antes del rejuntado.

Warning:They are made with special glazes that tend to have a natural crackle effect and low resistance to acids, alkalis and aggressive cleaning products. Do not use aggressive cleaning products. It is recommended to apply sealant before grouting.

Achtung! Sie werden mit Spezialglasuren hergestellt, die zu einem natürlichen Krakelien-Effekt neigen und nur geringe Beständigkeit gegen Säuren, Basen und aggressive Reinigungsmittel aufweisen. Keine aggressiven Reinigungsmittel verwenden. Es wird empfohlen, vor dem Verfugen eine Versiegelung aufzutragen.

Attention ! Ils sont fabriquées en utilisant des émaux spéciaux tendant à avoir un effet craquelé naturel et une faible résistance aux acides, bases et produits nettoyants agressifs. Ne pas utiliser de produits nettoyants agressifs. Il est recommandé d'appliquer du mastic avant de jointoyer.

⚠️ ¡Atención! Están fabricados usando esmaltes especiales con tendencia a tener un efecto craquelado natural y baja resistencia a ácidos, bases y productos de limpieza agresivos. No utilizar productos de limpieza agresivos. Se recomienda aplicar sellante antes del rejuntado.

Warning: They are made with special glazes that tend to have a natural crackle effect and low resistance to acids, alkalis and aggressive cleaning products. Do not use aggressive cleaning products. It is recommended to apply sealant before grouting.

Achtung! Sie werden mit Spezialglasuren hergestellt, die zu einem natürlichen Krakelien-Effekt neigen und nur geringe Beständigkeit gegen Säuren, Basen und aggressive Reinigungsmittel aufweisen. Keine aggressiven Reinigungsmittel verwenden. Es wird empfohlen, vor dem Verfugen eine Versiegelung aufzutragen.

Attention ! Ils sont fabriquées en utilisant des émaux spéciaux tendant à avoir un effet craquelé naturel et une faible résistance aux acides, bases et produits nettoyants agressifs. Ne pas utiliser de produits nettoyants agressifs. Il est recommandé d'appliquer du mastic avant de jointoyer.

⚠ ¡Atención! Están fabricados usando esmaltes especiales con tendencia a tener un efecto craquelado natural y baja resistencia a ácidos, bases y productos de limpieza agresivos. No utilizar productos de limpieza agresivos. Se recomienda aplicar sellante antes del rejuntado.

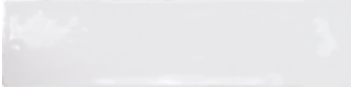

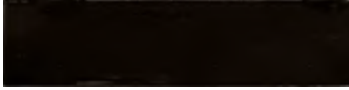

Warning:They are made with special glazes that tend to have a natural crackle effect and low resistance to acids, alkalis and aggressive cleaning products. Do not use aggressive cleaning products. It is recommended to apply sealant before grouting.

Achtung! Sie werden mit Spezialglasuren hergestellt, die zu einem natürlichen Krakelien-Effekt neigen und nur geringe Beständigkeit gegen Säuren, Basen und aggressive Reinigungsmittel aufweisen. Keine aggressiven Reinigungsmittel verwenden. Es wird empfohlen, vor dem Verfugen eine Versiegelung aufzutragen.

Attention ! Ils sont fabriqués en utilisant des émaux spéciaux tendant à avoir un effet craquelé naturel et une faible résistance aux acides, bases et produits nettoyants agressifs. Ne pas utiliser de produits nettoyants agressifs. Il est recommandé d'appliquer du mastic avant de jointoyer.

¡Atención! Están fabricados usando esmaltes especiales con tendencia a tener un efecto craquelado natural y baja resistencia a ácidos, bases y productos de limpieza agresivos. No utilizar productos de limpieza agresivos. Se recomienda aplicar sellante antes del rejuntado.

Warning:They are made with special glazes that tend to have a natural crackle effect and low resistance to acids, alkalis and aggressive cleaning products. Do not use aggressive cleaning products. It is recommended to apply sealant before grouting.

Achtung! Sie werden mit Spezialglasuren hergestellt, die zu einem natürlichen Krakelien-Effekt neigen und nur geringe Beständigkeit gegen Säuren, Basen und aggressive Reinigungsmittel aufweisen. Keine aggressiven Reinigungsmittel verwenden. Es wird empfohlen, vor dem Verfugen eine Versiegelung aufzutragen.

Attention ! Ils sont fabriquées en utilisant des émaux spéciaux tendant à avoir un effet craquelé naturel et une faible résistance aux acides, bases et produits nettoyants agressifs. Ne pas utiliser de produits nettoyants agressifs. Il est recommandé d'appliquer du mastic avant de jointoyer.

¡Atención! Están fabricados usando esmaltes especiales con tendencia a tener un efecto craquelado natural y baja resistencia a ácidos, bases y productos de limpieza agresivos. No utilizar productos de limpieza agresivos. Se recomienda aplicar sellante antes del rejuntado.

Warning: They are made with special glazes that tend to have a natural crackle effect and low resistance to acids, alkalis and aggressive cleaning products. Do not use aggressive cleaning products. It is recommended to apply sealant before grouting.

Achtung! Sie werden mit Spezialglasuren hergestellt, die zu einem natürlichen Krakeller-Effekt neigen und nur geringe Beständigkeit gegen Säuren, Basen und aggressive Reinigungsmittel aufweisen. Keine aggressiven Reinigungsmittel verwenden. Es wird empfohlen, vor dem Verfugen eine Versiegelung aufzutragen.

Attention ! Ils sont fabriqués en utilisant des émaux spéciaux tendant à avoir un effet craquelé naturel et une faible résistance aux acides, bases et produits nettoyants agressifs. Ne pas utiliser de produits nettoyants agressifs. Il est recommandé d'appliquer du mastic avant de jointoyer.

no aplicable · not applicable · nicht anwendbar · non applicable

¡Atención! Están fabricados usando esmaltes especiales con tendencia a tener un efecto craquelado natural y baja resistencia a ácidos, bases y productos de limpieza agresivos. No utilizar productos de limpieza agresivos. Se recomienda aplicar sellante antes del rejuntado.

Warning: They are made with special glazes that tend to have a natural crackle effect and low resistance to acids, alkalis and aggressive cleaning products. Do not use aggressive cleaning products. It is recommended to apply sealant before grouting.

Achtung! Sie werden mit Spezialglasuren hergestellt, die zu einem natürlichen Krakelier-Effekt neigen und nur geringe Beständigkeit gegen Säuren, Basen und aggressive Reinigungsmittel aufweisen. Keine aggressiven Reinigungsmittel verwenden. Es wird empfohlen, vor dem Verfugen eine Versiegelung aufzutragen.

Attention ! Ils sont fabriquées en utilisant des émaux spéciaux tendant à avoir un effet craquelé naturel et une faible résistance aux acides, bases et produits nettoyants agressifs. Ne pas utiliser de produits nettoyants agressifs. Il est recommandé d'appliquer du mastic avant de jointoyer.

Serie compuesta de dos piezas:  
una circular de 43 cm de diámetro  
"SFERA", y una triangular curva "TEE",  
destinada a rellenar los espacios entre  
círculos formando una red hexagonal.

Producción bajo pedido por proyecto.  
Disponibilidad para la realización de  
colores y acabados personalizados.

This collection is made up of two  
parts, a circle with a diameter of 43 cm  
"SFERA" and a curved triangle "TEE",  
designed to fill the gaps between the  
circles forming a hexagonal network.

Manufacturing is done on request by  
project. Availability for the realization  
of custom colours and finishes.

Serie bestehend aus zwei Teilen,  
nämlich einem runden mit 43 cm  
Durchmesser „SFERA“ und einem  
gebogenen Dreieckteil „TEE“, mit  
dem der freie Raum zwischen den  
Kreisen ausgefüllt wird, sodass ein  
sechseckiges Netz entsteht.

Produktion auf Bestellung pro Projekt.  
Verfügbarkeit zur Herstellung in  
individuell gestalteten Farben und  
Ausführungen.

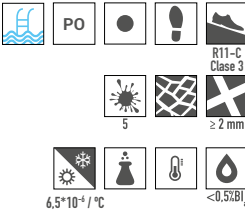

Cette série se compose de deux pièces  
bien différenciées: une pièce circulaire  
de 43 cm de diamètre «Sfera» et une  
courbe circulaire «TEE», spécialement  
conçue pour remplir les espaces  
entre cercles en formant un réseau  
hexagonal.

Fabrication se fait sur demande  
par projet. Disponibilité pour la  
réalisation des couleurs et des finitions  
personnalisées.

I\_ RECEPCIÓN DEL MATERIAL

Si existe un problema debido a un defecto de las baldosas, se debe detectar siempre **ANTES DE LA INSTALACIÓN**, por lo que es imprescindible una revisión del material previa a la ejecución de la obra, puesto que no se admitirán **EN NINGÚN CASO** reclamaciones de costes de arrancado o colocación.

Si va a colocar bases y piezas especiales y/o decorados, compruebe que el tono de todo es compatible, teniendo en cuenta que se pueden presentar ligeras diferencias de tono sin que esto afecte al resultado final.

**ATENCIÓN:** Ante cualquier duda, deje de colocar el material y póngase en contacto con el distribuidor que le vendió las baldosas. ¡Los problemas son siempre mucho más fáciles de solucionar si las piezas no están colocadas!

No utilizar los productos de pasta blanca para pavimento, ni en exteriores.

II \_ INSTALACIÓN

1 - Superficie de colocación

Antes de la instalación se comprobará que la superficie que recibirá el material de agarre esté completamente limpia. Es necesario esté perfectamente seca, aplomada, nivelada y plana (menos de 3 mm de desviación en 2m<sup>2</sup>, en cualquier dirección). También ha de tener una aceptable cohesión y estabilidad.

Los soportes sensibles al agua (por ejemplo, madera) pueden requerir una imprimación impermeabilizante. Si va a colocar capas intermedias de aislamiento, impermeabilización, o suelo radiante, consulte las instrucciones de colocación particulares para estos productos.

2 - Selección de materiales de agarre

Generalmente se utilizarán adhesivos cementosos tipo C2.

No recomendamos el uso de morteros de cemento/cal para colocar nuestros productos. Para colocaciones en pared con adhesivos cementosos, es recomendable que tengan un desplazamiento vertical reducido (T).

Para información más detallada, disponemos de tablas de materiales de agarre según el tipo de instalación para cada una de nuestras series en **www.equipceramicas.com**.

De todas formas, siempre es buena idea consultar con el fabricante o el distribuidor del material de agarre el tipo de producto a utilizar en cada caso.

3 - Colocación de las baldosas

3.1 Antes de empezar

Utilice todos los materiales y herramientas de acuerdo con las instrucciones del fabricante. Limpie bien la superficie antes de empezar.

No humectar las baldosas con agua antes de la instalación.

Se deberá usar siempre el método de colocación con capa delgada.

Coloque las piezas con una junta de 1,5 mm (pasta blanca) ó 2 mm (porcelánico) como mínimo. Señale las juntas de movimiento intermedias, si son necesarias.

- Para las piezas que tienen un lado de más de 30 cm, o de formato especial, es altamente recomendable la colocación con doble encolado.
- Para las piezas de 40 cm de largo, en colocaciones con junta trabada, el desplazamiento máximo ha de ser de 1/3 de la longitud de la pieza, nunca a mitad de pieza.
- Las baldosas de pavimento han de quedar a una distancia mínima de 5 mm de la pared o de cualquier otro elemento constructivo que delimite su potencial movilidad.

3.2 Asentamiento de las baldosas

Extienda el adhesivo sobre la superficie de colocación,

utilizando la parte recta de la llana, en una zona reducida, según el tiempo abierto del adhesivo.

Después, peine esta capa de adhesivo, usando la parte dentada de la llana siempre en línea recta, en dirección perpendicular a una arista de la baldosa. Este peinado se hace para conseguir un espesor uniforme de la capa de adhesivo, y sobre todo para lograr una máxima humectación del dorso de las piezas al colocarlas.

Es momento ya de colocar y asentar la baldosa, asegurándose de que se hace dentro del tiempo abierto del adhesivo en las condiciones reales de la obra. Compruebe cada pieza antes de colocarla, para asegurarse de que no tiene ningún defecto.

La forma más efectiva de asentar las baldosas es el llamado **Método Tarver**:

- Asiente la pieza en su posición más o menos definitiva, teniendo en cuenta la anchura de la junta de colocación (mínimo 1,5 mm en pasta blanca ó 2 mm porcelánico).
- Desplace la baldosa, en dirección perpendicular a los surcos del peinado del adhesivo, y en sentido contrario a la baldosa adyacente, una distancia equivalente a la anchura del diente de la llana.
- Vuelva a desplazar la baldosa en sentido contrario hasta su posición inicial, ajustando su ubicación definitiva teniendo en cuenta las juntas de colocación.

Con este método conseguirá que el aire que queda en los surcos del adhesivo salga sin problemas por los extremos.

Una vez en el sitio, compruebe que la nueva pieza queda en el mismo plano que el resto ya colocadas, sin ninguna punta por encima o por debajo. Puede ayudarse con una plancha de goma rígida y limpia, y batiendo sobre la misma con un martillo de goma.

Las correcciones de la posición de las piezas deben hacerse dentro del tiempo de ajuste del adhesivo.

Limpie el exceso de adhesivo que puede haberse acumulado en los espacios de las juntas al colocar las baldosas, antes de que se endurezca, para poder realizar posteriormente un correcto rejuntado. Limpie también los restos de adhesivos en la cara vista de las baldosas.

4 - Selección de materiales de rejuntado

La elección del tipo de material de rejuntado a utilizar dependerá del uso que se vaya a dar a la superficie cerámica y de la anchura de la junta a rellenar. Recomendamos consultar con el fabricante del material de rejuntado el tipo de material más adecuado en cada caso. Lo más habitual es utilizar materiales tipo CG2. No utilice lechada de cemento como material de rejuntado.

Es recomendable utilizar materiales de rejuntado impermeables al agua. Lo más habitual es usar materiales de rejuntado de color blanco o gris, pero puede utilizar materiales coloreados, según el color de las baldosas, o para contrastar con ellas.

En cualquier caso, no utilizar materiales coloreados con negro de humo (carbón micronizado), pues los restos que dejan sobre las piezas son muy difíciles de limpiar.

5 - Rejuntado (juntas de colocación)

Antes de empezar el rejuntado deberá esperar el tiempo indicado por el fabricante del adhesivo que haya usado para colocar las baldosas. Utilice todos los materiales y herramientas de acuerdo con las instrucciones del fabricante.

Compruebe que las juntas de colocación están vacías y limpias de materiales de agarre, que están secas y que tienen una profundidad uniforme e igual al espesor de las baldosas. La aplicación del material de rejuntado se realizará según las instrucciones del fabricante.

Si ha colocado piezas con efecto craquelé es recomendable aplicarles un sellador antes de rejuntarlas.

Respete el tiempo indicado por el fabricante del material de rejuntado antes de la primera limpieza.

6 - Corte y perforación

Existe una amplia variedad de herramientas y accesorios en el mercado para realizar todas las operaciones de corte y taladrado necesarias durante la colocación. Para la mayoría de cortes de piezas planas, la cortadora manual hará un papel perfecto.

Los agujeros redondos los conseguirá más fácilmente con un taladro eléctrico (sin percutor) y una broca de diamante del diámetro necesario, manteniendo la baldosa bien fija en un soporte, y refrigerando la broca con agua durante el proceso. Los ingletes se pueden hacer también con el cortador manual y la herramienta adecuada, aunque el resultado es siempre mejor con un cortador eléctrico.

Para cortes en piezas con relieve o piezas especiales utilice siempre un cortador eléctrico.

III \_ LIMPIEZA Y MANTENIMIENTO

1 - Limpieza al finalizar la obra

Para colocaciones de pavimento, es habitual que haya bastante polvo en el suelo, por lo que lo primero que tendrá que hacer es barrer la superficie cuidadosamente.

Después, en la mayoría de los casos basta la limpieza con una solución ácida diluida (por ejemplo vinagre) para eliminar los restos de cemento que hayan podido quedar.

Existen, además, productos comerciales específicos para la limpieza de cemento, pero debe usarlos con precaución ya que normalmente tienen concentraciones de ácido elevadas.

Como norma general, tenga siempre en cuenta las siguientes precauciones:

- Nunca utilice un producto ácido si el material de agarre o de rejuntado no ha fraguado, porque puede deteriorar las juntas o dejar compuestos insolubles sobre la superficie.
- Lea detenidamente y respete las instrucciones de uso y recomendaciones descritas por los fabricantes de los productos de limpieza.
- Antes de utilizar un agente de limpieza, es conveniente que comprue be su efecto sobre las baldosas y el material de rejuntado.
- Proteja las superficies donde no hay baldosas cerámicas.
- Para la limpieza de los productos brillantes y de las juntas de colocación no use en ningún caso estropajos, espartos u objetos punzantes.
- Recomendamos cambiar el agua de limpieza cada 15 m<sup>2</sup> aproximadamente.

Si ha utilizado una junta porosa, no impermeable, es recomendable que la proteja con un sellador para juntas, para protegerla de la suciedad y las manchas de humedad.

Para retirar la cera protectora de la cara vista de las piezas, utilice únicamente agua tibia y un paño húmedo. No use estropajos, espartos, rasquetas u objetos punzantes, que podrían rayar la superficie de las piezas. Igualmente, es recomendable utilizar un sellador para las piezas craqueladas.

En las piezas de color **Gold (Artisan), Silver y Gold (Lanse)Metallic y Electric Blue (Magical 3 y Scale), piezas Crackle (Masía), serie Menorca, piezas Reactive (Vitrail), Cobalt, Amber o Victorian (Evolution), Decor Raku y Decor Wadi**, no utilizar en ningún caso productos de limpieza agresivos, o utilizarlos siempre muy diluidos en agua y probando antes su efecto sobre las baldosas.

2 - Mantenimiento diario

Le va a ser muy fácil conservar nuestras baldosas como el primer día. Bastará con lavar periódicamente con agua tibia o una solución diluida de un detergente habitual.

Tenga en cuenta las consideraciones descritas en el apartado anterior (Limpieza al finalizar la obra).

I \_ RECEIVING THE TILES

If there is any problem related to defective tiles, it should detected **BEFORE INSTALLATION**, so it is completely necessary to check all tiles before installation. **WE WILL ABSOLUTELY NOT ACCEPT CLAIMS REGARDING INSTALLATION COSTS.**

If you are installing field tiles and special pieces, make sure that the tone of all products is compatible, taking in mind that there might be slight shade differences that will not affect the final result.

**ATTENTION:** If you have any doubt, stop laying the tiles and contact your tile supplier. Problems are always much easier to solve if tiles are not installed!

Do not use white body tiles for floors or in outdoors.

II \_ INSTALLATION

1 - Surface of installation

Before starting the laying of the tiles the surface must be completely clean, perfectly dry, vertical and plane (less than 3 mm deviation y 2 m<sup>2</sup> length, along any direction). The surface also has to be stable and must have a good cohesion.

The water-sensitive substrates (wood and chipboard, plaster and precast gypsum, etc.) may require a waterproofing primer. If you are installing intermediate layers (insulation or waterproofing), check instructions for these products before start tiling.

2 - Selecting bonding materials

Usually, cement bonding materials C2 are to be used. If wall tiles are being installed, it is better to use reduced vertical displacement (T) materials.

Check **www.equipceramicas.com** for detailed tables to choose the better bonding material, according to the kind of surface you are tiling.

Anyway, it is always a good idea to ask to the manufacturer or distributor of the bonding material for the most suitable material to be used.

3 - Tiling

3.1 Before you start

All products and tools must be used according to the manufacturer's instructions. Do a thorough cleaning of the installation Surface.

Do not submerge the tiles in water before installation.

Always install tiles following the thin-layer technique.

The laying joints must be at least 1.5 mm wide for white body tiles, and 2 mm wide for porcelain tiles. Set the movement intermediate joints, if necessary.

- For tiles that have a side being 30 cm long, it is highly recommendable to use the double-bonding method.
- For locked layings of tiles being 40 cm long, displacement between tiles must be 1/3 maximum. Do not lay tiles with the joint in the middle of their length.
- Floor tiles must be at least 5 mm away from the walls or any other element that might reduce their mobility.

3.2 Laying the tiles

Apply the adhesive on the laying surface, using the straight side of the notched trowel, in a small area, according to the open time of the adhesive.

Next, "comb" this adhesive, using the notched side of the trowel, creating straight lines, perpendicular to one side of the tiles.

Instrucciones de colocación  
Installation Instructions

III \_ Cleaning and maintenance

1 - Cleaning after finishing laying works

If tiles have been laid on the floor, they will probably have a lot of dust over, so the first thing you should do is to carefully sweep all the surface.

The ceramic surface may have a cement film on it. In most cases, using a diluted acid solution (vinegar, for example) is enough to remove it.

There are also specific commercial products for cleaning cement, but they should be used with caution as they usually have higher acid concentrations.

As a general rule, take always into account the following cautions:

- Never use an acid product on recently installed tiles.
- Carefully read and observe the instructions and recommendations given by the manufacturers of cleaning products.
- Before using a cleaning agent, test its effect on the ceramic tiles and grouts.
- Protect the surfaces where there are no ceramic tiles.
- Never use scrubbers or espartos to clean shiny tiles or grouts.
- Change cleaning water every 15 m<sup>2</sup> approximatelSi ha utilizado una junta porosa, no impermeable, es recomendable que la proteja con un sellador para juntas, para protegerla de la suciedad y las manchas de humedad.

If you used a porous grouting material, non waterproof, you may want to protect it with a grout sealer, specially if grouts are white of have a light colour.

To remove the protective wax in the glazed surface of tiles, use only warm water and a damp cloth. Do not use scrubbers, blades or sharp objects that could scratch the surface of the tiles.

If you installed crackle tiles, use also a sealer for the tiles.

For **Gold (Artisan), Silver y Gold (Lanse)Metallic y Electric Blue (Magical 3 y Scale), Crackle (Masía), Menorca, Reactive (Vitrail), Cobalt, Amber o Victorian (Evolution), Decor Raku y Decor Wadi**, colour tiles, do not use energetic cleaning products, or use them very diluted with water, and check their effect on the surface of the tiles before applying them.

2 - Daily maintenance

It is very easy to maintain our tiles. Just clean them usually with warm water or a dilute solution of a common detergent.

Take always into account the cautions described in "Cleaning after finishing laying works".

I \_ ENTGEGENNAHME DES MATERIALS

Sollte irgendwelche Probleme wegen fehlerhafter Fliesen bestehen, müssen diese immer **VOR DER VERLEGUNG**, festgestellt werden. Deshalb muss das Material auf jeden Fall vor Durchführung der Bauarbeiten genau geprüft werden, da **KEINESFALLS** Reklamationen für die Entfernung oder Verlegung der Fliesen zugelassen werden.

Wenn Grundfliesen und Sonderteile und/oder Dekorfliesen verlegt werden sollen, muss immer geprüft werden, ob alle Farbtöne zusammenpassen, wobei zu berücksichtigen ist, dass leichte Farbunterschiede vorhanden sein können, die sich jedoch nicht auf das Endergebnis auswirken.

**ACHTUNG:** Sollten irgendwelche Zweifel auftreten, stoppen Sie die Verlegung der Fliesen und wenden Sie sich an den Vertriebshändler, bei dem Sie die Fliesen gekauft haben. Derartige Probleme sind immer leichter zu lösen, wenn die Teile noch nicht verlegt sind!

Weißscherbenprodukte sind weder als Bodenfliesen noch in Außenbereichen geeignet.

II \_ VERLEGUNG

1 - Verlegungsfläche

Vor der Verlegung muss dafür gesorgt werden, dass die Fläche, auf der das Klebematerial aufgetragen werden soll, vollkommen sauber ist. Sie muss auf jeden Fall absolut trocken, senkrecht oder waagrecht ausgerichtet, nivelliert und ebenflächig sein (mit einer Abweichung in jeder Richtung von weniger als 3 mm auf 2 m<sup>2</sup>). Zudem muss sie eine geeignete Kohäsion und Stabilität besitzen.

Wasserempfindliche Untergründe (z. B. Holz) können evtl. eine wasserfeste Imprägnierung erforderlich machen. Wenn Zwischenschichten zur Isolierung oder Dichtung bzw. Fußbodenheizung angebracht werden sollen, lesen Sie bitte die speziellen Verlegungsanweisungen für solche Produkte nach.

2 - Wahl des Klebematerials

Normalerweise werden zementgebundene Kleber des Typs C2 verwendet.

Die Verwendung von Zement-/Kalkmörteln ist für die Verlegung unserer Produkte nicht empfehlenswert. Für die Verlegung an Wänden mit Zementklebern sollten diese ein geringes senkrechtes Abrutschverhalten (T) aufweisen.

Weitere Informationen finden Sie in den Klebertabellen je nach Verlegungsart für alle unserer Serien unter **www.equipeceramicas.com**.

Auf jeden Fall ist es auch immer eine gute Idee, sich beim Hersteller oder Vertriebshändler des Klebers zu erkundigen, welches Produkt für jeden einzelnen Fall verwendet werden sollte.

3 - Verlegung der Fliesen

3.1 Vor Beginn

Verwenden Sie alle Materialien und Werkzeuge gemäß den Herstelleranweisungen. Reinigen Sie die Fläche gut, bevor Sie mit der Verlegung beginnen.

Feuchten Sie vor dem Verlegen die Fliesen nicht mit Wasser an.

Die Verlegung sollte immer im Dünnbettverfahren erfolgen.

Bringen Sie die Fliesen mit einer Fuge von mindestens 1,5 mm (Weißscherben) bzw. 2 mm (Feinsteinzeug) an. Markieren Sie gegebenenfalls die dazwischenliegenden Bewegungsfugen.

- Für Fliesen mit Seitenlängen von über 30 cm oder mit Sonderformat ist es sehr empfehlenswert, sie im Buttering-Floating-Verfahren zu verlegen.
- Bei Fliesen mit einer Länge von 40 cm darf bei versetzter Verlegung die Verschiebung nicht mehr als 1/3 der Fliesenlänge, auf keinen Fall aber die Hälfte des Teils betragen.
- Bodenfliesen müssen in einem Mindestabstand von 5 mm von der Wand oder irgendeinem anderen Bauelement angebracht werden, das ihre

Bewegungsmöglichkeiten einschränkt.

3.2 Verlegen der Fliesen

Verteilen Sie den Kleber auf der zu verlegenden Fläche unter Verwendung der glatten Seite des Spachtels auf einem reduzierten Bereich, je nach Offenzeit des Klebers.

Kämmen Sie danach diese Kleberschicht mit der gezähnten Seite des Spachtels, immer in gerader Linie und im rechten Winkel zu einer Kante der Fliese. Mit diesem Kämmen soll eine einheitliche Stärke der Kleberschicht erreicht werden und vor allem eine optimale Befeuchtung der Fliesenrückseite.

Jetzt wird die Fliese aufgelegt und festgedrückt. Dabei ist darauf zu achten, dass dies innerhalb der Offenzeit des Klebers unter den tatsächlichen Bedingungen der Bauarbeiten erfolgt. Prüfen Sie jede Fliese, bevor Sie diese verlegen, um sicherzustellen, dass sie keinen Fehler aufweist.

Die effektivste Art, die Fliesen aufzulegen, ist das sog. Tarver-Verfahren:

- Legen Sie die Fliese an ihre mehr oder weniger endgültige Stelle und beachten Sie dabei die Breite der Verlegungsfuge (bei Weißscherben mindestens 1,5 mm und bei Feinsteinzeug 2 mm).
- Schieben Sie die Fliese im rechten Winkel zu den Rillen des gekämmten Klebers und in entgegengesetzter Richtung zu der benachbarten Fliese mit einem Abstand in der Breite des Spachtelzahns.
- Schieben Sie die Fliese wieder in entgegengesetzter Richtung bis zu ihrer ursprünglichen Stelle und passen Sie ihre definitive Position unter Berücksichtigung der Verlegungsfugen an.

Damit sorgen Sie dafür, dass die Luft, die zwischen den Rillen des Klebers verbleibt, problemlos an den Enden austreten kann.

Nachdem die Fliese an der richtigen Stelle liegt, prüfen Sie, ob das neue Teil sich auf derselben Ebene wie die anderen, zuvor verlegten Fliesen befindet, ohne dass eine Ecke höher oder tiefer liegt. Sie können dazu eine feste und saubere Gummiplatte verwenden und ggf. mit einem Gummihammer darauf schlagen.

Evtl. Positionskorrekturen der Fliesen müssen innerhalb der Einlegezeit des Klebers vorgenommen werden. Entfernen Sie überschüssigen Kleber, der sich möglicherweise beim Verlegen der Fliesen in den Zwischenräumen der Fugen angesammelt hat, bevor dieser hart wird, um später die Fugen richtig ausfüllen zu können. Reinigen Sie auch die Kleberreste auf der Fliesenoberfläche.

4 - Wahl des Fugenmaterials

Die Wahl des zu verwendenden Fugenmaterials ist abhängig von der vorgesehenen Benutzung der verfliesen Fläche und von der auszufüllenden Fugenbreite. Es ist ratsam, sich beim Hersteller des Fugenmaterials nach dem jeweils am besten geeigneten Material zu erkundigen. Das am häufigsten verwendete Material ist das des Typs CG2. Verwenden Sie keinen Zementschlamm als Fugenmaterial.

Es ist empfehlenswert, wasserfestes Fugenmaterial zu benutzen. Am häufigsten wird weißes oder graues Fugenmaterial verwendet, aber auch gefärbtes Material ist, entsprechend der Farbe der Fliesen oder auch dazu im Kontrast, durchaus üblich.

Auf keinen Fall sollte Fugenmaterial verwendet werden, das mit „Rauchschwärze“ (mikronisierter Kohle) gefärbt wurde, denn dessen Reste hinterlassen schwer zu reinigende Spuren auf den Fliesen.

5 - Verfugen (Verlegungsfugen)

Vor dem Verfugen muss die vom Hersteller des für die Verlegung verwendeten Klebers empfohlene Zeit abgewartet werden. Verwenden Sie alle Materialien und Werkzeuge gemäß den Herstelleranweisungen.

Stellen Sie sicher, dass die Verlegungsfugen leer und sauber von Klebematerial sind, dass sie trocken sind und eine einheitliche Tiefe haben, die der Stärke der Fliesen entspricht. Die Anwendung des Fugenmaterials sollte nach den Herstelleranweisungen erfolgen.

Wenn Sie Fliesen mit Craquelé-Effekt verlegt haben, ist das Auftragen eines Dichtungsmaterials vor dem Verfugen empfehlenswert.

Halten Sie die vom Hersteller des Fugenmaterials empfohlene Zeit vor der ersten Reinigung ein.

6 - Schnitt und Bohrung

Für die während der Verlegung erforderlichen Schnitte und Bohrungen gibt es viele verschiedene Werkzeuge und Zubehörteile auf dem Markt. Für die meisten Schnitte flacher Fliesen ist der Handschneider perfekt geeignet.

Runde Löcher können Sie am besten mit einer elektrischen Bohrmaschine (ohne Schlagbohrung) und einem Diamantbohrer mit dem erforderlichen Durchmesser erzielen. Befestigen Sie dazu die Fliese gut auf einer Halterung und kühlen Sie den Bohrer während der Arbeit mit Wasser. Gehrungen können ebenfalls mit dem Handschneider und dem geeigneten Werkzeug hergestellt werden, allerdings ist das Ergebnis mit einem elektrischen Fliesenschneider immer besser.

Zum Schneiden von Fliesen mit Relief oder Sonderteilen sollte immer ein elektrischer Fliesenschneider verwendet werden.

III \_ REINIGUNG UND PFLEGE

1 - Reinigung nach Abschluss der Bauarbeiten

Beim Verlegen von Bodenfliesen befindet sich normalerweise viel Staub auf dem Boden. Deshalb sollte als Erstes die Fläche sorgfältig gekehrt werden.

Anschließend ist in den meisten Fällen eine Reinigung mit einer säurehaltigen Lösung (zum Beispiel mit Essig) ausreichend, um evtl. zurückgebliebene Zementreste zu entfernen.

Daneben gibt es handelsübliche Produkte speziell zur Entfernung von Zement, die jedoch vorsichtig zu verwenden sind, da sie normalerweise hohe Säurekonzentrationen enthalten.

Als generelle Regel sollten immer die folgenden Vorsichtsmaßnahmen befolgt werden:

- Benutzen Sie nie ein säurehaltiges Produkt, bevor das Klebe- oder Fugenmaterial abgebunden hat, da sonst die Fugen beschädigt werden oder unauflösliche Bestandteile auf der Fläche zurückbleiben können.
- Lesen Sie aufmerksam die Gebrauchsanweisungen und Empfehlungen der Reinigungsprodukthersteller und befolgen Sie diese.
- Vor der Benutzung eines Reinigungsmittels sollten immer die Auswirkungen auf Fliesen und Fugenmaterial geprüft werden.
- Schützen Sie die Flächen, an denen sich keine Keramikfliesen befinden.
- Für die Reinigung glänzender Produkte und der Verlegungsfugen dürfen unter keinen Umständen Scheuerschwämme oder spitze Gegenstände verwendet werden.
- Wir empfehlen, das Reinigungswasser ca. alle 15 m<sup>2</sup> zu erneuern.

Wenn poröse, nicht wasserfeste Fugen verwendet wurden, ist es ratsam, ein Dichtungsmaterial für Fugen aufzutragen, um dieselben vor Schmutz und Feuchtigkeitsflecken zu schützen.

Zum Entfernen der Wachsbeschichtung auf der Oberseite der Fliesen sollten ausschließlich lauwarmes Wasser und ein feuchtes Tuch benutzt werden. Verwenden Sie keine Scheuerschwämme, Schaber oder spitze Gegenstände, da diese die Fliesenoberfläche verkratzen könnten. Zudem ist es empfehlenswert, Fliesen mit Craquelé-Effekt mit einem Dichtungsmaterial zu behandeln.

Für Fliesen in den Farben **Gold (Artisan)**, **Silver y Gold (Lanse)****Metallic y Electric Blue (Magical 3 y Scale)**, **Crackle (Masia)**, **Menorca**, **Reactive (Vitrail)**, **Cobalt**, **Amber o Victorian (Evolution)**, **Decor Raku y Decor Wadi**, dürfen unter keinen Umständen aggressive Reinigungsmittel verwendet werden, es sei denn, sie werden stark mit Wasser verdünnt. Auf jeden Fall müssen immer zuvor die Auswirkungen auf die Fliesen ausprobiert werden.

2 - Tägliche Pflege

Es ist sehr einfach, unsere Fliesen so schön wie am ersten Tag zu erhalten. Dazu ist es ausreichend, sie regelmäßig mit lauwarmem Wasser oder einem im Wasser gelösten handelsüblichen Reinigungsmittel zu wischen.

Achten Sie dabei auf die Hinweise im vorigen Abschnitt (Reinigung nach Abschluss der Bauarbeiten).

I \_ RÉCEPTION DU MATÉRIAU

S'il existe un problème du à un défaut des carreaux, on doit toujours le détecter **AVANT L'INSTALLATION**, ce pourquoi il est indispensable de vérifier le matériau avant l'exécution des travaux, car on n'admettra **EN AUCUN CAS** de réclamations de frais de décollement ou de pose.

Si vous allez installer des carreaux de base et des pièces spéciales et/ou décorés, vérifiez que le ton de toutes ces pièces est compatible, tout en considérant qu'elles peuvent présenter de légères différences de ton qui n'affectent pas le résultat final.

**ATTENTION:** Pour toute hésitation, arrêtez de poser le matériau et mettez-vous en contact avec le distributeur qui vous a vendu les carreaux. Les problèmes sont toujours plus faciles à résoudre si les pièces ne sont pas encore installées !

Ne pas utiliser les produits en pâte blanche pour les revêtements de sol, ni à l'extérieur.

II \_ INSTALLATION

1 - Surface de pose

Avant l'installation, on vérifiera que la surface qui recevra le matériau de prise est entièrement propre. Il est nécessaire qu'elle soit parfaitement sèche, à plomb, nivelée et plane (moins de 3 mm d'écart sur 2m<sup>2</sup>, dans toutes les directions). Elle doit également présenter une cohésion et une stabilité acceptables.

Les supports sensibles à l'eau (par exemple le bois) peuvent requérir un apprêt imperméabilisant. Si vous allez poser des couches intermédiaires d'isolation, imperméabilisation, ou un plancher chauffant, consultez les instructions de pose particulières pour ces produits.

2 - Choix des matériaux de prise

Generalmente se utilizarán adhesivos cementosos tipo C2.

On utilisera généralement des mortiers colles type C2.

Nous déconseillons l'usage de mortiers de ciment/chaux pour poser nos produits. Pour des poses sur mur avec des mortiers colles, il est conseillé qu'elles aient un glissement vertical réduit (T).

Pour des informations plus détaillées, nous disposons de tableaux de matériaux de prise selon le type d'installation pour chacune de nos séries sur **www.equipeceramicas.com**.

Quoiq'il en soit, il est toujours bon de consulter auprès du fabricant ou du distributeur du matériau de prise le type de produit à utiliser dans chaque cas.

3 - Pose des carreaux

3.1 Avant de commencer

Utilisez tous les matériaux et les outils conformément aux instructions du fabricant. Nettoyez bien la surface avant de commencer.

Ne pas humidifier les carreaux avec de l'eau avant l'installation.

On devra toujours utiliser la méthode de pose avec une couche fine.

Placez les pièces avec un joint de 1,5 mm (pâte blanche) ou 2 mm (grès cérame) au minimum. Signalez les joints de mouvement intermédiaires, le cas échéant.

- Pour les pièces qui ont un côté de plus de 30 cm, ou un format spécial, il est vivement conseillé la pose avec double encollage.
- Pour les pièces de 40 cm de longueur, dans des poses avec joint décalé, le décalage maximum doit être de 1/3 de la longueur de la pièce, jamais à la moitié de la pièce.
- Les carreaux de sol doivent se trouver à une distance minimale de 5 mm du mur ou de tout autre élément de construction qui limite sa mobilité potentielle.

3.2 Pose des carreaux

Étendez la colle sur la surface de pose, en utilisant la partie droite de la taloche, dans une zone réduite, en considérant le temps ouvert de la colle.

Pour des informations plus détaillées, consultez **www.equipeceramicas.com**

EQUIPE

Instrucciones de colocación  
Verlegungsanweisungen  
Instructions de pose

coupes de pièces planes, la découpeuse manuelle sera une option parfaite.

Les trous ronds s'obtiendront plus facilement avec une perceuse électrique (sans percuteur) et un foret en diamant du diamètre nécessaire, en maintenant le carreau bien fixé sur un support, et en refroidissant le foret avec de l'eau pendant le processus. Les onglets peuvent également se faire avec la découpeuse manuelle et l'outil adéquat, bien que le résultat soit toujours meilleur avec une découpeuse électrique.

Pour des coupes sur des pièces en relief ou des pièces spéciales, utilisez toujours une découpeuse électrique.

III \_ NETTOYAGE ET ENTRETIEN

1 - Nettoyage à la fin des travaux

Dans la pose de carrelage de sol, il est habituel qu'il y ait pas mal de poussière par terre, ce pourquoi il faudra tout d'abord balayer la surface soigneusement.

Ensuite, dans la plupart des cas il suffira de nettoyer avec une solution acide diluée (par exemple du vinaigre) pour éliminer les restes de ciment qui pourraient rester.

Il existe en outre des produits commerciaux spécifiques pour le nettoyage du ciment, mais on doit les utiliser avec précaution, car ils ont généralement des concentrations d'acide élevées.

En règle générale, tenez toujours compte des précautions suivantes :

- N'utilisez jamais un produit acide si le matériau de prise ou de jointoiement n'ont pas durci, car il pourrait détériorer les joints ou laisser des composés insolubles à la surface.
- Lisez attentivement et respectez les instructions d'usage et les recommandations décrites par les fabricants des produits de nettoyage.
- Avant d'utiliser un agent de nettoyage, il convient de vérifier son effet sur les carreaux et le matériau de jointoiement.
- Protégez les surfaces où il n'y a pas de carreaux en céramique.
- Pour le nettoyage des produits brillants et des joints de pose, n'utilisez en aucun cas des tampons à récurer, des spartes ou des objets pointus.
- Nous recommandons de changer l'eau de nettoyage tous les 15 m<sup>2</sup> environ.

Si vous avez utilisé un joint poreux, non imperméable, il est recommandé de le protéger avec un scellant pour joints, pour le protéger de la saleté et des taches d'humidité.

Pour retirer la cire protectrice du dessus des pièces, utilisez uniquement de l'eau tiède et un chiffon humide. N'utilisez pas de tampons à récurer, de spartes, de racloirs ou d'objets pointus qui pourraient rayer la surface des pièces. Par ailleurs, il est conseillé d'utiliser un scellant pour les pièces craquelées.

Sur les pièces de couleur **Gold (Artisan)**, **Silver y Gold (Lanse)****Metallic y Electric Blue (Magical 3 y Scale)**, **Crackle (Masia)**, **serie Menorca**, **Reactive (Vitrail)**, **Cobalt**, **Amber o Victorian (Evolution)**, **Decor Raku y Decor Wadi**, n'utiliser en aucun cas des produits de nettoyage agressifs, ou toujours les utiliser très dilués dans l'eau et en vérifiant auparavant leur effet sur les carreaux.

2 - Entretien quotidien

Il vous sera beaucoup plus facile de conserver vos carreaux comme au premier jour. Il vous suffira de les laver périodiquement avec de l'eau tiède ou une solution diluée d'un détergent habituel.

Tenez compte des considérations décrites au point précédent (Nettoyage à la fin des travaux).
